

Lightning Step

Medical Admit Note API

24 November 2021

Medical Admit Note API

All endpoints use the Bearer token authentication.

Endpoints:

List:

get request

/api/v1/medadmitnotelist/{inquiry_id} - returns all Medical Admit Note documents for given inquiry_id

Show:

get request

/api/v1/medadmitnoteshow/{medadmitnote_id} - returns the details of a specific Medical Admit Note

Create / Update:

post request

/api/v1/medadmitnotecreate/⟨⟨post payload⟩⟩ - Creates a new Medical Admit Note and returns the Medical Admit Note information

Required / Optional fields – see below

Delete:

get request

/api/v1/medadmitnotedelete/{medadmitnote_id} – marks Medical Admit Note as eie

Fields:

	Field	Type	API Usage
	id	int(10) unsigned	Set automatically via API

datedoc	date	Optional, can not be future dated
timedoc	time	optional
fname	varchar(50)	Set to inquiry fname via API
lname	varchar(50)	Set to fname lname via API
sfname	varchar(50)	Set by API user
slname	varchar(50)	Set by API user
mrn	varchar(25)	Set to inquiry→mrn via API
dob	date	Set to inquiry→dob via API
sigfield	text	Set to null via API
sigline	varchar(100)	Set to null via API
staff_id	int(11)	Set by API user
client_id	int(11)	Set to inquiry→client_id via API
episode_id	int(11)	Set to inquiry→episode_id via API
inquiry_id	int(11)	Required
dateadmission	date	Not Considered via API
reasonforadmission	varchar(150)	Optional
height	int(4)	Optional
weight	varchar(25)	Optional
hxofdruguse	text	Optional
hxsih	text	Optional
medicalissues	text	Optional
mentalstatus	text	Optional
mdsigfield	text	Set to null via API
mdsigline	varchar(100)	Set to null via API
datemdsig	date	Set to null via API
eie	tinyint(1)	Set to 0 via API
dss	tinyint(1)	Set to 0 via API
created_at	timestamp	Set to timestamp via API
updated_at	timestamp	Set to timestamp via API
ifs	tinyint(1)	Set to 1 via API
datestaffsig	date	Set to null via API
location_id	int(11)	Set to inquiry→location_id via API
recpgmid	int(11)	Optional
primarydxid	int(11)	Not Considered via API
disposition	varchar(50)	Optional
udsbalresult	text	Optional
recpgm	varchar(100)	Set via API if recpgmid is set
primarydx	varchar(100)	Not Considered via API
isnocurrentmed	tinyint(4)	Set to 0 via API
qcrequired	tinyint(1)	Not Considered via API
qcc_id	int(10) unsigned	Not Considered via API
qccdoc_id	int(10) unsigned	Not Considered via API
sup_id	int(10) unsigned	Not Considered via API
supdoc_id	int(10) unsigned	Not Considered via API
