EasySTBLManager for TS4

This is a port of the STBL management tool I did for TS3, with an added function to batch copy strings from one STBL to another in the same package. This is kind of a quickie and new work in-game, so use caution and keep a **backup** of your original package.

Extract and run EasySTBLmanager.exe.

Edit: There's a weird bug when using the Musher function which I'll get to ASAP. Use at your own risk meanwhile.

And another edit: The bug was in my brain, I confused Spanish with Portuguese. That'll teach me to test when I'm tired. Everything seems to be working okay, but keep backups.

6/20/17: Version 1.0.0.1 - Cosmetic changes to correct problems with display and resizing.

6/20/17: Version 1.0.0.2 - Fixed errors causing modified STBLs to crash the game and garbled display of strings in the tool after modification.

Download - please read all instructions before downloading any files!

Offline Sims - adult mods for Sims 3 and Sims 4

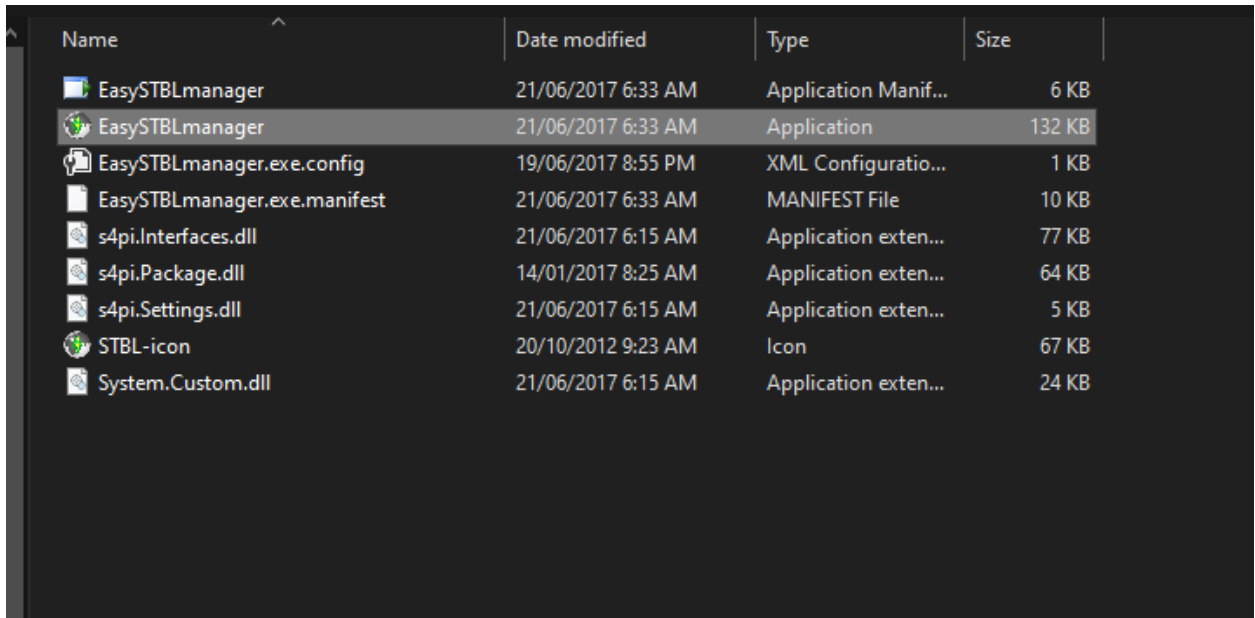

- Download the Easy STBL Manager
<https://modthesims.info/showthread.php?t=596197>

