

Google Alerts

[Tutorial](#)

Set up a Google Alert for three separate topics that will be helpful to you. (12 points)

Apply Your Skills!

To earn additional points, you can propose a way to use this platform to help the community. Community can be defined as anywhere outside the four walls of this classroom. Your project proposal must include the following:

1. Why this platform is right for the task.
2. It meets a need for the community.
3. It is shared beyond our school.
4. Collaboration is evident.

Please schedule a conference with Mrs. Murat to discuss your project idea and your proposed assessment rubric. (Both of which you are designing). Your project can be worth up to 30 points and can be completed once you have showed you have mastered the platform. An approved rubric is worth an additional 10 points.

You can earn additional points by

1. Creating a meme that is school appropriate and on topic using the rubric in Schoology.
2. Creating an anchor chart for our room using the rubric in Schoology.
3. Create a teacher resource about alerts or in alerts using the rubric in Schoology.

You can earn up to 10 points (5 points a piece) if you teach Mrs. Murat something about this platform!
