

Educreations

I want to create... a whiteboard recording.

Step 1:

Sign up or Log in to Educreations.com

Log In

or log in with:

Google Facebook

Don't have an account yet? [Sign Up](#)

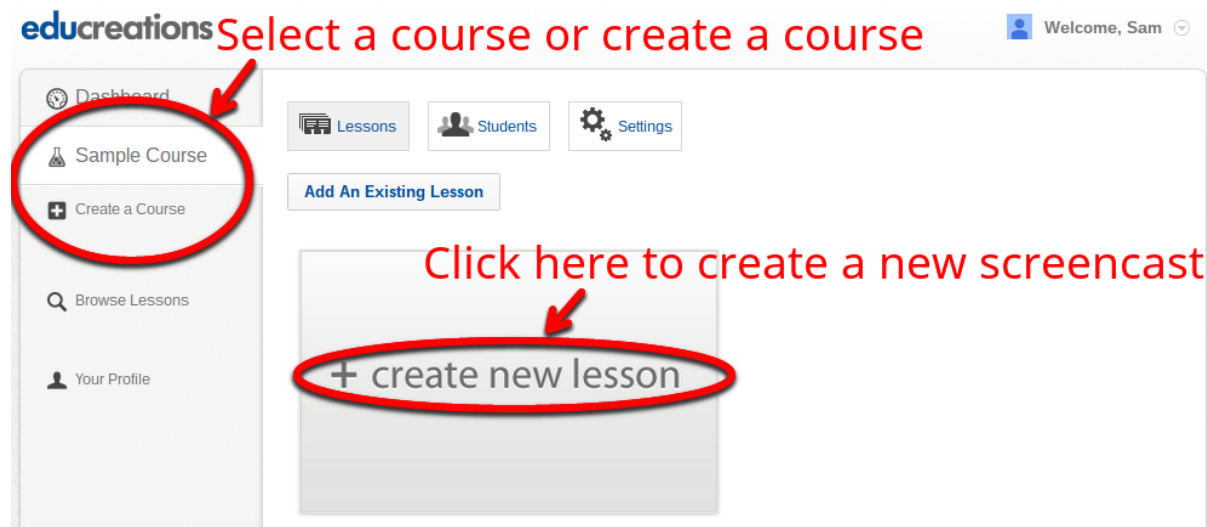

Educreations will allow you to sign in with Google so you do not need to remember a new username and password.

If you want students to create videos, they will need to create their account as a teacher. Only teachers are allowed to create videos.

Step 2:

If you are creating your first video, you will need to set up a course first. Videos are referred to as “Lessons” and the “Lessons” belong in a “Course”.

Once your “Course” is created you can begin by creating your first “Lesson”.

Step 3:

From the recording screen you have options to change color, add pictures, trash pictures, undo, redo and toggle between pages.

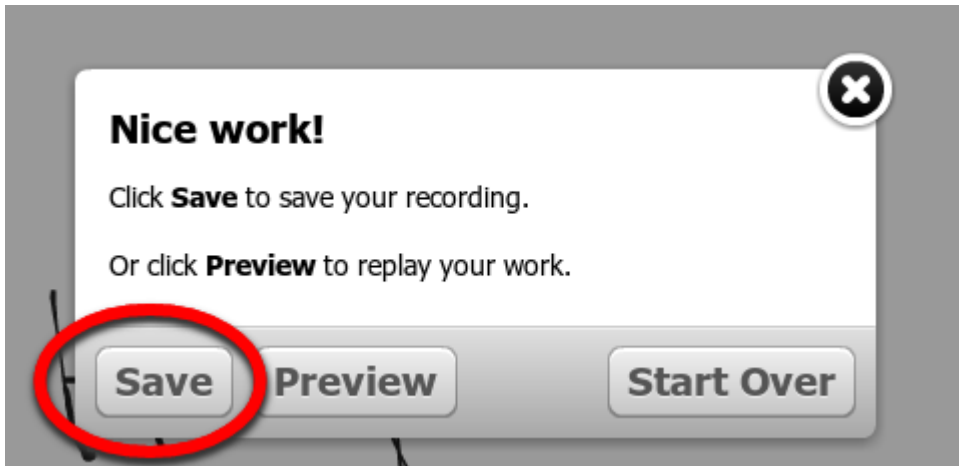

Once recording has started you can also pause.

