

Cases of forest damage

Valia Kalda

- **Wildfires:** In August 2022, a big fire burned parts of the Valia Kalda forest.
- **Human Activities:** Some roads were built in the forest, which can harm animals and plants. Scientists say we should be careful about where we build roads to protect the forest.

Dadia Forest

- **Wildfire:** In August 2023, a huge fire burned about 73,000 hectares of the forest, destroying nests of rare birds like the black vulture.

Mount Agrafa

- **Wind Farms:** Building big wind turbines in Agrafa could harm the environment and damage the forests.

Mount Olympus

- **Damage from Grazing and overbuilding:** Too many animals eating plants and buildings being built have caused the soil to become loose, making it harder for plants to grow.
