**January Transportation Report**

- With the addition of the full time driver hired last month, we are now short 2 1/2 regular route bus drivers.
- We are still waiting on one more repair estimate for one of our regular route buses (Rt #18) that has a blown/cracked engine.
- We are still waiting on the frame rail we ordered last year to replace the one that is cracked on Rt#13 bus.
- The addition of bus monitors has been going great. They are really helping the drivers maintain order on the bus and it has cut down on the number of bus referrals.
