

READING – *College Interview*

One morning last week, Emily got ready for her college interview. She put on her favorite blouse and jeans. Emily had applied to the university a few months ago, and now it was time for her interview.

When Emily arrived at the college campus, she felt excited and a little nervous. She had already researched the college and practiced her answers to common interview questions.

In the interview room, Emily met with the admissions officer. The officer asked her some questions.

"Have you visited our campus before?" the officer asked.

"Yes, I visited your campus last month. I really liked the atmosphere," Emily replied.

"What extracurricular activities have you been involved in?" the officer asked.

"I have been involved in volunteering at a local animal shelter and playing on my school's soccer team," Emily answered.

The officer continued, "Did you face any challenges in high school, and how did you overcome them?"

"I've faced several challenges, especially in balancing schoolwork with my extracurricular activities. However, I have managed my time effectively and asked for help from teachers when needed," Emily explained.

After the interview, Emily was happy. Her first college interview went great! Now, all she has to do is wait to hear back from the admissions office.
