

Monster Tessellation Mastery Task

Starting with a small square (you may choose 1inch, 1.5 inch, or 2 inches- keep in mind the smaller square you start with the more complex your tessellation will be).

Follow the same process we did in class- [Create a simple tessellation](#) to create a non-squareish tessellation. Tessellate it on a piece of card stock. You need to color each shape the same way- either as an animal, monster or with an abstract pattern.

This site has directions for more [complex tessellations](#).

When complete- tape your tessellation pattern to the BACK of your final design.

Grading:

Shape constructed correctly + taped to back! - 20

Tessellation - 20

Coloring- 10
