

Visions is excited to offer **FREE virtual classes** for our Home School students and parents who would like some extra support to review key Math and Language Arts concepts.

Student Classes

English and Math Teachers on Special Assignment (TOSAs) will meet with students on the computer using Zoom in six, 45 minute classes designed to help develop critical thinking skills and increase content knowledge. Grades 3-8: Register by 2/14 to receive FREE iReady student and parent workbooks that support the course content.

Parent Classes

English and Math Teachers on Special Assignment (TOSAs) will meet with parents on the computer using Zoom for one hour to provide strategies for teaching important concepts in English and Math as well as alleviating test anxiety for students.

Student Classes

What's covered in the online classes for students?

Math

- Review essential math skills used in performance tasks.
- Students will practice with a performance task first analyzing what the task is asking, then completing the task and evaluating their work.
- Students will use the iReady SBAC workbook for hands-on practice.

English

- Review essential English Language Arts skills including comprehension, inference, and informational writing.
- Practice test-taking strategies and explore [Writable](#) for online writing practice.
- Students will use the iReady SBAC workbook for hands-on practice.

Parent Classes

Learn how to teach your student important concepts in English and Math:

- Learn methods for teaching essential English and Math skills to your student.
- English topics include reading comprehension, inference, and teaching various writing styles, including potential resources you can use to get started right away.
- Math topics include implementing math performance tasks to encourage critical thinking skills as well as other math teaching strategies for you to use with your student.
- You will also learn methods for using the CAASPP Practice tests with your student including test taking strategies and other potential test prep resources.
- Strategies to support students with test anxiety.
