

2026 FALL ELECTION CANDIDATE INFORMATION SHEET

Please find the voter statement and platforms of all the candidates below. You can navigate using the table of contents. If you have questions regarding this document please email cro@skule.ca. Otherwise, contact the respective candidate for more information about their platform.

2026 FALL ELECTION CANDIDATE INFORMATION SHEET	1
At-Large Representative	4
Tristan Seto	5
Ammar Hasham	6
First Year Representative	7
Sarah Carter	7
Mashrur Mahtab	8
Jasmine Chen	9
Ege	10
Mina Soliman	11
Tony Zhou	12
Ashkon Aminzadeh	12
Jay	13
Mashrur Mahtab	13
Rodrigo Godoy Fonseca	14
Marium Ahmed	15
Industrial Engineering Representative	16
NAZ SARAL	16
Gabe Raposo	17
Francesca Mangano	18
MSE 4th Year Representative	19
Jasnoor Hazooria	19
MSE PEY Representative	20
Jason Chen	20
Chemical 1st Year Representative	20
Vanessa Lovino	20
YuYang Qin (Charley)	21
Chemical 2nd Year Representative	21
Johnny Dong	21
Can(John)	22
Civil 2nd Year Representative	22
Hugo Wang	22
Jiona Joy Moraleda	22
Duy Minh	23
ECE 1st Year Representative	23
Sophia Zhang	23
Yoshi Yamada	24
Marium Ahmed	25
ECE 3rd Year Representative	27
Abdullah Bin Rashid	27

ECE 4th Year Representative	28
Joe Dai	28
EngSci 1st Year Representative	28
Brianna Si	28
Bosen Song	29
Anna Wood	30
Yaarish Ali	31
Nitika Nitheeswaran	33
EngSci 2nd Year Representative	33
Alan (Yutong) Wang	33
Yang Wang	34
Hasnain Heryani	35
Miles Ehrlich	35
EngSci 3rd Year Representative	36
Yihan (Andy) Wen	36
EngSci 4th Year Representative	37
Andy Gong	37
Industrial 1st Year Representative	37
Jessica Xu	37
Hanzada Bahgat	38
Industrial PEY Representative	39
Renzo Ugarte	39
Mechanical 1st Year Representative	40
Enrui Zhang	40
Mechanical 2nd Year Representative	40
Arvyn Singh	40
Mineral 2nd Year Representative	42
Jimin So	42
MSE 1st Year Representative	43
Nathan Chen	43
MSE 2nd Year Representative	44
Tiago Loureiro	44
TrackOne 1st Year Representative	44
Ria Tayade	44
Mashrur Mahtab	45
Civil Club Vice Chair	47
Victoria Ferreira	47
ECE Club Finance officer	48
Parth Bhambi	48
EngSci Academic Officer	48
Nicholas Ali	48

Mech Club Chair	49
Akshat Gandhi	49
Mineral Club Vice President Academic	50
Frank Shu	50
Lucy Paventi	50
Fourth Year Representative	51
Grace Huang	51
Naz Saral	51
Keira Foti	52

At-Large Representative

Tristan Seto

Voter Statement:

Hi, I'm Tristan, ECE 2T6 + PEY, one of your At-Large candidates. As a super involved member of the Skule community through roles on EngSoc, I've seen what's worked well over the years and what work needs to be done to ensure EngSoc stays beneficial to you at all times.

As your External Relations Director, I am already dedicated to representing you and all of UofT EngSoc's voice externally, and promise to keep advocating for you and your best interests if I am elected internally as well.

Feel free to contact me at tristan.seto@mail.utoronto.ca.

Platform:

Hello! If you haven't met me yet, I'm Tristan, an ECE 2T6 + PEY, running to be one of your At-Large Representatives on the Board of Directors. I have spent the last four years as an active member of the Skule community, notably overseeing the production of the Skulebook, organizing the Hi-Skule Outreach team and events, as well as contributing to Skule in the form of EngStores marketing, the inaugural Iron Pin Ceremony and year-round Skule Photography. This year, notably, I am already your External Relations Director, a role that has helped me further understand how to be the best representative for a large group of students, including you!

As External Relations Director for EngSoc, I already:

- speak at the Board of Directors to deliver all external updates
- advocate for you as an engineering student on the provincial and national level
- interact with the officers and various project directors frequently
- am on the lookout for ways to improve your student experience and help you connect with various external parties

If elected to the Board of Directors, I will:

- ensure transparency of EngSoc's operations and decisions, so you can always see what's going on and what's being done to enhance your student experience
- continue to listen and participate in discussions at the Board, voting on issues in your and your peers' best interests
- help you bring your concerns to the forefront of EngSoc, facilitating communication and procedures for the average student
- be available and accountable for you to ask any questions or express concerns about the inner workings of EngSoc

Thank you for considering me. I hope you can trust in me to be the best representative for you and your interests at the Engineering Society and beyond.

Feel free to contact me anytime by e-mail at tristan.seto@mail.utoronto.ca, on Discord @plannine, or on Instagram @trittane.

Ammar Hasham

Voter Statement:

Hey everyone!

As someone who's been involved in the Engineering Society since my days as First Year Chair, I want to help improve the Skule™ experience for everybody. As your At Large representative on the Board of Directors, I will speak for the student body and help make EngSoc work for you!

I may be stupid, but

Well anyway I don't want to write more so that's all folks!

Feel free to reach me at ammar.hasham@mail.utoronto.ca if you have any questions about me or what I plan to do as YOUR at-large BoD member

Platform:

Hey everyone!

As someone who's been involved in the Engineering Society since my days as First Year Chair, I want to help improve the Skule™ experience for everybody. As your At-Large representative on the Board of Directors, I will speak for the student body and help make EngSoc work for you!

I have a lot of experience within the Engineering Society and thus, I can make informed choices that best benefit you.

Within the Student Life portfolio I have been First Year Chair, where I hosted various social events and helped promote Skule culture, helping get more first years involved into the engineering and giving out lots of food in the process.

Within the President's portfolio, I am currently Equity and Inclusivity Director, where I work with faculty and other student groups to ensure that our policies and practices are fair for all students.

Within the Academic portfolio, I am a member of the Academic Advisory Committee (AAC), Faculty Council Standing Committees (FCSC), and IDEA (Inclusivity, Diversity, and Equity Advisory Committee).

With all of these experiences, I have a lot of insight into the Engineering Society and thus you can be assured I will vote on matters with a comprehensive view on matters and always in your best interests.

Whether it's a monthly board of directors meeting or a hiring committee for your next project directors, I will be there and voting in your best interests.

Well anyway I don't want to write more so that's all folks, now you can have a rant about why

YOU, yes you reading this should be more involved in the Engineering Society.

WHY YOU SHOULD JOIN THE ENGINEERING SOCIETY

The Engineering Society is responsible for a lot of different aspects of student life. From design teams to academics, the Society does a lot to improve the student experience. As such, it is essential that the Society is comprised of well informed members who are able to use their unique experiences and background to create a diverse government that can best represent the student population.

Thus, it is important that people from all different backgrounds and walks of life involve themselves in student government. While people may look at the EngSoc octopus and see it as unnecessary, it's to ensure that the Society serves the students and always will. However, that's only as strong as the students on it.

You're already deep into this platform statement from yet another candidate so I assume you are either involved in Engineering Society or are interested, so might as well give it a try if you aren't already.

Everyone has something valuable to say and bring to the table, and thus everyone should consider joining EngSoc in some way, shape, or form.

"But Ammar, it is too late to candidate myself"

Well it may be too late to run in this election cycle, there will always be future election cycles and there's so many roles. You don't have to be the president, you can just care

First Year Representative

Sarah Carter

Voter Statement:

Hi, my name is Sarah Carter and I am running for First Year Representative for the Board of Directors! As an international MechE student, I bring multiple perspectives and insights to the Engineering Society. In high school, I was in leadership roles in student government and as stage manager which taught me how to create community and listen to everyone's opinions. I am committed to being proactive by asking direct questions and exploring solutions to challenges in service to the first year class. Follow me on instagram @sarelicar24 and DM me with any questions you have!