STEP TWO

- Extract the Easy STBL Manager folder to your desktop and open it

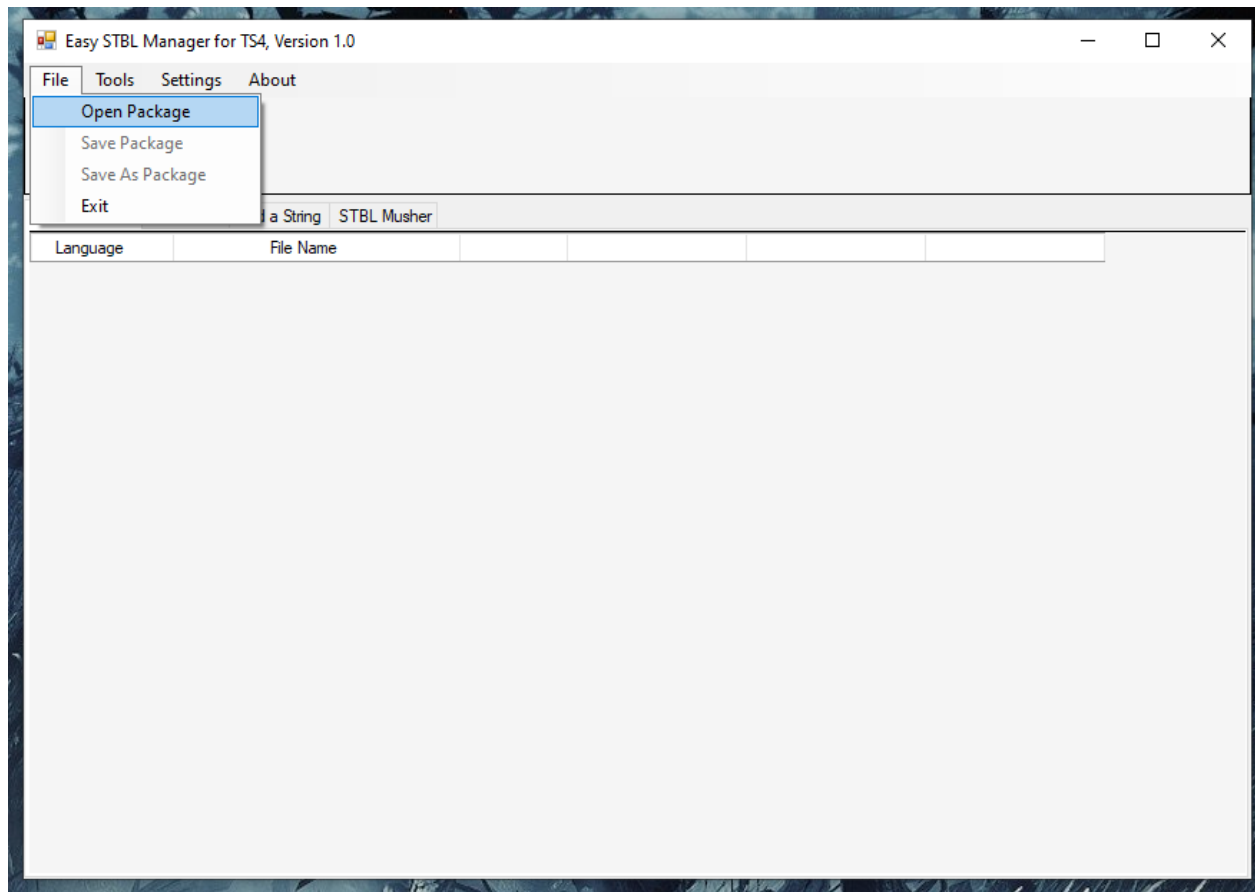

STEP THREE

Name	Date modified	Type	Size
EasySTBLmanager	21/06/2017 6:33 AM	Application Manif...	6 KB
EasySTBLmanager	21/06/2017 6:33 AM	Application	132 KB
EasySTBLmanager.exe.config	19/06/2017 8:55 PM	XML Configuratio...	1 KB
EasySTBLmanager.exe.manifest	21/06/2017 6:33 AM	MANIFEST File	10 KB
s4pi.Interfaces.dll	21/06/2017 6:15 AM	Application exten...	77 KB
s4pi.Package.dll	14/01/2017 8:25 AM	Application exten...	64 KB
s4pi.Settings.dll	21/06/2017 6:15 AM	Application exten...	5 KB
STBL-icon	20/10/2012 9:23 AM	Icon	67 KB
System.Custom.dll	21/06/2017 6:15 AM	Application exten...	24 KB

