<data>Mission Report

Project Firebreak

Drop 16, Weyrloc Clan Trading Center, Tuchanka

21:19 - Turian patrol ship Indomitable contacted by assisting distraction team.

21:25 - Indomitable breaks position in Krogan DMZ to render assistance.

21:26 - STG vessel Veshok-16 enters through gap in sensor coverage.

21:40 - Touchdown and landing. Commander Kirrahe performs final review of drop parameters.

21:41 - Mission Specialist Solus suggests change to plan; when informed that plan will not be changing unless parameters shift, Specialist Solus suggests Commander Kirrahe has foreign obstruction in cloaca.

21:43 - Operative Rentola detects incoming Weyrloc scouts.

21:47 - Scouts neutralized. Rentola treated for minor injuries. After assisting, Specialist Solus asks if failure to land undetected constitutes parameter shift. Commander Kirrahe suggests operation may proceed as planned. Specialist Solus suggests cloacal obstruction is in fact Kirrahe's cranium.

21:50 - Team leaves Veshok-16 and proceeds toward primary drop point, Weyrloc agricenter.

22:38 - Weyrloc agricenter reached. Team splits, with distraction team led by Operative Rentola drawing Weyrloc scouts from area.

23:00 - Primary team disables solar array.

23:02 - Weyrloc workers leave agricenter to repair solar array.

23:07 - Primary team enters agricenter. Mission Specialist Solus performs water and soil tests to ensure proper payload dispersal. Assisted by Specialist Maelon.

23:12 - Distraction team breaks radio silence, informs primary team that Weyrloc group returning. Specialist Solus asks whether this constitutes parameter shift. Commander Kirrahe suggests that Specialist Solus is in fact a walking cloaca, restates importance of holding the line.

23:13 - Weyrloc team arrives at agricenter and initiates close-quarters combat. Operatives Jirin and Chorel killed. Specialist Maelon and Operatives Hishau and Shenok seriously injured. Weyrloc team killed in entirety. Last member prevented from broadcasting alarm due to Specialist Solus stabbing Weyrloc guard through eye with pitchfork, sustaining injuries to face and right cranial horn in process.

23:16 - Distraction team arrives to provide relief. Commander Kirrahe notes parameter shift, suggests Rentola take injured team members back to ship while he and remainder of team attempt to hit secondary drop point. Despite injuries to face and head, Specialist Solus refuses to return to ship, noting need for soil and water analysis at secondary site. Kirrahe suggests Solus is one tough cloaca.

23:20 - Specialist Maelon greatly distressed by discovery that agricenter was staffed by female krogan, including guards killed in attack. Specialist Solus calms colleague and provides sedative. Specialist Maelon returns to ship with other injured team members.

23:30 - Active team finishes disposal of bodies and heads for secondary drop point, Weyrloc hospital.

00:15 - Active team infiltrates hospital undetected. Specialist Solus determines chemical makeup of soil and water fall within necessary parameters. Payload dispersed into water and food.

01:15 - Active team returns to ship. Specialist Solus declines treatment, insists on providing additional care for Hishau, Shenok, and Maelon.

01:25 - Specialist Maelon makes formal protest, suggesting actions against female krogan violate mission parameters of maintaining population levels without negatively impacting culture. Specialist Solus requests protest be stricken from record due to Maelon's injured condition. Commander Kirrahe concurs. Maelon given additional sedatives, unconscious for remainder of operation. (Protest stricken from submitted copy of report.)

01:40 - STG vessel Veshok-16 lifts off, departing through existing sensor gap. Mission complete.</data>

<data>Partial transcript of conversation recorded on the Normandy's lower decks:

Zaeed Massani: So this hotshot turian moves in by the door, ignores my hand signal, and gets hit straight through the visor.

Kelly Chambers: Oh my.

ZM: It's like he was expecting slavers to hand out business cards instead of bullets.

KC: Was he all right?

ZM: The turian? Nah, sniper took his head clean off.

KC: Oh dear.

ZM: Right. It all went to shit after that. We jammed their radio equipment, but the slavers got off a shuttle that came back with a bomb.

KC: But they were keeping people in that camp!

ZM: Sure, they'd lose some credits, but there's always another civilian transport in the Terminus Systems.

KC: So I'm beginning to realize. What did you do?

ZM: Got the hell out. We killed their captain and the guards like we were hired. I figured the merc flying the shuttle wouldn't be dumb enough to blow up his own base once we left.

KC: What happened?

ZM: The Blood Pack always did like them incredibly goddamn stupid.</data>