Platform:

Hi, my name is Sarah Carter and I am running for First Year Representative for the Board of Directors! As an international MechE student, I bring multiple perspectives and insights to the Engineering Society. In high school, I was in leadership roles in student government and as stage

manager which taught me how to create community and listen to everyone's opinions. These roles also taught me how to be perceptive of the needs and wants in the community. I am committed to being proactive by asking direct questions and exploring solutions to challenges in service to the first year class. Follow me on instagram @sarelicar24 and DM me with any questions you have!

Mashrur Mahtab

Voter Statement:

Hellooo everyone, I'm Mashrur, and I'm running to be your First Year Representative!

More than just another candidate, I want to be your friend! Someone you can comfortably reach out to and crash out over classes with. Someone who brings your concerns to Board discussions and ensures your voice is heard. Having led clubs and served on student governments, I know representation takes listening, and I have what it takes to deliver. I'm not looking to reinvent the wheel, but I plan to make sure it keeps moving better than ever.

Together, let's make sure first-years stay represented!

Insta: mashrur_mahtabs

Platform:

Hellooo everyone, I'm Mashrur, and I'm running to be your First Year Representative on the EngSoc Board of Directors!

More than just another candidate, I want to be your friend! Someone you can comfortably reach out to and crash out over classes with, and who brings your concerns to Board discussions and ensures your voice is heard.

If elected, I'll do the work that actually comes with the position. I'll show up to Board meetings, read everything beforehand, and ask questions when something doesn't make sense. When it comes to voting, I'll think about how the decision affects students and cast my vote carefully. I'll also make sure EngSoc's leaders follow through on what they promise. Most importantly, I won't disappear after the election. I'll stay easy to reach, listen to your concerns, and always be your friend.

I've also had extensive experience with clubs and student government throughout high school (both good and bad). I served as president of multiple clubs and member of my school's student council. These roles taught me how to navigate the processes behind student leadership. I've also experienced what happens when student leaders become distant, and I know how frustrating it feels when your concerns are dismissed or forgotten. Because of this, I also know what mistakes to avoid. I hope not just to be a class representative, but a friend first who genuinely listens and follows through on his words.

I have experience managing large sums of money, allocating budgets, and handling organisational finances. Additionally, I'm used to dealing with lengthy documents and bureaucracy. I've read

bylaws, drafted complicated paperwork, and kept it all organised. I also know how messy student government can get. Getting something done often means working through several steps, following up repeatedly, and staying patient when things move slowly. I've dealt with that before, and I'm willing to put in that work again. So while I'll still have things to learn about EngSoc, I won't be starting from scratch. I can bring that experience to the Board and get to work quickly.

I've already started taking initiative without waiting to be elected. When a few classmates raised concerns about our MAT188 lecture room, I gathered their feedback and emailed our professor and first-year advisor to ask for a room change. While this was an academic issue, I believe it shows my commitment and dedication to improving the student experience. I'm willing to put in the work to improve my peers' experience, and I hope you'll trust me to bring that same energy and dedication to representing first-years on the Board.

I'm not looking to reinvent the wheel, but I plan to make sure it keeps moving better than ever. I'll do that by listening to my peers, showing up prepared, and following through on my responsibilities. We may be new to U of T, but our voices still deserve to be heard in every decision that affects us.

So together, let's make sure first-years stay represented!

Jasmine Chen

Voter Statement:

Hi! I'm Jasmine, and I'm running for First Year Representative! Some of my interests include badminton and photography. This led me to become captain of my school's badminton team and yearbook editor-in-chief in my senior year. During that time, I was also secretary for the student council. Through these experiences, I learned a lot about what a successful student government requires. As your First Year Representative, my priorities would be to represent all first years at EngSoc board meetings and to keep you informed about important information that comes up, so you can focus on schoolwork and enjoying university life :)

Platform:

Hello! My name is Jasmine, and I'm running to be one of your First Year Representatives! I was born in Fuzhou, China, but I've spent the last 14 years of my life growing up in Toronto. After going to a public high school in this city, I'm now studying Engineering Science at UofT. Before you vote this week, read a little about me and why I might be qualified to be a First Year Rep :)

Some facts about me: Playing sports is one of my many interests. Some of my favourite sports include badminton, frisbee, and snowboarding. In fact, I've worked as a snowboard instructor for the last three years at Mount St. Louis Moonstone (only 1.5 hours away from Toronto, if anyone is interested in visiting...). In addition to sports, I also dabble in the arts, like playing the piano and violin, or taking scenic photos whenever I go hiking. When I'm free, I spend time watching movies and TV shows as well. My favourite movie that I've watched this year is probably Project Hail Mary, and I highly recommend it to anyone who hasn't watched it yet! Another hobby that I'm not so proud of is playing video games (mainly Valorant), where my rank peaked in

Ascendant 2 a little over two years ago.

Throughout high school, I took on many leadership roles, such as captain of the varsity badminton team, yearbook editor-in-chief, and executive of the DECA chapter. I also participated in student government, where I was the secretary for my school's student leadership council. These experiences taught me a lot about what a successful student government requires. If I were to be elected as First Year Rep, I would be committed to representing all first years by reaching out and asking for your feedback over the school year! I also believe it's important to stay updated about any important information regarding SKULE and EngSoc that might impact your everyday life. I would like to make this process easier for you by summarizing board meetings and communicating any useful information after each meeting through accessible social media like Email, Discord, and Instagram. My hope is that through these actions, you can stay focused on other things, such as academics, extracurriculars, and enjoying your newfound freedom in university.

If you have any questions about my platform or just want to chat about common interests, feel free to reach out on Discord (@coconutmiilk) or Instagram (@xinyichen__). Happy voting!

Ege

Voter Statement:

Hey F!rosh! I'm Ege, going into EE ⚡, from Ottawa, living at Vic, and I'm running to be your First Year Rep. I'll fight COURAGEOUSLY for your grades on quizzes, assignments, and midterms (yes even with Prof. Cohen).

I'll also host first-year-only events like Myhal game nights, ArtSci rez TGTs, and networking nights (pizza included), and get y'all first-year food truck discounts.

Most importantly, I am HUNGRY for questions, ideas, and feedback. Got any of 'em? DM me on Instagram [@ercin.ege] or Discord [hobidik99] email [ege.ercin@mail.utoronto.ca]. Vote Ege and forget regrets!

Platform:

Hey Skule First Years!

I am Ege, running to be your First Year Representative. I chose to major in Electrical Engineering mainly because I had almost no knowledge about it and wanted to dive deep into something interesting. I am coming from Ottawa, but since the overall commute would've been 10 hours per day, I am living at Victoria College with a small but strong engineering population (don't worry commuters, lots of events coming your way to forget the long rides on GO). I enjoy reading, magic tricks, Muay Thai, networking, and doing the Lush Life dance (not the best at it though).

What I'm all about:

- Advocating for your grades on quizzes, assignments, midterms, etc. COURAGEOUSLY 🦁
- Abolishing DUO Push (jk, I wish)
- Hosting fun and/or valuable events for first-years specifically

- Getting all of us first-year-exclusive discounts at the most nutritious food trucks 🚚.

Now to talk a bit about some initiatives I want to bring to keep the F!rosh spirit throughout the year for all of us:

- Myhal Arena First-Year Game Nights

Imagine the F!rosh week SUDS but with good music and Monopoly, Catan, and Twister.

- ArtSci Rez Get TGT's

Some of us don't live at Chestnut. But we carry the Engineering spirit and good vibes Innis, Trin, Vic, St. Mike's, WW, UC, and the NewC. Why not get together and make some friendly pranks to ArtSci's?

