

Air Pod Case Sticker

Type of badge: Make

Materials: for this badge, what materials do the person need? List them out

- Computer
- Sticker Machine
- Heatgun

To indicate success... students will have created something unique, detailed, and visually appealing. They will show knowledge of the digital art software that they have chosen.

1 point- student created something very basic, showing little to no knowledge about the software.

2 points- student quickly learned about the software and used this knowledge to create something fairly unique with some detail.

3 points- student took time to learn and explore the software and used this knowledge to create something unique and detailed.

4 points- student thoroughly explored and played with the software in order to form deeper understanding and more

advanced skills. they used this knowledge to create something very unique and detailed, showing skill and familiarity with the software.

Project example:

Cover text:

First of all I found a template for Air Pod Stickers. Then I opened a new project in Canva, in which I made the design. My design is a brand called Goyard and I love their wallets and bags, so that was my inspiration. I added Pink Panther on the back to give it the final touch I thought it needed. Then I downloaded the design and opened Adobe, where I opened the Air Pod template and then my Canva design. Then I made sure it fitted how I wanted and then printed it as a vinyl sticker. Then make sure to use the heat gun to get rid of air bubbles.
