Intermediate Software Developer with expertise in .NET, Node.js, React, and the MERN stack. Skilled in developing and enhancing enterprise-level applications with a strong focus on performance, scalability, and maintainability. Experienced in building dynamic user interfaces, optimizing backend systems, and resolving production-level issues. Passionate about delivering high-quality software solutions and continuously advancing technical skills through hands-on learning and innovation.

WORK EXPERIENCE

Intermediate Software Developer
May 2025 – Present

Contour Software, Karachi, PK

Working as a Software Developer on the Integrated Dealership System (RV & Marine enterprise solution) using .NET technologies. The platform manages all dealership operations, including accounting, sales, service, and inventory. Responsible for handling production-related issues, system enhancements, and modernization initiatives.

- Modernizing the legacy .NET application into scalable React web and React Native (Expo) mobile applications.
- Enhancing system performance and reliability through optimized architecture, SOLID principles, caching, and RabbitMQ-based syncing with multiple DB(s).
- Managing production support, debugging critical issues, and implementing continuous improvements across multiple databases and core modules.

Assistant Software Engineer
April 2024 – May 2025

Cubix, Karachi, PK

Working as a MERN-stack developer specializing in Node.js, Next.js, and React. Focused on delivering high-quality web applications with expertise in scalable architecture and backend optimization. Collaborates with cross-functional teams and applies Agile methodologies to drive successful project outcomes.

- Enhanced application performance through code optimization and architectural improvements..
- Developed and deployed features in MERN-stack web applications, handling both frontend and backend tasks.
- Actively participated in peer reviews and knowledge sharing to ensure quality and maintain coding standards.

Junior Software Engineer
February 2024 – April 2024

Riksof, Karachi PK

Worked on various projects using Riksof's proprietary S2A framework, Next.js, and React. Gained experience in backend development and building user-centric applications. Collaborated with senior engineers on backend and data-driven projects as an intern.

- Assisted in developing web applications, optimizing front-end user experiences.
- Worked closely with the engineering team on delivering new features and resolving issues.
- Gained practical experience in backend development with a focus on modern JavaScript technologies.

Junior Software Engineer   March 2023 – February 2024
Intech Graviti, Karachi, PK

Started as a Trainee Software Engineer and transitioned to a Junior Software Engineer, working on web development projects using Node.js, Express.js, and React.js. Gained hands-on experience in building dynamic applications, integrating APIs, and enhancing user interfaces. Developed a strong foundation in HTML, CSS, JavaScript, and jQuery, contributing to both front-end and back-end tasks.

- Built and maintained scalable web applications with a focus on user-centric designs.
- Collaborated with senior engineers to deliver high-quality solutions.
- Improved front-end performance and ensured seamless back-end integration.

SKILLS & OTHER

Frameworks & Libraries: DotNet, Node.js, Express js, Koa js, Next.js, React, Vue.js.
Databases: MongoDB, PostgreSQL, MySQL.
Deployment Tools: AWS, Jenkins.
Payments Integrations: Stripe, PayPal.
Styling Tools: Tailwind CSS, Bootstrap.
Languages & Tools: JavaScript, TypeScript, Python, HTML5, CSS3, NPM.

EDUCATION

Iqra University, Karachi, PK   September 2019 – December 2023
Bachelor of Science — Computer Science

Habib Public School, Karachi, PK   February 2018 – May 2020
Pre-Engineering

Aga Khan School, Karachi, PK   January 2016 – January 2018
Computer Science
