

**VACCINATIONS HAVE PREVENTED AT LEAST 103 MILLION CASES
OF CONTAGIOUS DISEASES SINCE 1924**

Short article: [Vaccinations have prevented at least 103 million cases of contagious disease since 1924](#) (The verge is a liberal leaning site but still based on science and thinking and not opinion.)

A more in depth, credible article for those who don't want to read a lot: [Vaccines - What Are They And How Do They Prevent Disease?](#)

If you are open to it, this is my discussion with lots of articles you can choose from to help examine what is actually true...

[Evidence-Based Discussion About Vaccines](#)
