

# Wyoming College: Adult Education Program

November 8, 2022

This book is our tool to review the progress students within our program are making individually and collectively and to plan how we might facilitate even greater learning. This book looks at three areas: attendance, level completion, and transitions. At the end of each section, we include observations and plans for change. At the end of the book, there is a summary of our plans and how we plan to assess those changes when we update this book six months from now.

Attendance & Gains

4

Transitions.....9

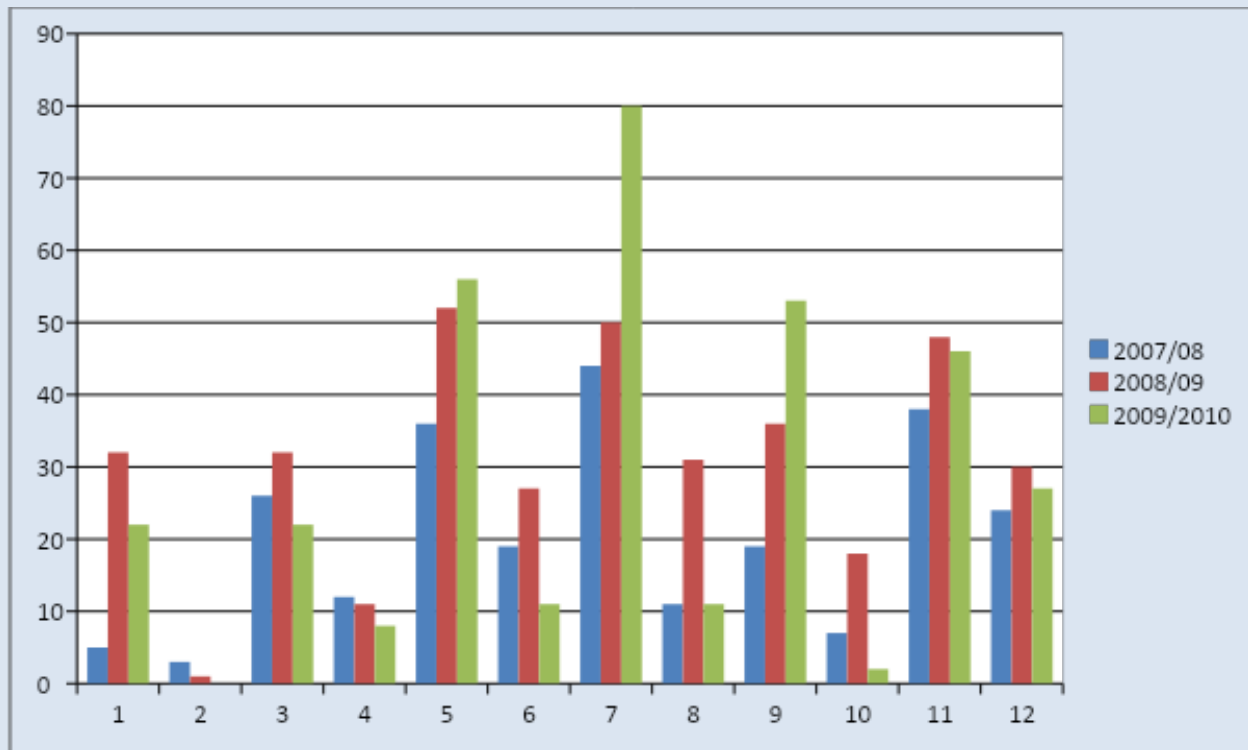

# Attendance & Gains

# Attendance & Gains

*(Subtitles will change based upon the questions local programs identify)*

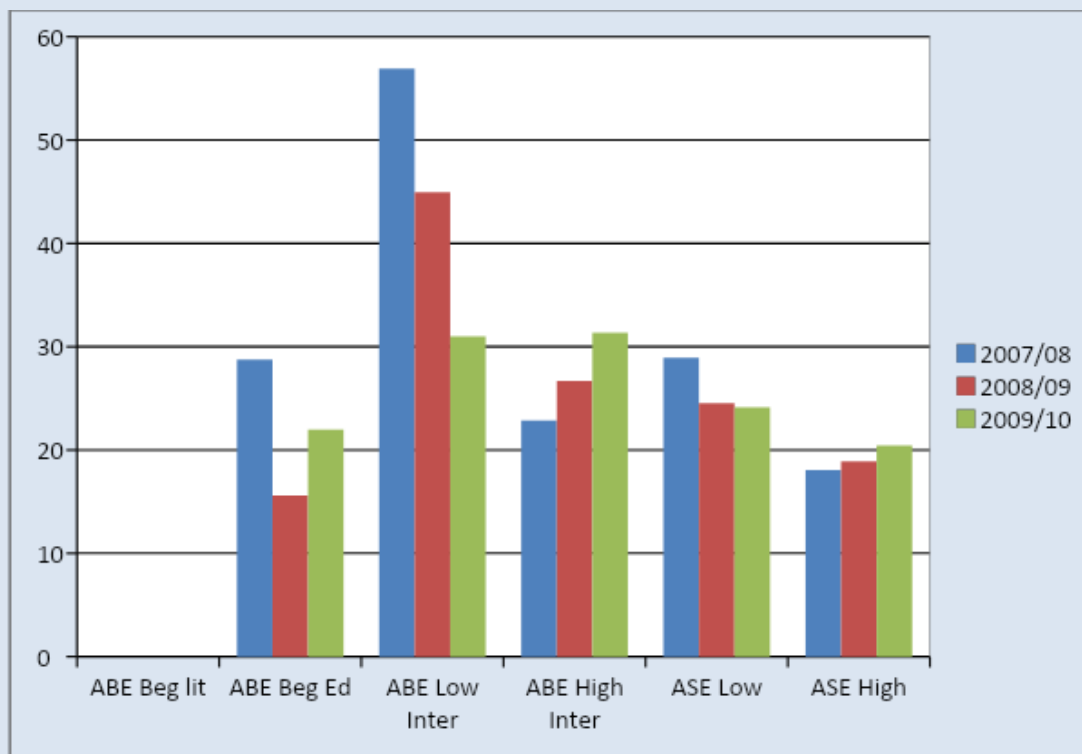

**How many students are enrolled at each ABE/ASE level and how many are being post tested?**

*(Write the question you wanted to answer as you began your data dive. The NRS data dive toolkit, found at: <https://communitycolleges.wy.edu/adult-education/directors/#forms>, has many questions and charts that providers may find useful.)*

**What is the average number of contact hours that HiSET completers are requiring at each level?**

*(Write your secondary question)*