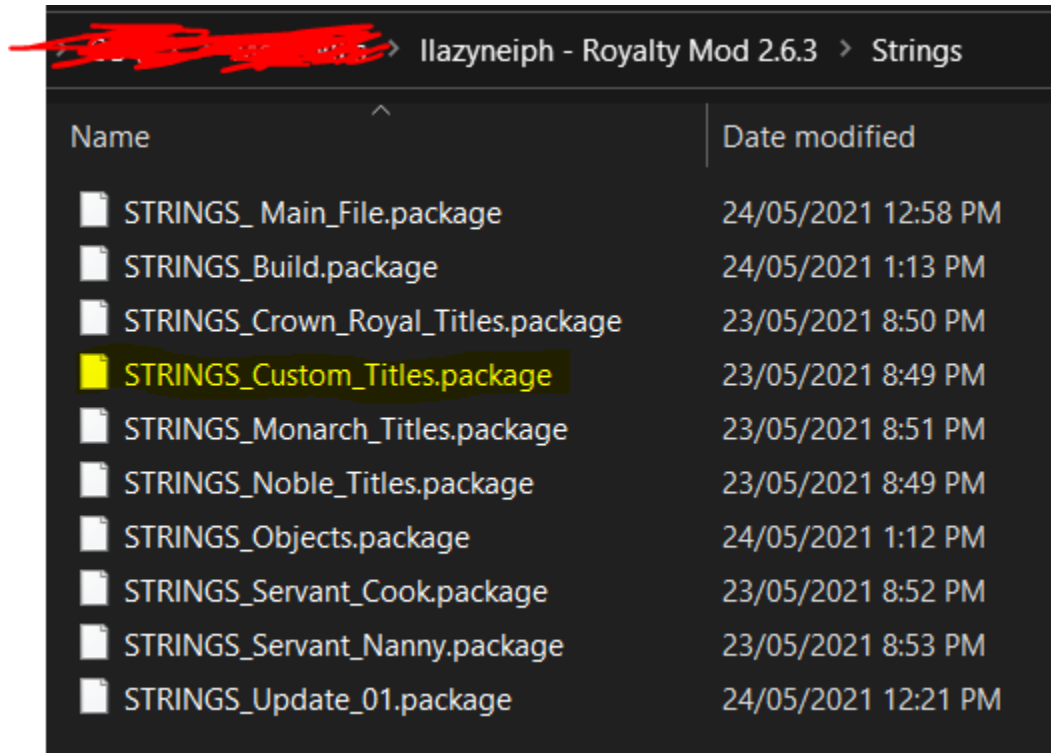

- Open up the program highlighted in the picture, the application.

