My name is Yue Yun. I am the financial and community networker. It has been a real pleasure working for FACTSnet. As a francophone, a Quebecer, a student and an intern, I have learnt a lot. This summer opportunity gives me the chance to testify the situation of disadvantaged groups In Edmonton and the possibility to contribute from case to case.

Since the midterm, my role has shifted a lot. I have been working on the blog and the spreadsheet. Laura has been a great partner for me. In beginning of the summer, till the midterm, I was quite focus on the internal administration. My main tasks are blog editing and financial calculation. As for blog editing, sometime, it is difficult to communicate the tasks by mails. I am glad that we went through.

By the end of the summer, I have been more in touch with the francophone community. We look forward to build a network for exchange organizations. I think that it will be useful for many others students as me. Now, I have transferred my work and contacts to Elisia and Laura.

Thanks to David and Carole for a great summer.