- First-Year Networking

A wise person said your network is your net worth, and I call that WORD 🧠. We'll bribe some industry speakers and upper-years with mad internships (and first-years) with some pizza and LinkedIn posting opportunity; and BOOM! One step closer to securing that PEY BY YEAR 1!

- MORE!

Mina Soliman

Voter Statement:

Hello everyone! My name is Mina Soliman, and I'm a first year electrical engineering student, and I'm running for the position of First-Year Representative on the Board of Directors. I believe that it would be great to represent my fellow first year students on the Board, to improve communication between first years and the Board, and to bring up any issues that concern the student body. I hope to be able to consistently, transparently, and openly serve the best interests of our student body.

Contact: me.soliman@mail.utoronto.ca | +1 (403) 512-9108

Platform:

Hello everyone! My name is Mina Soliman, and I am currently a first-year Engineering student at U of T, running for the position of First-Year Representative on the Board of Directors.

As a first-year student myself, I can relate to many of the experiences and challenges that other first years may be going through. There is a lot happening during first year, and it can sometimes be difficult to keep up with everything. Whether it is finding opportunities to get involved, learning more about Skule, or simply understanding general first-year procedures, access to clear and timely information is important.

If elected, one of my main priorities would be improving communication between first-year students and the Board of Directors. I would work to increase awareness of opportunities, events, resources, and other information relevant to first-year students. At the same time, I would aim to ensure that students' concerns are properly raised and heard during Board meetings, whether they relate to academics, student life, accessibility of resources, or the overall first-year experience.

I also believe it is important for students to remain informed about what is happening within the Board and to feel that their representatives are accessible to them. I would make an effort to be available to first-year students, listen to their concerns and suggestions, and communicate those concerns clearly to the Board.

Throughout my term, I would hope to work with the Board to address issues affecting first-year students and help the first-year community feel more informed, involved, and connected to the work being done on their behalf. I would appreciate the opportunity to serve the student body as First-Year Representative.

Contact: me.soliman@mail.utoronto.ca | +1 (403) 512-9108

Tony Zhou

Voter Statement:

Hi! My name is Tony and I'm running for board of directors first yer rep. Feel free to talk to me about anything you'd like and I'm always here to listen!

My instagram: towkneigh

My email: tonyzhou201908@gmail.com

Platform:

Hi! My name is Tony and I'm studying Materials Engineering + PEY. I'm running for the first year representative role for board of directors. In my free time I like to play guitar, do charity work, and rock climbing (text me if you want to go rock climbing sometimes!). I'm currently the 20/20 Mission Director of School Clubs and I'm also hosting a fundraising event from October 1 to October 31 in support of World Sight Day World, October 8th (20/20 Mission is registered non-profit dedicated to providing clear vision for underserved communities). With support from an A Million Acts of Love Changemaker Grant, my goal is raising awareness about ongoing prevalence of myopia, collect glasses donations, and raise funds so we can provide vision care to even more people. We will have a booth at the University of Toronto near the king's circle on October 8, 11AM to 3 PM. Please come check it out (don't miss your chance to win raffle prizes!) More information about the event will be posted on instagram: @20.20.mission

Ashkon Aminzadeh

Voter Statement:

What is this place? I don't know either! But as your First Year Representative I'm going to do everything I can to make engineering OUR new home. From organizing and hosting game shows in the Myhal Arena to doing all the things that the people want. I WILL BUZZ my hair if 75% of people vote for me. Now I'm going to wrap this up cause there's no professors to impress and I'll just leave you with this: Ashkon Saves Hairlines!!!

Email: ashkon.aminzadeh@mail.utoronto.ca

Phone: 289-879-2793

Platform:

I don't want to yap your ear's off so here's a nice and clean list of things I WILL DO as your First Year Representative:

1. Gameshows at Myhal Arena (I will host).
2. Professors vs students competitions.
3. A scavenger hunt with clues like a puzzle.
4. Listen and ACT WITHIN A WEEK to your feedback.
5. An active Instagram account that will provide optimal transparency and an easy platform to share and gain traction with your ideas.
6. Firmly opposing notions that hurt first years
7. Competitions for niche activities like poker and ping pong nights
8. Transportation problem for Chestnut residence. I will try my best to find a solution to that HORRENDUS 20min walk
9. Interviews with professors once a month to understand the secret of their classes
10. If these 9 points haven't satisfied you then suggest some more cause I'm always happy to act on your voice. REMEMBER THAT ASHKON SAVES HAIRLINES!

Industrial Engineering Representative

Naz Saral

Voter Statement:

Hi! My name is Naz, and I am a fourth-year Industrial Engineering student. I am excited to be running for Industrial Engineering Representative on the Board of Directors. Over the past three years, I've been involved in our community through IndyClub, design teams, and the MIE Staff-Student Council. As Communications Director and Social Director for IndyClub, I've worked to strengthen our Indy community and create opportunities for students to connect. I've also represented student perspectives in conversations with faculty and department leadership. I'd love to bring this experience to the Board, advocate for Indy students, and ensure our community has a strong voice within EngSoc! :) Feel free to connect with me on insta @naz.saral_

Platform:

Hi! My name is Naz, and I am a fourth-year Industrial Engineering student. I am excited to be running for Industrial Engineering Representative on the Board of Directors.

Over the past three years, I have made it a priority to be involved in the engineering community through student clubs, design teams, and leadership positions. Most notably, I have been heavily involved with IndyClub, our discipline club, where I have served as both Communications Director and Social Director. Through these roles, I gained experience creating opportunities for students to socialize, network, and connect with one another beyond the classroom. I have seen firsthand how important a strong sense of community is, especially within engineering program.

My involvement with IndyClub also gave me the opportunity to serve on the MIE Staff-Student Council. In this role, I participated in broader conversations within the department, connected with professors and department leadership, and helped communicate the concerns and

perspectives of students. This experience taught me how to listen to my peers, bring their feedback forward, and work with faculty to ensure student voices are represented.

As Indy Rep, I want to bring these experiences to the broader Indy community and ensure that the perspectives and concerns of Industrial Engineering students are represented within EngSoc. Having already represented students through the MIE Staff-Student Council, I understand the importance of listening to my peers, communicating their concerns, and contributing thoughtfully to discussions that affect our student community.

After three years of being involved with IndyClub and U of T Engineering, I want to make the most of my final year by giving back to the community I have been a part of. As a member of the Board of Directors, I would take an active role in discussions and decisions surrounding EngSoc initiatives, funding, and student interests, while ensuring that Indy students have a strong voice at the table. I would be incredibly excited to represent Industrial Engineering on the EngSoc Board of Directors!

Gabe Raposo

Voter Statement:

Hi Indy's, it's Gabe (Indy 2T7 + PEY)! After leading Indy Club to Discipline Club of the Year, I'm running to be your representative on the EngSoc Board of Directors to keep giving back to Indy's and strengthen our place in the Skule community. I plan to advocate for Indy's in all EngSoc meetings, ensure Indy's are updated on all things Skule and EngSoc, and support Indy-focused clubs and organizations. You can contact me on Instagram (@gabe_raposo) and I'll be happy to discuss my platform. Vote for me to make your Skule experience one to remember!

Platform:

Hi Indy's! I'm Gabe, I'm an Indy 2T7 + PEY and I'm running to be your representative on the EngSoc Board of Directors. I love our program and everything it's given me, including the opportunity I had last Skule year to give back as Chair of the Discipline Club of the Year Award-winning Indy Club. Additionally, as a former HL, frequent Bnad crasher, and frequent attendee of major Skule events, I have fully immersed myself in the Skule community and understand EngSoc's role in ensuring all students, including us Indy's, feel a sense of belonging at Skule. I believe that the Board of Directors will be the perfect opportunity for me to continue advocating for both our discipline and the wider Skule community and will allow me to continue giving back to you while I'm on my PEY.