STEP FOUR

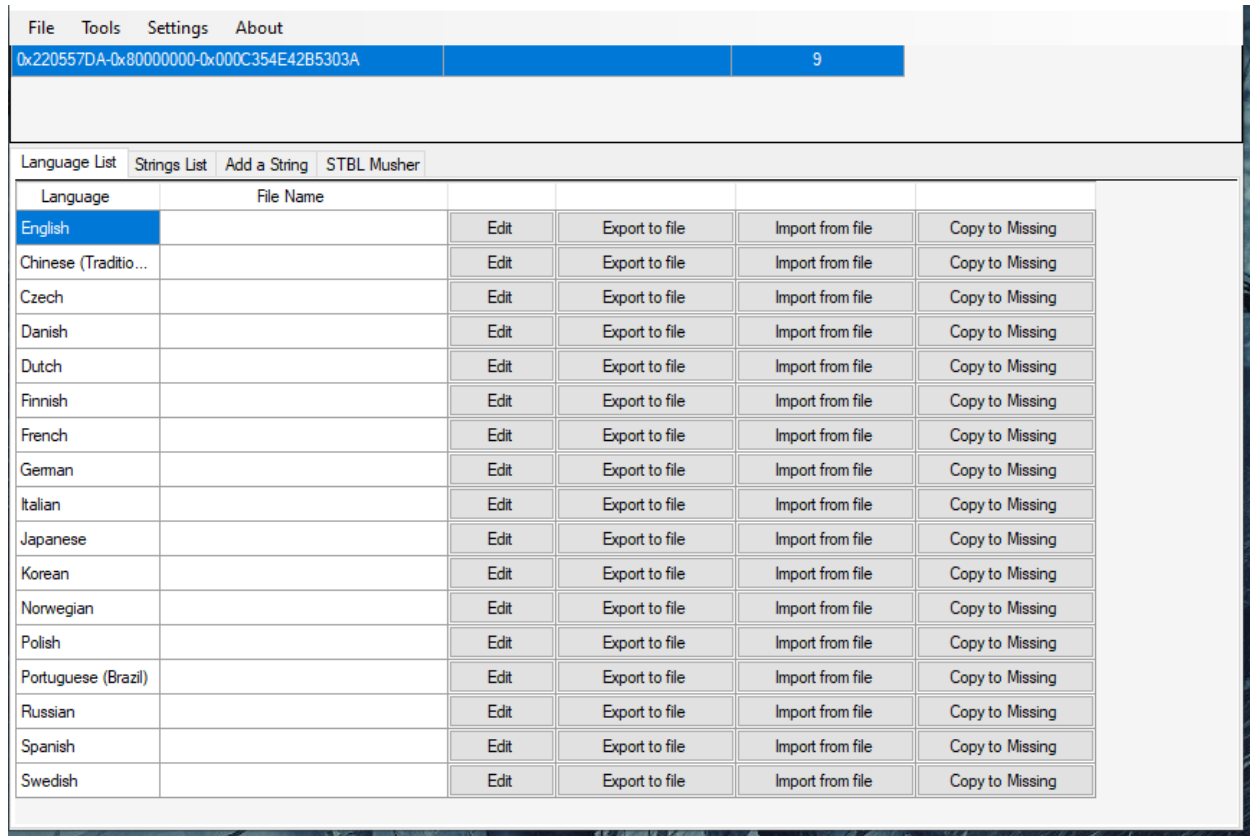

- Navigate to File and click 'Open Package'

