

SJH Comprehensive Counseling Program

Schultz Junior High Counseling Mission Statement

The Schultz counselors are committed to providing a comprehensive school counseling program that supports the academic, social, emotional, personal, and career development of every student. Our mission is to support, guide, and empower students as they discover their strengths, overcome challenges, set meaningful goals, and prepare for their future.

Guidance Curriculum

Through a guidance curriculum, a school counselor guides students in developing their full educational potential and serves as a critical Tier 1 support for all students. This curriculum helps students develop competencies that align with the knowledge, attitudes, and skills appropriate for their developmental level. The guidance curriculum is delivered systematically by school counselors in collaboration with other professional educators. The curriculum includes K-12 classroom lessons and group activities.

Individual Student Planning

Through Individual Student Planning, a school counselor guides each student in planning, monitoring, and managing their educational, career, personal, and social development. To achieve this, school counselors work with other educational professionals to implement systemic activities that guide students in creating future goals and plans.

Responsive Services

Through the responsive services component, school counselors intervene on behalf of any student whose immediate personal concerns or problems put the student's continued educational, career, personal, or social development at risk. This can include preventive, remedial, or crisis situations. Responsive services are implemented through individual or small-group counseling, as well as through crisis response.

System Support

System support is the foundation of the comprehensive school counseling program (CSCP). School counselors plan, organize, implement, manage, and evaluate their school counseling program to increase efficiency and efficacy. In addition, school counselors coordinate with providers in the broad network of interrelated services offered in the school, district, and community to ensure individual student needs are met.
