Emerging Technologies: Preliminary Research

Step 1) Generating Research Questions

Create questions to guide your research using the stems below. While you research, focus on answering these questions.

Your Global Issue:	Leukemia Acute Myeloid AML
Background information	what is it?
Impact/Effect	How does this affect the patient?
Prevention	Is it preventable?
Other	How do you get it?

Step 2) Creating Search Terms

Brainstorm a minimum of six search terms related to your topic. Use these to begin your search.

Leukemia Acute Myeloid	AML symptoms	AML prevention
causes of AML	where does it come from	genetics