These graphs show that.....

(Using bullet points, list the highlights identified in the graphs)

Next steps include...

(What steps will the program take next to improve/modify/correct the items identified on the previous page?)

# Attendance & Gain (Change title as appropriate) Summary and Plan for Changes

[Summarize observations and develop plans for what the local program will change and what results the local program expects to see as a result]

Summary of Observations on Attendance & Gain

Plans for What We'll Explore Changing as a Result

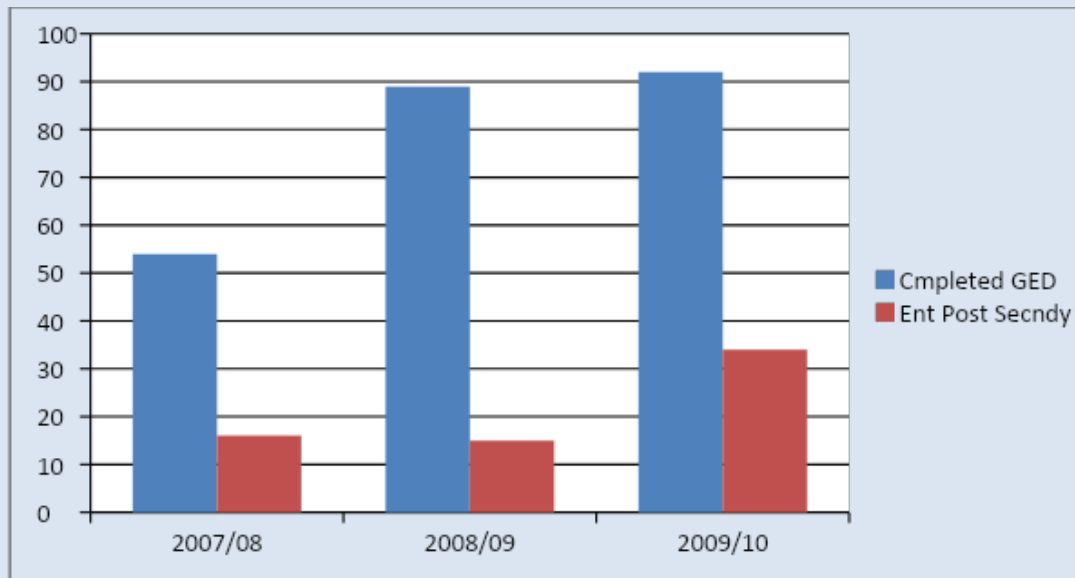

What Results We Expect to See and When and How We Will Check

# Transitions

(Use this section if the local program had additional questions they researched as part of a data dive)

## How many completers are entering post-secondary at Wyoming College?

(Identify the question)

This graph shows that.....

Next steps include...

# Outcomes Summary and Plan for Changes

[Summarize observations and develop plans for what the local program will change and what results the local program expects to see as a result]

Summary of Observations on Outcomes

Plans for What We'll Explore Changing as a Result

What Results We Expect to See and When and How We Will Check