The Board of Directors are the people that vote on major EngSoc policies and hold your Officers, Project Directors, and everyone else involved in EngSoc accountable to their promise of supporting you on your university journey. As your Board of Directors representative, I plan to:

1. Advocate for Indy's in all EngSoc meetings: Board of Directors meetings should be your chance to be heard and this is why, to ensure your voice is truly represented, I would like to connect with the Indy community and Indy Club to listen to your concerns and ensure they are prioritized at these meetings.

2. Ensure Indy's are updated on all things Skule and EngSoc: With Pit renovations, potential first-year curriculum changes, and an ever-changing PEY market (just to name a few), there will be a lot for EngSoc to discuss and in turn, for me to keep you all updated on to ensure full transparency between EngSoc and Indy students.
3. Support Indy-focused clubs and organizations: Groups such as Indy Club, IISE, and HFIG are doing incredible work to support us Indy's, which is why I would like to leverage the Board of Directors' place within EngSoc committees to ensure these clubs have the funding, affiliation, and policy-based support to further positively affect the Indy student experience.

If you want to learn more about my goals for the Board of Directors, I would love to chat with you! While I'm on PEY, you can reach out to me at any time on Instagram (@gabe_raposo) and I'll be happy to discuss my platform. Vote for me and I'll ensure you all have the support you need to make your Skule experience one to remember!

Francesca Mangano

Voter Statement:

👍! My name is Francesca, (Indy 2T8 + 🤔 PEY) and I am running to be the 2T6-2T7 BoD's Indy Representative. However, you may have also seen me as the UTEK Director, on the AAC, running F!rosh Games, as an Indy Club mentor, guarding the Cannon, or marching at Pride; helping me learn about the logistics and values of different student groups. My favorite part of the Skule™ community is its incredibly diverse environment, so whether you're in class, involved in clubs, or enjoying student life, you can count on me to represent you on the Board.

f.mangano@mail.utoronto.ca

Platform:

HI INDIES! My name is Francesca (Indy 2T8 + 🤔 PEY) and I am running to be the 2T6-2T7 Board of Director's Industrial Engineering Representative! However, you may have seen me as the UTEK Director, on the AAC, as an Indy Club mentor, running F!rosh Games, guarding the Cannon, or marching at Pride. These experiences have helped me learn about the logistics, finances, values, and community about a wide variety of student groups.

My favorite thing about the Skule™ community is how it's a uniquely diverse environment that can help us grow. During a time of our lives where we are discovering who we are, it's important to have such a strong community to rely on.

Your perspective and voice is incredibly important to me and I aim to address the following concerns in my work.

1. Accessibility. We must never stop reviewing our existing systems and improving their accessibility. Whether this means creating a more equitable environment in the classroom or club or working with faculty to improve an existing system, your accessibility concerns are important to me. Let's work together to make the Skule™ community a more inclusive space for everyone.
2. Innovation. It's important to me that we are doing everything we can to ensure our community

can thrive and continue creating amazing things. I am happy to hear about any new projects or initiatives you may have, and will keep an open mind when helping secure funding/resources for innovative projects.

3. Fun. School can be difficult.... Skule™ shouldn't be. I strongly believe that this community should be equally fun as it is talented. Whether it's through Frosh Week, throughout the year, in class, formally, or informally, I am open to hearing your ideas on how we can continue creating a fun and inviting environment for everyone.

4. REPRESENTING INDY AND ALL OF INDY! No matter who you are or what year you're in, you deserve to be represented by someone who will listen. Indy Club won Discipline Club of the Year last year, and I hope we can keep this momentum going as we continue to do great things.

If you have any questions, concerns, thoughts, prayers, fun pieces of trivia, or funny jokes, feel free to email me at f.mangano@mail.utoronto.ca. Let's make Skule™ better together! 🐱

MSE 4th Year Representative

Jasnoor Hazooria

Voter Statement:

As we enter our final year, let's make it one to remember. My goal is to help our class end strong, create opportunities to build lifelong connections with classmates, alumni, and industry, and make sure we have fun along the way. I'll work to make our last year at U of T both meaningful and enjoyable.

Reach out at jasnoor.hazooria@mail.utoronto.ca

Platform:

As we enter our final year in Materials Science & Engineering, I want to help make it the best one yet. Over the past three years, we've worked through challenging courses, labs, projects, and internships together. Now, our focus should be on finishing strong academically while making the most of the time we have left as a class.

If elected as 4th Year MSE Rep, I will advocate for student concerns, promote clear communication between students and faculty, and help ensure our voices are represented. Beyond academics, I want to strengthen our community by creating opportunities for classmates to connect with one another, alumni, and industry professionals. These relationships can have a lasting impact long after graduation.

Most importantly, I want our final year to be fun and memorable. Whether through social events, traditions, networking opportunities, or class activities, I will work to create experiences that bring our cohort together and celebrate everything we've accomplished.

Let's make fourth year a year of growth, connection, and great memories. Vote for Jasnoor!

MSE PEY Representative

Hey guys, vote for me. If anyone has any questions please contact me at:

Hello ChemE 3T0's! My name is Vanessa Lovino, and I am running to be your 1st year class representative. My goal for this year is to advocate for any of your academic needs and concerns, whether that be a deadline extension or a push for a fixture of a certain screen in a certain lecture hall. I hope to be someone that the class can protest through. For any questions, please contact me on Instagram @outoftunelovino or through my email, vanessa.lovino@mail.utoronto.ca.

Hello ChemE 3T0's! My name is Vanessa Lovino, and I am running to be your 1st year class representative. My goal for this year is to advocate for any of your academic needs and concerns, whether that be a deadline extension or a push for a fixture of a certain screen in a certain lecture hall. I hope to be someone that the class can protest through.

In high school, I developed a passion for rules but also change. Serving as a co-op student at a law firm, I learned the importance of precisely choosing your words by reading concise case briefs and carefully following guidelines when given a task. I also developed the skill of communicating with adults and people in authority. As class representative, I plan to address our academic wants and necessities in a structured and persuasive manner to those who can implement changes. This can include addressing an ambiguous question on a midterm to a professor, or an untimely workload that clashes with three million other assignments we have to do; I want our class to achieve the grades we work hard for with nil friction.

I am also a team player. As someone who mediocrely plays volleyball and basketball, I understand how to listen and take in harsh (but true) criticism from coaches and teammates to better improve my game, so that we may all win. I hope to be approachable so that you can come up to me and bring up your concerns; and I promise to respond with an open and empathetic mind. There is hope for me to befriend all of you so that I can best stand for the common interest of us 3T0's.

We are all aware of the academic rigour that engineering at UofT has prepared for us but, I presume that every single one of us can succeed with the proper advocacy of a more than willing representative. In our program I have already met very bright and intelligent academics but as well as disciplined and hardworking students. I am passionate about all of us achieving our iron rings together.

I am available to communicate on multiple platforms. Some of my handles include my instagram @outoftunelovino, Snapchat @vlovino9, and my email vanessa.lovino@mail.utoronto.ca. My friends can vouch that I have quick response times. The communication in this role goes two ways, when I receive from you, I promise to get back. When major changes are brought forth, I believe it is this position's responsibility to get it out to all of you as soon as possible. My 8-hour screen time will ensure that you all stay in the loop.

I hope I can receive your votes and support! Vote Vanessa Lovino for ChemE 3T0 class representative!

YuYang Qin (Charley)

Voter Statement:

I am an ordinary student, but I am not. I've experienced being an international student, also gone to school in Ontario; I have had concerns with the new environment, and I know what it feels like to be "stranger". I have been in many shoes, so I can resonate with YOU. Most importantly, I am good at articulating problems and shouting out the collective voice for a better learning and living environment that we share. If you have any questions, please contact me through charley.qin@mail.utoronto.ca or on Instagram at charleyyyyq. I look forward to your message.

