

1. **Thanos- There are two Black Order members in my row but none of us are adjacent, I am diagonally adjacent to a planet.**

Thanos tells us there is a member of the black order in both C1 and E1. He also tells us Ego is in B2 as Ego is the living planet.

2. **Ego- I am adjacent to the female member of the Black Order but Loki is not. The main villain from Iron Man is in A4.**

Ego tells us that is adjacent to Proxima but she is not adjacent to Loki however we do not know where Loki is yet so cannot place Proxima yet. Iron Monger is in A4 as he is the main villain from Iron Man.

3. **Iron Monger- Two villains that appear in Age of Ultron are located below me. Burch is in B2.**

Stane tells us two villains from AOU are below him these could be- Strucker, Klaue or Ultron so we cannot yet fill these ones in. But we can place Burch into B2.

4. **Sonny Burch- The villain below me has wings. Me and Ego share a diagonal adjacent to Thor's brother.**

The only MCU villain (from iron man to endgame) is Vulture so therefore vulture is in D3. Ego and Sonny have 2 diagonal adjacents in common, however we know C1 will be a black order member and therefore that leaves C3 for Loki.

5. **Vulture- Strucker isn't in this quiz.**

We now know which 2 AOU villains are in A5 and A6 but we do not know who is in which so we will have to come back to this.

Loki- I am diagonally adjacent to Hela. The main villain from Thor: Dark World is in a bottom corner.

We now know that Hela is either in B4 or D4 but we will have to come back to her later. We can now place Malekith in E6 as we know A6 is an AOU villain.

6. **Malekith- The Golden Lady is in A3 and Squidward is in this column.**

We can now place Ayesha into A3. But we now know Ebony Maw is located in column E.

7. **Ayesha- The red guy is in row 5 to the right of Ulysses Klaue.**

We now know that Ulysses Klaue is in row 5 and therefore he must be in A5 and Ultron must be in A6. But we also can place Red Skull into B5.

8. Ulysses Klaue- The man who killed me is in this row.

We now know Killmonger is either in C5, D5 or E5.

Ultron- Cap's best friend is in B1 and is diagonally adjacent to the man killed by Fury.

We can now place the Winter Soldier into B1 and know that Alexander Pierce is in A2 or C2.

Red Skull- The man to my right wants Cap arrested after the Civil War.

C5 must be Thaddeus Ross. This means Killmonger must be in either D5 or E5.

9. Winter Soldier- Thor's sister is in this column along with a member of the Black Order and a villain from the Incredible Hulk.

Hela must be in B4 as she is diagonally adjacent to Loki and in Bucky's column. This leaves B3 and B6 as Abomination and an unknown member of the Black Order,

Thaddeus Ross- I am adjacent to 2 Ant-Man villains as well as Blonsky.

This means B6 must be Abomination as he is in column B and adjacent to Ross. The 2 Ant-Man villains can therefore either be in C4, C6, D4, D5 or D6.

10. Hela- Ronan is in E2 and Ghost is in D6.

Ronan in E2. Ghost is in D6 therefore the other Ant-Man villain must be Yellowjacket and he must be in either C4, C6, D4 or D5.

Abomination- Dormammu is in C4.

Dormammu is in C4 leaving Yellowjacket to either be in C6, D4 or D5.

11. Ronan- I share my row with 1 Iron Man 2 villain and my column with the other.

We now know that both Whiplash and Hammer are both in this quiz and one is in row 2 and the other in column E.

Ghost- I share my column with a previous anther and my diagonal with the Black Order member killed by Vision.

Killmonger must therefore be in D5 as he is in row 5 and the same column as Ghost.
Corvus Glaive must be in E5 as that is the only available diagonal of Ghost.

12. Killmonger- Kaecilius is in the last column.

Kaecilius must be in either E3 or E4.

Corvus Glaive- A tool from Iron Man 2 is on top of me.

Hammer must therefore be in E4 and Kaecilius in E3.

13. Hammer- My ally is in column C

Whiplash must therefore be in C2 as that is the last available square in column C as C1 is a Black Order member.

This means that A2 must be Pierce as that is the only remaining diagonal of Bucky.

14. Alexander Pierce- Helmut Zemo is in D4

Proxima midnight must be in C1 as thats Ego's only remaining adjacent he doesn't share with Loki.

Ebony Maw must be in E1 as it is only remaining square in column E.

Cull Obsidian must be in B3 as he is the only remaining Black Order member.

15. Kaecilius- Killian is in the remaining square.

Killian is therefore in D1.
