

Now that you have learned most of the main coding commands in scratch you will get a chance to create a project of your own. This should be the most complicated project you have done so far. It should showcase old skills that we have learned as well as new skills that you put into this project.

Here are some new ideas you might want to include into your project:

- [A high score board](#)
- Jumping characters
- [A side scrolling game.](#)
- [webcam interface](#)
- [Remake a classic game like super mario bros.](#)
