

# Climate Change Consequences

Explore	Your Task
<div>★ <a href="#">Sea Level</a></div> <div>“The rise in global temperatures affects sea levels in two ways. First, the water from melting glaciers and ice sheets on land adds to the total volume of ocean water. Second, as the water of the oceans becomes warmer, it expands (Module 64).”</div> <div>★ Hurricanes<ul style="list-style-type: none"><li>- <a href="#">Video 1</a></li><li>- <a href="#">Video 2</a></li></ul></div> <div>★ Tornadoes<ul style="list-style-type: none"><li>- <a href="#">Article 1</a></li><li>- <a href="#">Article 2</a></li></ul></div> <div>★ Droughts</div> <div></div> <div>★ Wildfires<ul style="list-style-type: none"><li>- <a href="#">Article 1</a></li><li>- <a href="#">Article 2</a></li></ul></div> <div>★ Mosquitoes</div>	<div>★ What do these images show you about sea level climate consequences?</div> <div></div> <div>★ What are the most important takeaways from these videos?</div> <div></div> <div>★ Thoughts on these articles about how tornadoes are being affected from climate change.</div> <div></div> <div>★ What do you think the effect that climate change has on droughts? What effects do droughts have on the environment?</div> <div></div> <div>★ Annotate your understanding of these articles below and compare your learning.</div> <div></div> <div>★ Annotate your understanding of these articles below and compare your learning.</div> <div></div>