Civil 2nd Year Representative

Hugo Wang

Voter Statement:

Hello everyone, I'm Hugo Wang.

I was CIV2T9 Class Rep last year, and apparently since Loukas doesn't want this job I once again feel obligated to take the reins. I'm also CivClub's Mentorship Director for 2026-27, and am primarily going to be active on our Instagram Group Chat. My job is pretty much going to be reposting updates and stuff that are useful and also sending heavily worded emails to professors/TAs that aren't doing their job. Here's to another good year Civs! You can contact me through email at hugo.wang@mail.utoronto.ca or through Instagram at [@hugsproductions](https://www.instagram.com/hugsproductions). Cheers!

Jiona Joy Moraleda

Voter Statement:

Hi everyone! My name is Jiona Joy Moraleda and I am running to be your 2nd Year Civil Engineering Class Representative. Having survived 1st year, I know firsthand how important it is to feel heard, supported, and part of a strong community. I bring proven leadership experience as a former club president, marketing intern, and 1st Year Representative of FEAST. I am resilient, hardworking, and deeply committed to our community and to getting that degree together. I will

work hard to represent your voices, communicate your concerns, and make 2nd year better for all of us. Vote Jiona!

Platform:

Hey everyone! My name is Jiona Joy Moraleda and I am running to be your 2nd Year Civil Engineering Class Representative. Having barely survived 1st year, I know firsthand how important it is to feel heard, supported, and sane throughout this program and I want to make sure everyone feels the same as we move into second year together. I also know that being a student is only a part of who we are. We have lives, responsibilities, and things happening outside of university. We are all trying to balance coursework, extracurriculars, a social life, and a somewhat decent sleep schedule. As your representative, I want to hold space for that reality and make sure our voices are heard not just academically, but as whole people who deserve to feel supported and accommodated throughout this degree.

My background has prepared me well for this role. As President of my high school's Filipino Club for three years, I led a team, organized events, managed social media, and cultivated a community where everyone felt included. As a former Marketing Intern at Stanley Black & Decker, I learned how to communicate and work alongside people at all levels of seniority. And as the former 1st Year Representative of FEAST, I am already actively involved in our engineering community.

As your Class Representative, I will:

Actively listen to your concerns and bring them forward to faculty and student leadership.

Foster community within our year through connection and open communication.

Keep you informed about opportunities, resources, and important updates.

Advocate for a civil engineering experience that is inclusive, supportive, and enjoyable.

I may not have all the answers but I am resilient, hardworking, and genuinely passionate about the people around me and this community we are building together. I would be honoured to represent you. Vote Jiona Joy Moraleda for 2nd Year Civil Engineering Class Rep!

Duy Minh

Voter Statement: Hi guys, my name is Duy Minh but you may be more familiar with Minh. I'm running on the platform that I am not Hugo cause he seems to be a lil tired about it. I will try to serve the 2nd year class the best possible. My email for contact is duyminh.pham@mail.utoronto.ca

Platform:

Hello prospective voters, I am Duy Minh, more well known as Minh. I am running for 2nd year civ rep cause I wanna let Hugo rest and enjoy some peace. I will do things that is required of a 2nd year representative. I will help the class survive all the worst 2nd year courses.

ECE 1st Year Representative

Sophia Zhang

Voter Statement:

Hi everyone, my name is Sophia Zhang, and I am running for ECE 1st Year Class Representative this year! I plan to make our first year the best one yet, both academically and socially. I want to make sure that your voice is heard, and I will address any academic issues or conflicts you have without a doubt to EngSoc and help organize events for a smooth year-round. If you have any questions, concerns, or anything in between, please feel free to DM me on Instagram @sophia.zhang8, or email me at sophiahe.zhang@mail.utoronto.ca!

Platform:

Hi everyone, my name is Sophia Zhang, and I am running for ECE 1st Year Class Representative this year! I plan to make our first year the best one yet, both academically and socially. I believe that everyone should feel like they belong at the University of Toronto, and I want you to have the best first-year.

Our first year of university is quite a change from high school, and I know that there are likely many things you wish could improve. My job as a 1st Year Class Rep is to help with any student life issues, spread upcoming information from EngSoc, and handle any academic-related concerns. I want to be the person you feel comfortable freely coming up to. I will be sure to address those issues (anonymously) by discussing them with other members of EngSoc, talking to professors, or any way to solve the problems you have as an ECE first-year student.

Well, why should you vote for me? Throughout all 3 years of high school, I have been elected to my school's student council. I had similar responsibilities as a Class Rep and have lots of experience being an intermediary between the student population and school admin. I am a good listener and will make sure that your voice is heard. I also have been in leadership roles, such as being team captain on my robotics team in high school, and I have previous experience in public speaking.

I am organized, will take notes of any of your problems, and I am not afraid to take the extra step to make things happen. I will be sure to connect with ECE's discipline club to host more networking events, mentorship, or even de-stress activities (with free food!) especially before exams, based on what you want. I want you to feel safe and included in a positive environment throughout this first-year of engineering at UofT. I will strive to make ECE students more connected throughout the entire year. I want to make sure that your voice is heard, and I will address any academic issues or conflicts you have without a doubt to EngSoc for a smooth year-round.

Lastly, here are a couple of fun facts about me! I love listening to and playing music, and I played cello for over 9 years. I love making acai and yogurt bowls, trying new foods, taking sunset pictures, and working out. If you have any questions, concerns, or anything in between, please feel free to DM me on Instagram @sophia.zhang8, or email me at sophiahe.zhang@mail.utoronto.ca! Please come up to me to chat in person, and I would love to talk about anything! I'd really appreciate your vote on September 28-30 for Sophia Zhang as your ECE First-Year Class Representative!

Yoshi Yamada

Voter Statement:

Hi ECE 1st years! I'm Yoshi, and I want to make sure none of us miss out on what SKULE has to offer. As a previous Co-curricular prefect, I've learned how to listen, organise, and get things done. As your rep, I'll connect us with design teams, clubs, and industry, and bring your concerns to the department and EngSoc.

Questions, ideas, or feedback? Reach me anytime
yoshi.yamada@mail.utoronto.ca or IG @yoshiymd_

Let's make first year great.

Vote Yoshi!

Platform:

Hi ECE 1st years, I'm Yoshi Yamada, and I'm running to be your 1st Year Representative.

Why I'm running

Starting engineering can feel like drinking from a firehose. Between new courses and new people, dozens of clubs and design teams start recruiting within the first few weeks. Some of the best opportunities at SKULE go to whoever hears about them first. I want everyone in our class to hear about them, not just the people who already have connections. I have extensive experience in ranging leadership roles, both engineering and extra-curricular related, including leading and winning the ISCC Physics and Chemistry Competition in 2025, DECA Co-President, and MUN Under-Secretary-General.

What I'll do

1. Make design teams and clubs easy to find.

I'll put together a simple one-page guide to the design teams and clubs relevant to ECE (like aUToronto and UTFR). It will cover what each one does, what skills you actually need (usually none to start), and when applications open and close. I'll send deadline reminders and push for info nights and open houses where you can ask current members your questions.

2. Bring industry closer.

I'll work with EngSoc, the ECE department, and discipline clubs to promote industry events. I'll also organize casual Q&As with upper-years and alumni about internships, co-ops, and PEY, and what they wish they'd known in first year. I'll help with resume and interview prep early, so you're ready when postings go up.

3. Be a real voice for our class.

I'll set up an easy, anonymous feedback form for concerns about courses, workload, or scheduling. I'll bring those concerns to the right people and report back on what happened, so you're never left wondering.

4. Build community.

Opportunities and study groups usually come from friends. I'll help organize low-key events, like study nights and socials, so our class actually knows each other.

My commitment

I'll be accessible, transparent, and someone who follows through. I'll answer your messages, tell you when I don't have an answer, and go find it. This role is about representing all of you, so your ideas will shape what I focus on.

