

Using and Applying Technology

are you a responsible problem solver?

	Need for improvement(0)	Satisfactory (1)	Good (2)	Excellent (3)
Presentation	has not met minimum expectations for presenting school work in this technology focussed subject. information is not presented clearly. the work presented is not clear for others to follow. work expectations have not been followed.	has attempted to present work to a satisfactory standard. has presented work which is clear for others. has focussed on clearly communicating data and information.	has presented work of good quality with consistent formatting throughout. has made a good attempt to use best practice techniques for alignment, balance, repetition. has adhered to expected work presentation format.	has presented work of the highest quality, format and appearance. has used best practice techniques to present work of the highest quality. has presented work which makes very good use of alignment, balance, contrast, proximity, repetition, and white space.
Task Management	has not met minimum expectations for managing the task. has made no attempt to get involved. has not used routine work practices.	has attempted to manage the task using appropriate resources. has made some attempt to get involved. has made some attempt to manage the task. has made some attempt to use routine work practice.	has managed resources to complete the task. has made a good attempt to get involved. has demonstrated good work practice and routines. <u>has met the deadline.</u>	has applied best practice work routines to complete the task. has been very involved with completing the task. has been very consistent in their approach to meeting targets. has been very productive.
Using Technology	has not created a solution that is fit for purpose. has not selected appropriate tools to complete the task.	has created a solution that is fit for purpose. has made some attempt to select and use software and hardware tools to complete the task.	has created a solution of good quality. has selected appropriate software and hardware tools to complete the task.	has used a range of tools to create a solution of outstanding quality. has searched and selected new tools to extend learning and create an enhanced solution.
Responsibility	has not used technology in a responsible manner. has not attempted to meet targets and goals.	has made some attempt to use technology responsibly. has made satisfactory progress. has tried to reach personal targets.	has used technology responsibly. has reached personal targets and goals.	has demonstrated a high degree of responsibility when using technology to share and communicate information. has been an independent learner. has made outstanding progress.
Problem Solving	has not attempted to solve the problem	has made some attempt to apply problem-solving processes to create a partially working solution.	has applied problem-solving processes to create a solution which solves the problem.	has applied problem-solving processes to create an outstanding solution which solves the problem.
