How to Use This Template [Start Here]

Note: This is a view only file. Please go to File -> "Make a Copy" or "Download" to get a copy. Edit access requests will be ignored.

Delete the template instructions and start writing. Sample sections are suggested below but feel free to make your own. Please use Heading 2 style to separate your chapter into smaller segments.

Tips:

- No fancy formatting. Please keep it to the basics of headlines, bullet points, bolding, etc. See previous editions for formatting examples.
- Please submit in Word or Google Doc format.
- Your chapter is NOT a sales letter for your services, courses, conferences, etc. One of the goals of this book is to connect people to do deals together but please do that by providing value and your personal strategy.
- There is no minimum or maximum length.
- Anonymity is allowed, but my preference is to avoid it. Regardless, I'd rather have your chapter than not have it. A first name is required, but I would prefer to have at least your full name and email.
- Include a short bio that is 1-3 sentences with contact details. My plan is to start off each chapter with your short bio so readers know who you are. Here's mine for example:
