

Department of Physics

Induction Program

An induction program in degree colleges is a vital initiation for new students, providing them with essential information about the college, its facilities, and academic expectations. This orientation typically includes introductions to faculty, an overview of the curriculum, and guidance on campus resources. The program aims to help students acclimate to their new academic environment, fostering a sense of belonging and reducing initial challenges. Through interactive sessions and campus tours, students gain a comprehensive understanding of college life, setting the foundation for a successful and enriching academic journey.
