MOULTRIE A-20 TAKES THE BEST IMAGES

Technology is constantly infusing with the sport of hunting to help create better hunters that are more efficient. Learning how to choose a reliable trail camera should be one of the first steps any new hunter takes on their journey to mastering their skills. **MOULTRIE A-20** is the best trail camera on the web these days. Experienced hunters know it takes more than just a bow or gun to catch your prey. You need to understand your prey and the more you do, the more successful you will be hunting.

Some of the best trail cameras give the modern hunter a huge advantage when it comes to monitoring trails and patterns. It's important to mention that there is nothing fundamentally wrong with the old-fashioned techniques of setting up a stand and waiting. The problem with this strategy is you can end up sitting and waiting the entire day with no guarantee that you

will see any of the prey you are hunting. This technique also limits you to watching one trail at a time.

By utilizing a network of trail cameras, you can watch multiple trails simultaneously. Then you can go back and review your footage and images to see where the big game is hiding and when they usually move. Recently manufacturers have begun to incorporate other technologies into their cameras to increase data gathering. This includes features such as GPS Geotagging, weather recording, and time and date stamp. You can literally stalk your prey before you pull your rifle out. You can also avoid stalking prey that is too young to hunt.

The **MOULTRIE A-20** are usually strapped to trees and along trails and left to gather relevant information. By using motion sensors, they are able to gather information over a long period of time without filling up your memory card or running out of battery. Some units are even solar compatible allowing you to leave them permanently watching your trails. Our list of the best trail cameras below will help you achieve some of the best hunting results you have ever experienced.

The **MOULTRIE A-20** utilizes a lighting fast .67-second trigger time that allows you to capture images even when they only pass by your camera for a split second. This unit is capable of recording HD quality images as well as sound and the six AAA batteries provide this device with extended operating times and flash range.

This camera has an impressive flash range of 100′. This means you are always going to get the best image lighting possible when using this device. Another great feature this unit includes is the Browning Buck Watch time-lapse viewer software. This intuitive software is designed to give you better access to your footage. The interface is simplistic and easy to use, making it the ideal combo software for this device.

Pros

Small Size

10 MP Quality Photos
