Stream 1A - 2.5% Fee on Matching Pool

Size of matching pools seasonally -

<https://docs.google.com/spreadsheets/d/1H26bs-8T9kHhDAh6qVfxlJSgeuNKi9emiO6rCAg3MPE/edit?usp=sharing>

Stream 1B - store funds in vault and take yields

Provide protocol for free but generate revenue

Stream 2 - Curation: GTC staking to increase discoverability

A) Stake on profiles - trust in a user group
X GTC staked on you to be accepted in a pool
Filter/ Donate to projects with higher GTC staked
Vetting grantees is the hardest problem
50 - 100 grants sort by GTC staked to find higher trust ones

Metarounds (donate to causes vs. projects)
How much is in each pools matching funds (e.g., climate, open source)
Rather than we decide rounds in program. Program is one round where recipients are pools that apply to receive funding. Want X pool to have more money.

- Need to stake to vote or how much you stake impacts your voting power
- Pre stake to have pools I care about show up higher in the ranking or sort in the grid style layout

B) Stake on pools
Ranking to see what are the best pools to apply to or be a part of
Or stake to set up own token as staking

Stream 3- Grant Scouting

Tastemakers to understand a category
Help pools funnel projects by staking on them
Take % of funds that flow through that

Nate to send final version of Dao wide Allo budget (3 year)
