UC and CSU Application Coursework Guidance

Please follow the guidance below based on where you are in the application process. Our recommendation is to enter courses and grades manually and carefully review all academic information before submitting.

1. If you have not yet entered your courses

Enter courses and grades manually on both the UC and CSU applications. Do not select the option to import your course data or transcript from CaliforniaColleges.edu (CCGI).

Our district is continuing to work with CCGI to make sure our data uploads correctly. Importing can result in confusing school and term information. Use your transcript to enter completed courses and grades, and your Senior year classes that are in progress and planned for spring.

2. If you imported courses but have not submitted

Our recommendation is to delete the senior-year courses listed under the yearlong term type and re-enter them under the semester term type to reflect Rocklin/Whitney High School's semester schedule. You will also need to make sure that the dates you attended Rocklin/Whitney High School reflect your Senior year (2026/2027)

For courses that span both semesters, enter the appropriate grade or status for each semester. Government and Economics should each be entered as a one-semester course in the semester you are taking them.

Review all imported courses and grades, including A-G subject matching, for accuracy. Make sure no courses are missing or duplicated and that in-progress and planned courses for Senior year are entered correctly.

3. If you submitted your CSU or UC application with imported courses and grades

CCGI has indicated that having Rocklin High School/Whitney High Schooll appear in two entries with different term types, semester and yearlong, is an accurate result of how the imported data is organized.

If all courses, grades, and A-G subject categories were reported correctly, the two school entries alone do not mean your coursework is incorrect. Based on CCGI's guidance, you do not need to take corrective action solely because your school appears under two term types.

If you believe a course or grade is missing or incorrect, contact the campus you submitted your application to. Specify whether the issue is on your UC application, CSU application, or both.

Need help? If you have questions or run into challenges at any stage, reach out to Mrs. Lund/ Ms. Bonnell or your counselor. If you have not submitted, resolve any questions before submitting.