Marium Ahmed

Voter Statement:

Hi! I'm Marium, a Computer Engineering student running to be your ECE First-Year Representative! I believe in putting the student body's rights first, and making sure your concerns are heard by EngSoc.

Before UofT, I served as Head Student Senator, representing 3,000+ students at the board level. I spearheaded a policy change that allowed all students to vote for their Student Trustee.

I hope to bring this experience to ECE-3T0 and be someone you can trust with concerns, questions or help finding resources.

Reach me on Instagram @_mari._26 or at mariumah.ahmed@mail.utoronto.ca

Platform:

Hi! I'm Marium, a Computer Engineering student running to be your ECE First-Year Representative! I believe in putting the student body's rights first, and making sure your concerns are heard by EngSoc.

As one of your representatives, I'm dedicated to ensuring that Engineering students are informed and that our opinions are heard on matters that affect us. Whether that means continuing discussions for better access to OSAP grants and financial resources, supporting student groups and opportunities, or defending students' right to protest, I want to ensure that our voices are represented where decisions are made.

I recognize that first-year Engineering can be difficult. However, you shouldn't have to navigate it on your own. By making sure first-year students are prioritized when it comes to academic, identity, mental health, disability, and extracurricular resources, I hope to help create an environment where every student has the support and information they need to succeed, no matter their situation. Through my platform, I hope to connect first-year students with resources made specifically for them, such as workshops, additional review sessions, and opportunities to meet TAs and upper years. Each of these can help build a stronger community and combat imposter syndrome among first years.

Finally, I hope to bring more AI accountability to the faculty. As AI becomes increasingly present in education and Engineering, we deserve clear information about how it is being used and how it

affects our learning – aside from that one lecture in APS100. I hope to connect students with resources and discussions that help us understand AI's role in our education, future careers, and the world. This includes fully understanding the AI resources that come with our student IDs, holding professors and TAs accountable for their use of AI, and promoting its fair and informed use across campus.

I bring several years of experience in student leadership, advocacy, and fighting for change to this role. Before UofT, I served as Head Student Senator of my school board, representing over 3,000 students. As Head Senator, I spearheaded a policy change that gave all students the right to vote for their Student Trustee and autonomy over their education.

This experience taught me the importance of listening to students equally, bringing their concerns to decision-makers, and putting student experience first rather than the interests of decision-makers.

I have also held leadership positions in robotics, mentoring, press, and youth organizations, where I developed skills in teamwork, outreach, mentorship, and community-building.

I hope to bring these skills to ECE-3T0 and be a representative who is approachable, communicative, and genuinely responsive to the students I represent.

If elected, I want to make sure you know where to find support, know that your concerns are being heard, and know that you have a meaningful voice within the Engineering community.

You already have a voice. I want to make sure it's heard.

You can reach me on Instagram at @_mari._26 or by email at mariumah.ahmed@mail.utoronto.ca for more information.

ECE 3rd Year Representative

Abdullah Bin Rashid

Voter Statement:

Hi everyone! My name is Abdullah, and I had the privilege of serving as your ECE first and second year class rep. Over the past 2 years, I have worked with faculty co-chairs to improve course pacing and lecture content, resolve unfairly marked quizzes, and ensure your voices were heard through feedback forms and meetings with department co-chairs. With my experience from first and second year, I'm committed to continuing to represent your concerns effectively. I'd love your support to serve as your third-year class rep and keep making positive changes together!

Platform:

Hello everyone,

My name is Abdullah, and I'm running to be your ECE third-year class representative. Last year, I served as your second-year rep, where I worked to resolve course pacing and lecture content,

along with unfairly marked quizzes, and acted as a link between students and department co-chairs by attending faculty meetings and raising your feedback directly with the department. I also helped create feedback forms and shared them across multiple groups on Instagram to make sure every voice was heard.

I want to focus on not just academics, but also making sure we support each other as a team and get employed!! If elected, I'll continue to:

- Advocate for fair grading, clearer communication, and manageable workloads.
- Keep feedback channels open so your concerns are heard and acted on quickly.
- Organize interview prep sessions to help us get through the crunch together.

But third year shouldn't only be about surviving assignments rather it should also be about building community. I'd love to help organize more team-building events, from a massive ECE sleepover to bringing back the ECE dinner dance. These moments give us a chance to relax, connect, and remind ourselves we're all in this together.

I've done this role before, I know how to get results, and I'm committed to making second year not just manageable, but memorable. I'd be honored to earn your vote.

ECE 4th Year Representative

Joe Dai

Voter Statement:

Hi there, I'm Joe. Happy final year of ECE—wow does time go by quick! I also want to first say thanks for your continued confidence in me in the previous three years electing me as Class Rep. I am sure you know the drill by now: as always, I still hope to be able to advocate for your needs and bring your concerns to the attention of Faculty. As in the past, I continue to be committed to transparency: I will always be open for feedback, questions, or concerns—just email, Instagram, or Discord DM me (see: j0e.ca for links).

Platform:

EngSci 1st Year Representative

Brianna Si

Voter Statement:

Hi everyone!! I'm Brianna. As an EngSci class rep, I hope to be an approachable point of contact for any concerns, questions, or suggestions, from academic to social. I love connecting with others and learning about them, so DM me on Instagram at brianna.si_, or email me at brianna.si@mail.utoronto.ca. I'll listen to anything, no matter how small or unrelated it may seem. We can discuss an assignment being unfairly graded or gush over music <33. Read about my hobbies and experiences on my platform statement. Vote for Brianna, and have a lovely day!

Platform:

Hi everyone!! I hope the school year has been treating you all amazingly. I'm Brianna. You may have seen my name pop up in the Instagram group chat or on a certain tracking spreadsheet. Maybe you've even seen me in the common room studying delta-epsilon 🤔 or playing card games.

As one of your EngSci class reps, I hope to be an approachable point of contact for any concerns, questions, or suggestions, from academic to social. A big value of mine is connection. I love connecting with others as well as learning about them and what makes them happy. So contact me! I will listen to anything, no matter how small or unrelated it may seem. Just DM me on Instagram at brianna.si_, or email me at brianna.si@mail.utoronto.ca. We can discuss how an assignment was unfairly graded or gush over music artists (Send recs!! I love looking at people's playlistsss).

My related experience to being a class rep includes:

- Four years as a student council grade representative and event coordinator (Senior Sunrise and Sunset, Movie Nights, Senior Splash, Grad Hoodies)
- Co-president of our Classics Club (serving as the bridge of communication between the execs and teachers, preparing everyone for the Ontario Student Classics Conference)
- International Day of Pink Decor Head (budgeting, hosting decor parties)
- And many, many emails

Here are some fun facts about me :D

I'm super interested in biomedical and materials engineering. I love knot theory and topology in general, and I would love to apply it to biomaterials and neurology.

In my free time, I love performing, from dancing to singing to acting. I often drop by DanceLifeX

on Yonge Street for dance classes and led an acapella group in high school to perform in our student-run production!

I also like reading and writing. Literature wasn't my thing until I came around and grew to love it in middle school, so a fun fact I like to drop on people is that I've never read Harry Potter or Percy Jackson.

I have a cat and a dog 🐱🐶

Vote for Brianna! Have a lovely day <33

P.S. I'm serious about the music recs. Send them over! 💕

Bosen Song

Voter Statement:

Hello fellow F!rosh, my name is Bosen and like the rest of you I have experienced the confusion and difficulties associated with adapting to university such as pacing or resource organisation.

As Class Representative I will:

1. Build a dedicated website to organise the scattered information across Quercus, such as pre-readings or weekly breakdowns.
 2. Keep an anonymous and simple google form for questions or concerns related to class.
 3. Bring your feedback to professors and EngSoc, then report back
- I will update the website weekly, assisted by GenAi, taking suggestions from you to improve it.

