- There is no coverage if your special falls during your Field Day time. Your specialist will supervise your class if there is overlap.

**Stations are...**

**Capture the Flag-**

Split the class into two teams if you only have one class. If two classes play, play class VS. class. One class will wear pinnies to differentiate the teams. the field will be broken into two sides. Each team is safe on their side. If they cross over to the other side they can get tagged. If they get tagged they need to put their hands up and walk to the tagging teams jail. In the jail those players need to wait until a team mate makes it to the jail area without getting tagged. They then link arms and both get a free walk about to their side. No chains and can only rescue one person at a time.

The flag area will have cones around the flags. That is a safe zone for the team trying to steal 1 of 2 flags. If they make it there successfully without getting tagged they have ten seconds in that area to make a move before they can get tagged. Taggers can not cut through this area to tag the opposing team until after the 10 seconds. Taggers should count out loud slowly so there is no discrepancy on how fast or if they counted.

A team wins the round when they get the other teams 2 flags on to their side. The team with the most wins in 30 minutes wins this event. Each round is worth 1 point.

**Crazy kickBall-**

Two teams. class VS class or split one class into two. four bases (gymnastic mats). For a run to score the runner must round the bases twice. One player makes it around one time they need to announce they are on their second lap! You can have as many players

on a base as you want. You choose when you want to run and can make it to the next base successfully. If you step off the base you can not go back and must run to the next base. If the ball is kicked in the air and the fielder catches the ball the kicker is out. If any player steps off the base when the field caught the ball, they two are out. Each inning has 4 outs! Teams can make multiple outs at once. Fielders can tag the person with the ball or simply touch the base the runners are going to, to get them out since the runner stepped off they have to run and can't go back.

**Example:** If 3 people are on 1st base and all decided to run when the kicker kicked the ball into the air and a field caught it. There would be four outs!

If all runners get stuck on the bases because they are not taking a chance on running then it also counts as four outs and the teams would switch kicking and fielding.

### Treasure Island

Each team has 1 gymnastics mat, 4 polly spots, a scooter, and a rope. The gymnastics mat is halfway across the court. spots are  $\frac{3}{4}$  away across the court. Each team starts with the scooter and rope. If they get to the spots they can pick them up and move them as needed. They can not use the spots to stand on and shuffle their feet on. Players may not stand on the rope to get to the other side. They need to get all team members to the other side of the court and back without touching the ground! If any player touches the ground with a body part the whole team needs to restart. If the team makes it to the gymnastics mat which is half way across it will count as a checkpoint. Meaning if a player touches the ground going from the mat to the other side, the team just restarts on the mat not from the very beginning.

If the team makes it over and back they have completed level 1. Level two the gymnastics mat gets folded up so the (island) is smaller. Same rules apply. Teams will start to figure out they might not be able to fit all players on the island.