STEP FIVE

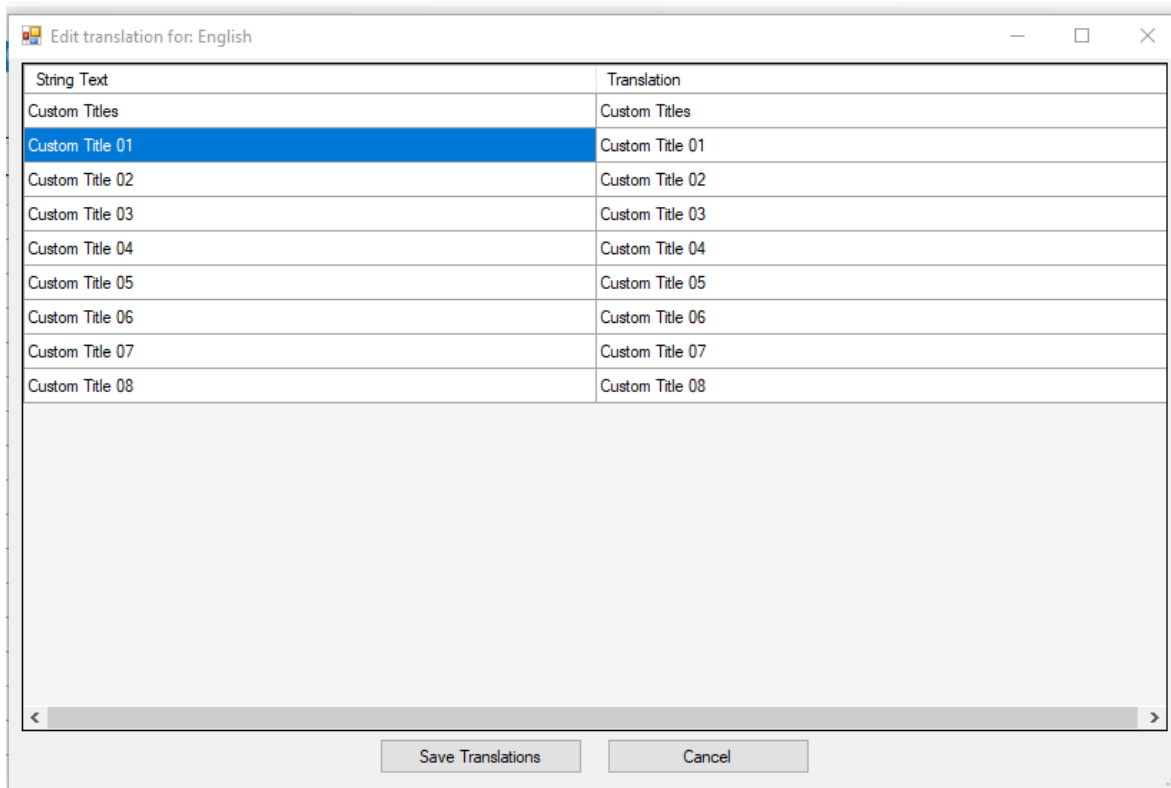

- Navigate to where your Royalty Mod folder is, in your Mods folder.
- Open the 'Strings' Folder. Inside this, choose 'STRINGS_Custom_Titles.package'

STEP SIX

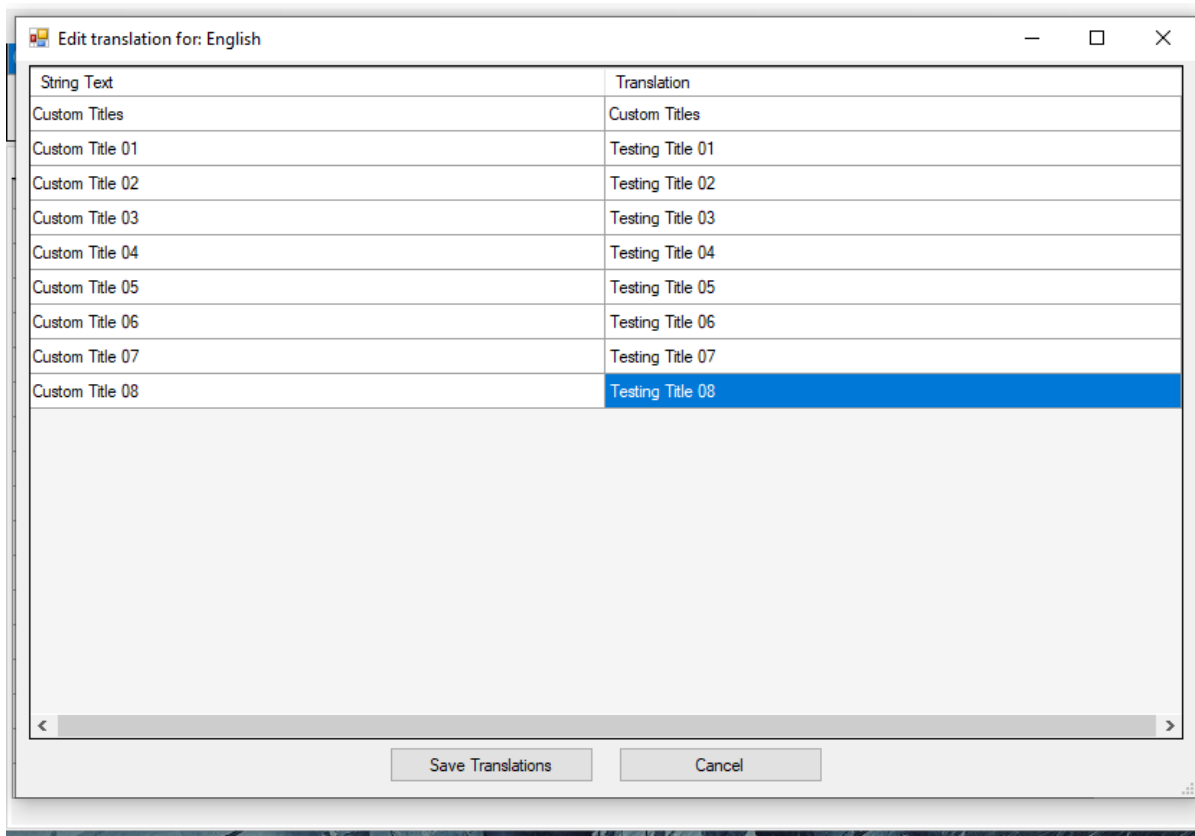

- The file will open and look like this.
- Find the language your game is in, for example, my game is in English so I would choose English.
- Once you have found your language, click 'Edit'.