If you have questions or suggestions you can email me at bosensong@gmail.com.

Platform:

Hello fellow F!rosh! My name is Bosen, and like the rest of you, I've felt the confusion that comes with adapting to university, from keeping pace with lectures to figuring out where everything actually lives on Quercus.

As Class Representative, I will:

1. Build a dedicated website that organises the scattered information across Quercus
Pre-readings, due dates, and weekly topics are spread across several course pages. To be transparent, I already use Claude Pro to condense each syllabus into a weekly breakdown, which I review every weekend to see what's coming up. It has helped me a lot, simply because I walk into lectures already knowing the big picture before the details start. As Class Rep, I'll make this public, update it every week, and shape it around your suggestions. Whether you use mine or build your own by hand, I'd encourage everyone to have something like it.
2. Run an anonymous, simple Google Form for questions and concerns
The form will stay open all year, sorted by course, so nothing gets lost. If you have a question

you'd rather not ask a professor yourself, I'll bring it to them on your behalf, no name attached.

3. Bring your feedback to professors and EngSoc, then report back

When the same concern comes up from several of you, whether it's a deadline pile-up or a lecture that isn't landing, I'll raise it with the instructor and at EngSoc Council. Each month, I'll post a short update covering what I raised, what changed, and what didn't.

If you have any questions or suggestions, email me at bosensong@gmail.com. I'd love to hear from you!

Anna Wood

Voter Statement:

Hi! I'm Anna Wood, running to be your first year EngSci representative for the 26-27 Skule year. I will work to make your transition into university more enjoyable, improve the events available to you, and make sure that your voice is heard among administrators, professors, TAs, and the student body. I am committed to supporting and representing you. Vote for me! I pinky-promise to do my best 😊 (you can reach me at anna.wood@mail.utoronto.ca)

Platform:

Hi! I'm Anna Wood, running to be your first year EngSci representative for the 26-27 Skule year.

You've been accepted into one of the most exclusive and rigorous programs in the university, which is a great accomplishment, but you still have so much ahead of you. I cannot fix the exam that you failed because you tried to pull an all-nighter the night before (remember, get at least five hours of sleep every night!) but if you run into issues with a class, or the program, you want to have someone you can trust who can advocate on your behalf.

I've held multiple leadership positions in the past, some where I had to deal with very dedicated and strong-willed authority figures above me. I was raised in the US, where I spoke before the legislature of South Carolina multiple times. Some fights I lost, but I believe that I made an impact there. No one can guarantee to resolve every dispute in your favor, but when you're in that situation, you need an experienced advocate on your side.

Student support, though, means more than just raising concerns. Our community is one of the best parts of EngSci! I have extensive past experience leading groups where I needed to organize social groups. I will work to make sure that the events you know will continue to be ran well and smoothly, and in listening to the needs of the student body, I will work for the creation of events that you want.

Vote for me! I pinky-promise to do my best 😊

Yaarish Ali

Voter Statement:

Hi, I'm Yaarish, a first-year EngSci, and I'm running for your Class Rep.

Let's be honest: we signed up for EngSci knowing there'd be pain. We just didn't know there'd be THIS much of it. Between problem sets, labs, 9 a.m. classes, and pretending we understand what's happening, we could use someone in our corner.

I'll listen to what our class actually wants, bring it to the Engineering Society, and make sure you're not finding out about important things through a random group chat at 2 a.m.

If you've got an idea, concern, or complaint, find me in class or message me on instagram at yaarish_ali07.

Vote Yaarish and while I handle the talking, you handle the surviving.

Platform:

Why I'm Running:

Hi! I'm Yaarish, a first-year EngSci, and I'm running for Class Representative because I want our class to have someone who listens, speaks up, and actually follows through.

We're all figuring out EngSci together right now. Between problem sets, labs, 9 a.m. classes, and discovering that "I'll start it tomorrow" was perhaps not the greatest academic strategy, first year is already a lot. I want to help make sure our class has a strong voice throughout it.

Academic Advocacy:

One of the most important responsibilities of a Class Rep is making sure our academic concerns are heard.

If there are recurring issues with course delivery, scheduling, assessments, workload, communication, or anything else affecting our class, I want to hear about them and bring them to the appropriate people in the Engineering Society, Discipline Club, or department.

I also want to make communication go both ways. If students raise an issue, they should know what happened after it was brought forward, not have it disappear into the void.

Communication:

Nobody should have to find out about something important from a random group chat message saying:

"GUYS DID ANYONE KNOW THIS WAS DUE TODAY???"

I'll work to keep our class informed about relevant opportunities, events, academic updates, and

Engineering Society matters, while making sure student feedback gets communicated back to the people who can act on it.

Building Our Class Community:

Class Rep isn't only about academics. We're going to be spending a LOT of time together over the next few years, so I'd also like to help create opportunities for our class to actually hang out outside lectures and labs.

Whether that means casual meetups, study sessions, games, food runs, or something completely ridiculous that our class comes up with, I'm happy to help organize it.

What You Can Expect From Me:

I'm not going to promise that I can make EngSci easy. If I could do that, I'd probably be charging tuition instead.

What I can promise is that I'll:

1. Listen to concerns and ideas from our class
2. Advocate for students when issues arise
3. Keep our class informed
4. Communicate feedback to the Engineering Society and department
5. Help organize social opportunities
6. Actually follow up on things rather than letting them disappear

Most importantly, I want this to be a role where you can come to me with something and know that I'll take it seriously.

If you have an idea, concern, question, or a revolutionary proposal to abolish 9 a.m. classes, find me around campus or message me on instagram at [yaarish_ali07](#).

Vote Yaarish and we'll survive EngSci together, making the most of it while we're at it.

Nitika Nitheeswaran

Voter Statement:

Hey everyone! I'm Nitika and I'm a first-year EngSci student running for year 1 class rep. I'm interested in helping keep our class informed and making it easier for us to share our questions, concerns, and ideas. My top priorities are communication, accessible info about academics and EngSci opportunities, and making sure student feedback reaches the right reps. I'm also committed to sharing updates clearly and following up on issues rather than letting them get lost and forgetting. If you ever want to reach out, you can contact me at nitika.nitheeswaran@mail.utoronto.ca, nwnitika@gmail.com or [nwnitika](#) (Instagram)!!

Platform:

As I mentioned, my top priorities are communication and accessible info about important EngSci related things! I will work to make important Year 1 info easier to find and understand, especially regarding courses, deadlines, academic resources, and opportunities available to first-year students. As a first year myself, I know this year has a lot of new info to take in, so hopefully doing these things will be helpful for our class! I would also provide an easy way for people to ask questions, express their concerns, and add suggestions so I can communicate common concerns to the appropriate EngSci or student reps to provide updates when there is relevant info to share :) Another thing I think is important is supporting opportunities for first-year students to connect with one another outside of our classes, while recognizing that we all have different schedules, interests, and levels of involvement. Overall, my goal as Year 1 class rep would be to serve as a reliable communication link between students and the people responsible for addressing class concerns. In high school, I was also secretary of stuco and creative director of my school's Key Club, so I have lots of experience in student leadership that makes me a trustworthy candidate.

EngSci 2nd Year Representative

Alan (Yutong) Wang

Voter Statement:

Hi! You may know me as the person who posted CIV102 assignment solutions every week! Throughout the last year, I hope I've proved with my actions that I'm always eager to help anyone. A few more things that I've done last year: co-hosted a calc midterm review with Yang, posted MSE160 assignment solutions, provided solutions to past tests that did not have a solution online.

Anyway, my point is that you can trust me with genuinely caring about your academic experience and providing prompt action, so please vote for me!

Email: alanwyt.wang@mail.utoronto.ca
DM me anytime on discord @alanwang981

Yang Wang

Voter Statement:

Hi Engscis,

I am once again asking for your political support. Year 1 was mildly painful so let's amp it up (or down depending on your worldview) in year 2.

