

Commissions Price Guide (2024)

For those who want a quote on what a commission would cost before making their official request. All prices are on the actual form itself as well, but here will be a more extensive guide on flat rates, add-ons, and fees, with visual examples.

All base prices are per character, with the exception of Pose Pages or Character References.

Make sure to read my [Terms of Service](#) as well.

Clean Sketches

Clean sketches are line drawings with no color. They're saved on a low contrast color background, usually grey, but the color choice can be changed depending on the client's choice.

Lineart is available as a transparent png as well for editing and coloring upon request.

Headshot/Bust - \$40	Full body - \$55
-----------------------------	-------------------------

Both examples cost their respective flat rates.

Background elements/props can be negotiated, and usually do not cost extra. Props larger than the figure in the art will probably cost extra, but not a lot. Prices are per character.

Colored Sketch

Fully lined and colored piece with simple rendering on a simple gradient or patterned background.

Headshot/Bust - \$65	Waist up - \$70	Full body - \$75
----------------------	-----------------	------------------

Examples are both full body and would each cost \$75

Background elements and props can be negotiated. Props that are larger than half the figure's height will cost extra. Prices are per character.

Comic/Sequences

Usually clean sketch style, separated into panels/pages with a low contrast background. Color or rendering can be added for an additional cost, or transparent lines can be provided free of charge for the client to color themselves. Prices will fluctuate depending on complexity, but these are the basic flat rates.

\$50 per panel	+\$50 per additional character	+50% of price for full color
-----------------------	---------------------------------------	-------------------------------------

Example is four panels, plus additional character, no color, so the total is \$250. To add color would be an additional \$125.

Painting

A fully colored, fully rendered piece, with a simple flat color, gradient, or patterned background.

Headshot/Bust - \$90	Waist up - \$120	Full body - \$180
-----------------------------	-------------------------	--------------------------

Example on the right includes a simple scenic background upgrade and would cost \$190.

Background elements and props can be negotiated. Props that are larger than half the figure's height will cost extra. Prices are per character.

Telegram Stickers

Flat color with a white border. PSD files for editing are available upon request.

Single character - \$15	Character + YCH - \$25	Two characters - \$20
--------------------------------	-------------------------------	------------------------------

The YCH costs slightly extra as it comes with a small fee for editing rights. Prices are per sticker.

Reference Sheets

A reference of your character of choice. Prices may fluctuate depending on complexity.

Character Reference

Simple Reference - \$100	Complex Reference - \$180
one pose, color palette, few details	Up to three poses, many details/elements

Custom Designs

Custom character design prices include commercial usage fee. [For custom design reselling permissions, check my ToS.](#)

Simple Reference - \$200	Complex Reference - \$250
--------------------------	---------------------------

Pose Pages

A page of your character in various positions and situations, to highlight expressiveness or provide reference. Clients can choose the poses, or let me come up with my own. Flat colors and simple backgrounds only.

4 poses - \$120

6 poses - \$180

Separate files of the poses individually are available upon request for no additional charge.
Additional poses are \$50 each. Props larger than the figure's height also cost extra.

Add-Ons

Prices for some additions are heavily dependent on the type of commission and will need to be negotiated during the planning process.

Additional character	Base prices are per character, excluding ref sheets and pose pages.
Background/props	Any item larger than the main figure's height counts towards props, and price varies on complexity.
Variants	Wet/messy versions, nude version, outfit changes, etc
Commercial use	The fee is dependent on the type of usage and the price of commission.

Examples:

Example is a full body colored sketch (\$75).

Prices are per character, so this is an additional \$75.

Full price comes to \$150.

Example is a full body painting (\$180)

It includes a variant of lower difficulty/complexity, so I priced the extra variant to be an additional \$15.

The background is scenic but simple, which I priced as an additional \$10.

Full price comes to \$205.

Thank you for reading!

I hope this all made sense. If you have any further questions, you are free to reach me either via Twitter DMs or through [my email](#). I am eager to get to work for you!
