

### **Rudolph B. Goode**

Way down at the North Pole  
There was a little deer  
He had a lot of spirit and a lot of cheer  
Every single day he lived to jump and run  
He could finish a job like he had just begun  
You never ever seen a little deer like him  
And he could fly outa sight like he was out on a whim

#### Chorus

He had a ruby nose that shone through the night  
He used it in the air when he was flying right  
He guided Santa's reindeer out in front of the sleigh  
He did his job the best he took em all the way  
So if you look into the sky on Christmas night  
You'll see Rudolph running with his nose so bright

#### Chorus

Now Santa and Rudolph are back at the Pole  
They're jamming to the sound of rock and roll  
They delivered all the presents last Christmas night  
Now they're Partying hard till next year's flight  
So you better be good and you better not sun  
Cause Rudolph is making his rounds again

#### Chorus

You better be good!
