Wichita Roach Control / Wichita Cockroach Control

Call All Star Pest Control in Wichita. We can eradicate the roaches infesting your home!

Roach infestations are contagious! They can be spread to visitors to your home, family, and neighbors.

All Star Pest Control has a 3 step plan for attacking a roach infestation.

1. Prepare for treatment
   First, you must prepare for treatment. Don't worry, it's not too hard, and we'll walk you through the process.
2. One - two punch!
   Next, All Star Pest Control will treat your roaches TWICE! We'll treat them once during your initial pest control service, then we'll return about 30 days later to treat those roaches again during your first regular maintenance service.
3. Year-round maintenance.
   You'll need year-round maintenance treatments to make sure those roaches don't come back. All Star Pest Control in Wichita has you covered.

Roaches / Cockroaches

Yes, you read right. Roach / cockroach infestations are contagious. They frequently spread to neighbors. Guests in your home could take your roach infestation home - it only takes a pregnant female to start a new infestation. Call All Star Pest Control in Wichita today! We can exterminate the roaches in your home.

Cockroaches are ancient. They've survived eons, and it's been joked that they could survive a nuclear bomb. Well, they won't survive All Star Pest Control.

<u>Here are some Frequently Asked Questions:</u>

What varieties of roaches and cockroaches does All Star Pest Control in Wichita treat?

All Star Pest Control exterminates ALL varieties of roaches including German roaches, German cockroaches, Asain roaches, Asain cockroaches, American roaches, American cockroaches, brownbanded cockroaches, Oriental cockroaches. All Star Pest Control treats all kinds of roaches in Wichita.

How did I get roaches?

Roaches can be very contageous. If you had them in a previous home, they moved with you. They can come from neighbors, the grocery store, or an overnight guest. However you got roaches, All Star Pest Control can get rid of them.

Some people think, “my house is clean? How can I havee roaches?!” Even a crumb is a feast to a roach. Roaches prefer leftover food, but cockroaches will eat pretty much anything: toothpaste, wall paper, hair, decaying matter, even books.

Can I just have one treatment?

No. You will need two roach control treatments, followed by a regular pest control treatment plan to prevent reinfestation. If you have roaches, your neighbors probably do, too. That means after your roaches are exterminated, their roaches will try to move in. All Star Pest Control in Wichita can prevent roach reinfestation, but only with recurring pest control treatments.

How do I know if I have a roach infestation?

Roaches are nocturnal, so you probably won’t see many during the day. At night, go into the kitchen and turn on the light. If you see roaches scatter, you have a larger infestation. If you see more than one roach every week, you have a small infestation that will grow without treatment.

Are cockroaches and roaches dangerous?

Yes, roaches can be dangerous. Roaches can carry disease and bacteria. As they crawl around your kitchen, food, and home, roaches can spread these germs.

Roaches can also crawl into people’s ears. CRAWL INTO YOUR EARS!!! They then have to be removed by a doctor or nurse to prevent hearing loss or damage.

Are All Star Pest Control roach treaments safe?

Yes! All Star Pest Control in Wichita offers safe and effective roach control treatments. Our products are EPA regulated and safe for babies, puppies, and kitties. However, you must follow our instructions to ensure your safety, your pets’ safety, and your family’s safety.

After treatment, you, pets, and family members will need to leave the home for 4 hours. When you come back home, you’ll need to clean off counters and other food prep areas before use. You’ll need to wash any dishes that were in the home during treatment before you can use them. These simple precautions should prevent any adverse affects from our treatment. Customers who are concerned their individual health issues could make them sensitive should consult a doctor before treatment and appraise All Star Pest Control of their concerns.

Bottom line: You do NOT have to live with roaches any more! Call All Star Pest Control in Wichita today! You'll be glad you did.
