

HND Construction (2 years)

Course overview

Our HND Construction Management course at GBS puts you on track to reaching your career goals within the global construction sector. The course has been designed to develop your specialist skills and knowledge and to transform you into the professional that top employers in the construction industry are looking for.

Upon graduation, a range of career paths will be open to you, including:

- Assistant Design Co-ordinator
- Design & Build Co-ordinator
- Construction Site Supervisor
- Construction Design Technician
- Site Manager
- Project Manager
- Health & Safety Manager
- Planning Supervisor

You will gain an understanding of the way technology is transforming construction and will be ready and equipped to work with this technology. You will also learn more about contemporary issues facing the industry - in particular sustainability and the environment - and about the role that construction plays in addressing these issues.

The construction industry is a very practical, technical and hands-on environment, and teaching and learning in the course reflect this. You will learn from real-life examples, work-related learning, practical sessions, site inspections and expert guest speakers from the sector – all of which brings learning to life and make for a dynamic student experience.

Weekend and evening classes are available, subject to minimum class size.

Year 1

- Construction technology
- Construction practice and management

- Legal and statutory responsibilities in construction