Step 4:

Once you are finished with your recording, click "Save".

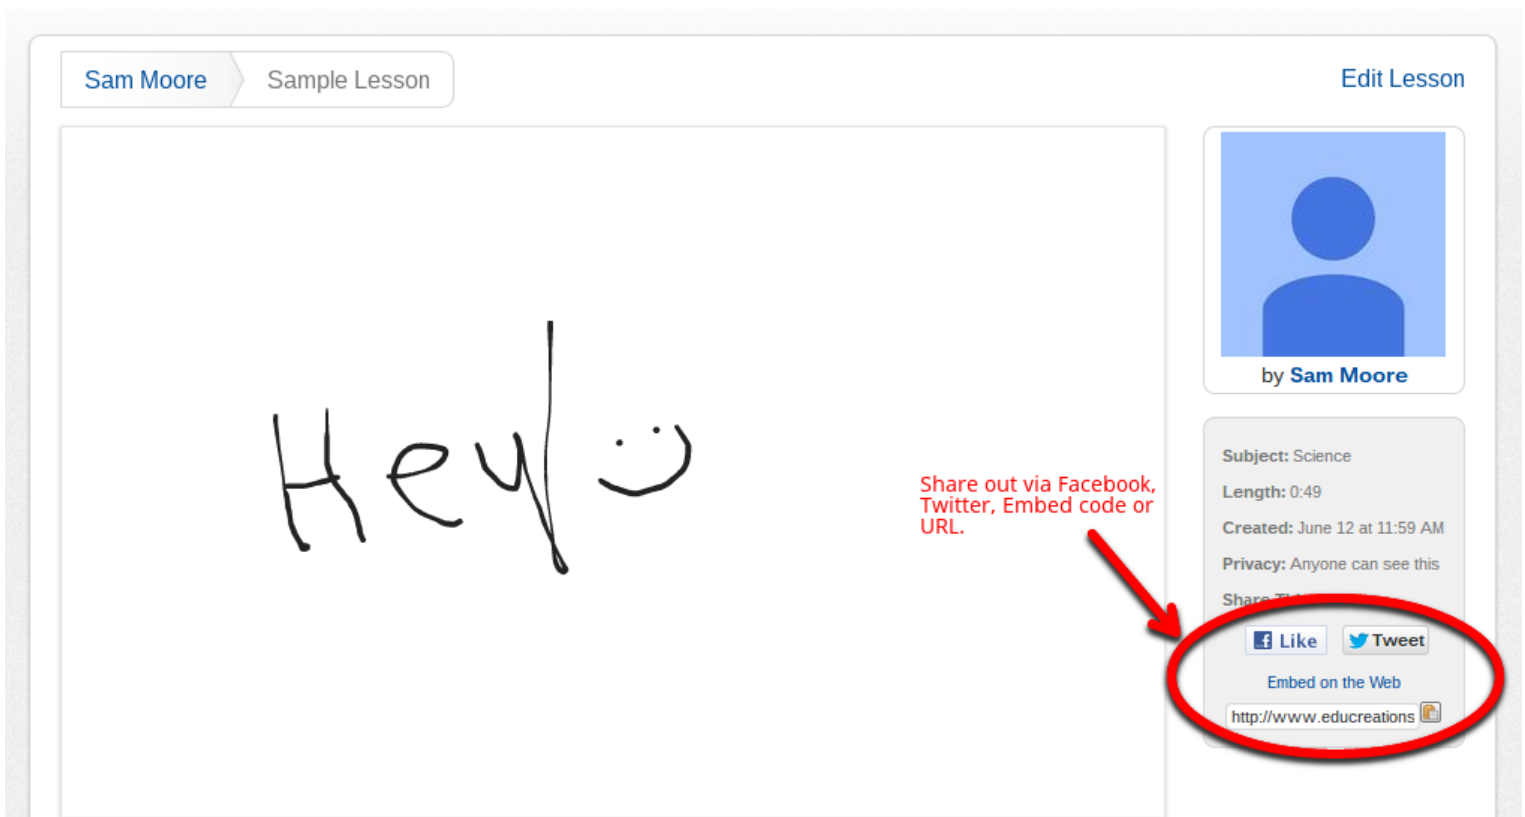

This will save your finished product in your "Course" folder.

Step 5:

Grab the URL or Embed code here to share out your Whiteboard Recording.

Enjoy!
