Phone: +1 669 900 6833 or +1 408 638 0968 or +1 646 876 9923

Meeting ID: 183 382 852 (password required)

Operations Meeting September 18, 2026

Attendees: Jeff D, John, Ashton, Huijun, Brian L

Apologies:

Fires

- OSDF Caches - Fabio is investigating “too many files” issue
 - Should be solved, the ones we run are already upgraded, Fabio is reaching out to sites to also upgrade

Announcements

- Jeff D is on Freshdesk triage next week, Fabio is up the following week

Nebraska (Derek, John, Huijun, Ashton)

- **GRACC**
 - Monitoring of the new message bus
 - Derek will send huijun the monitoring username / password and URL
 - Upgraded to latest Grafana
- **OASIS**
 - Affected by Lincoln datacenter outage/move. Will be back ASAP.
 - hcc-oasis, hcc-oasis-itb, hcc-oasis-login, hcc-oasis-login-itb, and hcc-cvmfs-repo
- **OSG Status Page (<https://status.osg-htc.org/>)**
 -
- **Check_MK - Alerting**
 - hcc-osgmon.unl.edu is new host, OSG DNS to be updated shortly
 - Look into upgrading check_mk
 - Tied in with UNL monitoring, will need to coordinate.
 - Remove from check_mk,
 - systemd: cvmfs-data-update@ligo.osgstorage.org.service
 - systemd: cvmfs-data-update@stash.osgstorage.org.service
 -
- **CVMFS origin**
 - cvmfs-sync pull request to transfer xrootd scanning from xrootd protocol to HTTPs
- **XRootD monitoring collector**

- Adding filters in the release
- **CVMFS Singularity sync**
 -
- **Provisioner updates**
 - Added OSG 25 worker node to the NRP provisioner
 - Ashton working with IGWN to get better gpu usage (currently just busy / claimed by local users)

Madison (Brian Lin)

- OSG 26 delayed to Oct
- Getting close to prod on Hosted CE Yubikey service: I spitball'ed that we could have all Hosted CEs moved over by Feb/Mar 2027
- Tiger networking
 - Eliminating non-VLAN5 services is basically done. I think XRootD shoveler and maybe a few other items are still using the `default` IP address pool
 - We're working on getting a `/26` specifically for static IP assignments (i.e., separate metallb pool)

Collaborations (Jason)

- VIRGO VOMs is going away, Mary (NIKHEF) will be coordinating a plan to get ARC based sites moved to scitokens
- JLab may be a good candidate to migrate to 3.11 FE

Michigan (Shawn)

- Waiting to renew the data to transport to Opensearch and FNAL tape

UCSD (Jeff, Fabio)

OSDF:

-

Hosted CEs

- Discovered bug in ARM based Hosted CE (condor 25.14.0), Jaime is investigating
- Ashton is working with Tim C investigating Hosted CE sites with issues
- Migrating glidein shape configs out of factory and into Hosted CEs, completed all we can except one entry that is both "whole node" and "gpu" - unexpected behavior observed, reported to GWMS
- Tempest to Tiger CE migration:

- Completed all but UMT-Hellgate, working with site to get ssh to headnode working from tiger IP space

GWMS Factory

- Jeff D working with Steve Timm / DUNE and Mary Hester / IGWN to get scitokens working for European ARC CEs

AOB

-
