

Q4/22-23

Teacher Name: _____

Course: _____

Standard	Total Number Students	% of students at 3 or higher	% of students at 2.5	% of students at 2.0 or lower	Students for WIN	Students for After-School Tutoring

Reflection Questions: *(Reflection questions are just meant for you to think about what worked and what changes you would make in the future, if any.)*

1. If I only have 60% or lower mastery, what factors do you think led to this %? (Think about the professional or personal factors or the prerequisite skills of the student.)
2. Based on this data:
 - a. What are the positive aspects of the data?
 - b. Are there any changes to the curriculum that need to be made?
 - c. If students are struggling, what prerequisite skills are missing for students (if any)?
 - d. Do we need to revise any teaching strategies?

**Really think about the students you think you can move when looking at WIN/tutoring. We know there is only time to do so much - but any little step you can take to move a few students forward will help. OR, think about those 10 students you were focused on at the beginning of the school year that you hoped to be able to move. How are those 10 students doing and what are the next best steps for them? Think about how you can help 1% of the students grow - 1% better everyday makes a big difference! :-)*
