

Ethics approval and consent to participate:

I understand that;

- If previously published material is reproduced in my manuscript, I will provide proof that I have obtained the necessary copyright permission. (Please refer to the Rights & Permissions website)
- My manuscript is submitted on the understanding that it has not been published in or submitted to another peer-reviewed journal. Exceptions to the rules are papers containing material disclosed at conferences. I confirm that I will inform the journal editorial office if this is the case of my manuscript. I confirm that all authors are familiar with and agree with submission of the contents of the manuscript. The journal editorial office reserves the right to contact all authors to confirm this in case of doubt. I will provide email addresses for all authors and an institutional email address for at least one of the co-authors, and specify the name, address and e-mail for invoicing purposes.
- Use of experimental animals, and human participants

For articles reporting experiments on live vertebrates and/ or higher invertebrates, the methods section must include a statement: 1. identifying the institutional and/or licensing committee approving the experiments, including any relevant details; 2. confirming that all experiments were performed in accordance with relevant guidelines and regulations.

For research involving human participants, authors must identify the committee that approved the research, confirm that all research was performed in accordance with relevant guidelines/regulations, and include in their manuscript a statement confirming that informed consent was obtained from all participants and/or their legal guardians. Research involving human research participants must have been performed in accordance with the Declaration of Helsinki.

Identifying information: Human participants' names and other identifiers must be removed from all sections of the manuscript, including supplementary information. Written informed consent must be obtained for the publication of any other information that could lead to the identification of a participant (e.g. clinical images and videos). A statement confirming that informed consent to publish identifying information/images was obtained must be included in the methods section. Identifying images/video/details which authors do not have specific permission to use must be removed from the manuscript. Please note that the use of coloured bars/shapes to obscure that eyes/facial region of study participants is NOT an acceptable means of anonymisation.
