

OneHacks III Rules:

Participant Eligibility:

- Must be a high school student (grades 9-12, including incoming 9th graders)
- Must have registered through the Typeform and Devpost prior to the event

Guidelines:

- No non-original work can be submitted to OneHacks
 - Others will be disqualified
 - Projects
 - Only original projects are accepted
- Submission will be a 3-5 minute video, as well as a GitHub link with your project code
 - Submit video link (YouTube, Vimeo, etc) to Devpost
 - Explain project and idea in the video
 - Short timelapse featuring your work progress (proof of original work and non-AI generated content)
 - Upload your code to GitHub
 - Demo your project
- Refer to our [Integrity Policy](#) for more details

***Usage of ChatGPT to create project will result in an automatic disqualification and forfeiture of any prizes**

General Rules:

- Treat all of your fellow competitors with respect and integrity
 - Do not attempt to cheat or steal other's projects in any way
- Build project within this time frame
 - You can use previous functions, but don't copy completely from previous projects
 - Do your best to create a new original project
 - Cross-posting is allowed **only** if project is started within OneHacks
