Delta Math RTI Program Notes:

- **Old Screener Names** → **New Screener Names: Fall** → 1A , **Winter** → 1B, **Spring** → 1C, and **Progress** → 1D.
- **Kindergarten readiness screeners** are designed as one-on-one interviews.
- **Additional screeners** (Forms C and D) are optional to monitor progress more frequently on all readiness standards.
- **Tier 3 screeners are recommended** for students previously identified for tier 3 support, such as students with IEPs and/or students scheduled for an additional section of math support. They are also recommended for students who did not get close to the learning goal after 8 days of a tier 2 intervention.
- **Tier 3 screeners are not recommended** for students who were close to meeting the learning goal after 8 days. For these students, take a short break from the standard and then revisit the standard using the Visual Guided Practice, Online Practice, Visual Fluency Cards, and/or Virtual Card Sorts.

Delta Math RTI Program Notes:

- Multi-tiered assessments inform explicit and systematic instruction based on [accelerated learning research](#).
 - Tier 1 screeners identify unfinished learning from the **current** grade level.
 - Tier 2 screeners identify unfinished learning from the **previous** grade level.
 - Tier 3 screeners identify unfinished learning from **2 or more previous** grade levels.
- If a student is not responding to Tier 3 intervention, consider using the next Tier 3 screener in the list to identify where unfinished learning began.
- Tier 3 screeners **are not recommended** for students who were close to meeting the learning goal after 8 days. For these students, take a short break from the standard and then revisit the standard using the Visual Guided Practice, Online Practice, Visual Fluency Cards, and/or Virtual Card Sorts.