STEP SEVEN

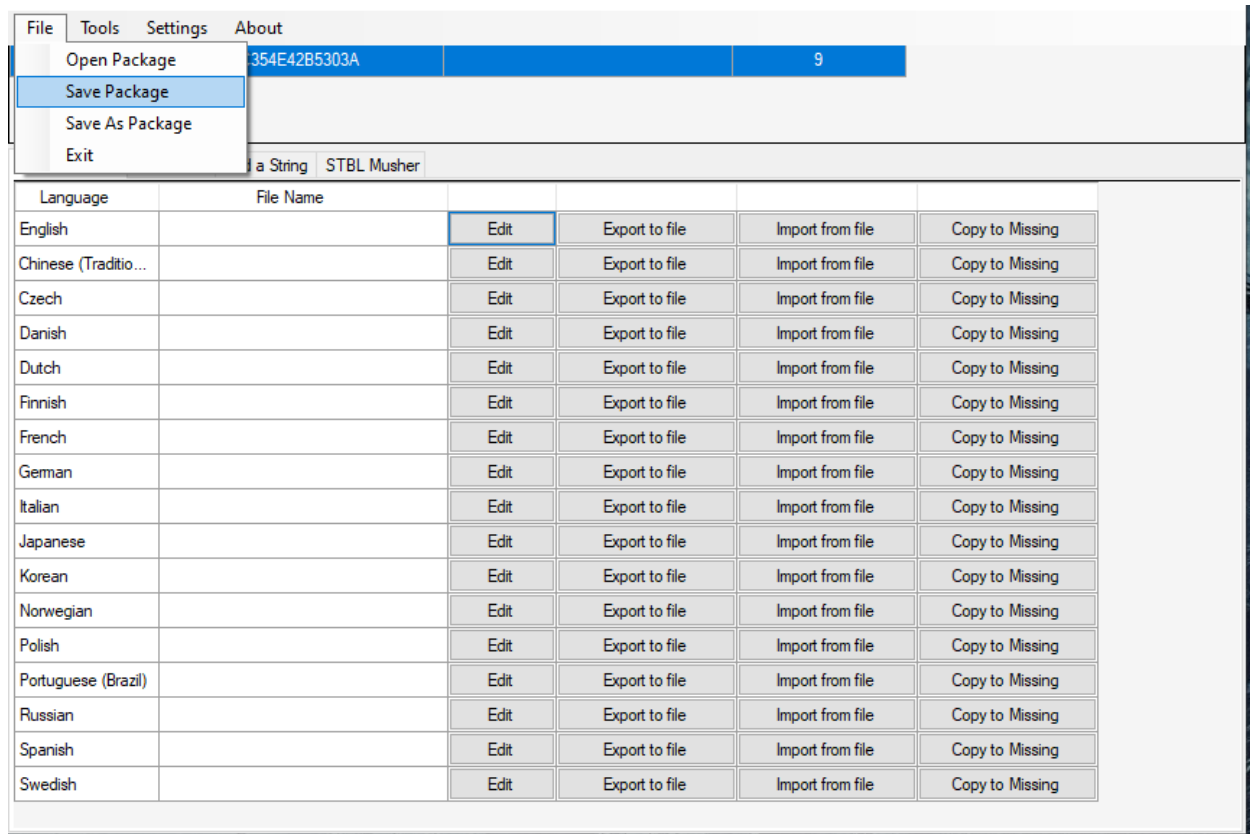

- The column on the left is what the text is currently in-game, and the column on the right is where you type your new title.
- ***Please keep in mind that the very top option called 'Custom Titles' is the pie menu text, DO NOT CHANGE THIS!***

STEP EIGHT

- As you can see here, I've changed my right column to say 'Testing Title' in-game.
- Once you have finished typing in your new titles, click '**Save Translations**'

STEP NINE

- Finally, go back to 'File' and click '**Save Package**'
- **Make sure to close Easy STBL Manager before starting your game**

STEP TEN

- Go in game and check out your new titles!