THIS VOTER STATEMENT MUST CONTAIN SOME FORM OF CONTACT.

Send me most cursed image at xyang.wang@mail.utoronto.ca

Platform:

Type a message or Draft with Copilot

I will try my best to hit the maximum 500 word count.

It could be argued that neoliberalism is deeply entrenched in the culture of engineering, with the assumption that greater individual effort gets a proportionately greater reward. However, I'm sure that everyone has realized that it's a lot tougher and harder to get through our cubic meter of homework alone than it is with friends. Perhaps collective learning has its place alongside the individual grind as well. That's why I will continue to host mini game shows that will bring people together to do some collective puzzle solving.

I love the written word. By now you've probably zoned out. Bananas are a tropical fruit found in most tropical countries. Despite being a tropical fruit, there are plenty of these tropical fruits in our non-tropical climate. What gives? Perhaps we must reexamine our relationship with the tropics, and whether or not climate change has brought these tropical fruits into our local orbit. If that's the case, should we really be scared of climate change, or should we embrace the plentiful bananas our soon to be tropical climate will bless our soil with.

I couldn't hit 500 words in the end.

Hasnain Heryani

Voter Statement:

Hello EngSci 2T9s!! My name is Hasnain or rather the guy that has been constantly recognized as the guy from the EngSci Instagram GC since before the start of first year. THERE IS NO SUCH THING AS BEING TOO CHRONICALLY ONLINE AND YAPPING TOO MUCH!! For if we never yapped, we wouldn't be any different to the socially awkward CS kids (ew) and be without personality. Before I go off on a tangent I'll get to the matter at hand and that is I am running as your class rep this year. As your class rep I intend to bridge the gap between the EngSci 2T9s, The Faculty of Engineering and EngSoc. In addition to that academic support, I intend to work with the EngSci club to host amazing events for everyone to help coping with 2F (knowing that this semester may be hell on Earth). You guys can reach me at my personal insta

@hasnainheryani. If anyone ever wants to talk, I am almost always down to yap and if the stress gets too much I can listen to your rants.

Platform:

We have all heard the horror stories of EngSci 2F. I know that many of you are scared of what is to come in the coming weeks as we start this year. I am scared myself, but that's ok we will survive and we will thrive!! This will be all of our best semester yet.

How I intend to support everyone focuses on 3 areas:

1. Regular and transparent communication

- As many of you know, I am almost always online and reply very quickly. I am very easy to get a hold of when needed
- Additionally, I intend to regularly communicate through email, the Instagram GC, and EngSci 2T9 Discord to make sure all EngSci 2T9s are aware of what is going on

2. Voicing EngSci 2T9 concerns and opinions

- Every EngSci 2T9 is free to always contact me if they have any concerns about an assignment, homework, quizzes, deadlines and more
- I will communicate the concerns and opinions EngSci 2T9s to the right faculty members that will be able to make the changes that EngSci 2T9s want and need

3. EngSci Community Events

- Consistent work with EngSci club to host events for the EngSci 2T9s to cope with Second Year, enjoy Uni life, and most of all have fun

We need this healthy work-life balance and I intend to bring that if I am voted with these three main areas and more

Miles Ehrlich

Voter Statement:

I'm Miles and I'm running to be your EngSci Class Rep! You may know me as "latin nerd", "Skule Nite guy", or "the German", but this year I want to be your voice in EngSoc. We all know the nightmare that is 2F, so it's more important than ever to have proper academic advocacy! I'll make sure your concerns are heard by Profs and take proactive measures to make our workload reasonable. I also want to host study socials to get ready for our exams and have some fun along the way :) After all, Res Severa Verum Gaudium!

Hello everyone :) It is my honor to be officially running for the position of EngSci Class Rep for you all again this year. Feel free to skip to the end for a TLDR on why you should vote for me.

I believe I have the unique combination of both having prior experience as well as possessing the passion for this position. Through my first two years in the program, I have built plenty of connections with both my peers and faculty, so I believe I have the best chance of facilitating communication between the two. I have plenty of successful cases to back this up. In addition, I have the drive to keep supporting everyone with their concerns. I take pride in being available to help with any conflicts and will try my best to see them through. Last but not least, I've been dutifully assisting with deadline organization and providing some other useful resources to make EngSci a bit less stressful.

The TLDR is: Hopefully I did a good enough job the past two years for you all to vote for me again this time. I'll continue to help facilitate feedback and advocate for you all to the best of my ability.

EngSci 4th Year Representative

Andy Gong

Voter Statement:

Hi all! I'm running to be class rep for our final year in EngSci. Hopefully your experience in EngSci has been smooth, and I'll try to keep it that way! If you have any suggestions / comments, you can reach out to me at andyg.gong@mail.utoronto.ca

Platform:

Hi all! I'm running to be class rep for our final year in EngSci. Hopefully your experience in EngSci has been smooth, and I'll try to keep it that way!

Industrial 1st Year Representative

Jessica Xu

Voter Statement:

Hello! My name is Jessica, and I am a first-year industrial engineering student! One fun fact about me is that I went to high school at UTS so this will be my 7th year on campus. Transitioning to university life is overwhelming, and my goal as your first-year rep is to make sure our Indy community is tight-knit and we can rely on each other (plus having access to the BEST snacks in the lounge room). I was previously an event coordinator in high school, where I planned grade events. Please reach out to me! My instagram is @Jeshoeka

Platform:

First years are literally cracking under engineering stress while having trouble adjusting to the quick pace and independence of university life. I am running for first-year indy rep so we can navigate the stress of first year together as a community. The focus of my campaign is to build lasting friendships within our cohort, access more academic support, and consolidate a reliable e-bulletin of monthly faculty updates.

Grinding weekly problem sets is demanding enough. Getting help shouldn't require sacrificing your one-hour lunch break. I will advocate for our academic needs by addressing office-hour scheduling conflicts directly with professors and course coordinators, while gathering student feedback throughout the term to shape tutorial structures to best fit our time and needs. Reaching out to profs and TAs is intimidating. To make reaching out less intimidating, I will organize small-group coffee chats with professors or TAs (at their convenience) for discussions outside crowded rooms. Additionally, I will coordinate an informal Q&A panel featuring upper-year Indy mentors to share practical strategies on tackling coursework, extracurriculars, and time management so no one has to figure things out alone.

Sometimes we all just want a break from the books on a Friday night, as balance is essential to surviving first year. To help everyone decompress, I will host monthly Indy mixers, ranging from group dinners and game nights to karaoke, where we can connect without the lingering pressure of CIV100 assignments. Within our day-to-day routine, I will also work to keep the Indy Lounge

stocked with healthy, grab-and-go options like fresh fruit and energy bars so we can quickly refuel between classes.

You shouldn't have to rely on gossip or scattered group chats to stay informed. To keep us all on the same page, I'll create a monthly digital newsletter sent via email summarizing urgent academic deadlines, department notices, club opportunities, and upcoming Indy social events. If you want an OPTIMIZED first-year experience that balances academic success with real community, vote for me as your First-Year Indy Representative. I am always open to hearing your feedback/suggestions through email, Instagram, or in person!

Hanzada Bahgat

Voter Statement:

Hey everyone! I'm Hanzada, and I'm running to be your class rep!

As we navigate our way through university, we're going to be spending the next four-five years side by side, and I do believe that no one should have to do it alone; we must stick together.

I want to foster a strong community, filled with lifelong bonds, friendships and memories. As your class rep, I will always be ready to hear your concerns, worries, ideas, thoughts and truly represent you, because all of our voices deserve to be heard.

Add me on Instagram: @hanzadabahgat

Platform:

A little about me

I've always believed that a person should pursue many passions in life. I'm passionate about science, music, sports, arts, and nutrition, and I actually was a competitive swimmer for about 11 years.

So sports are a very huge part of my life. Working out and running have been my forms of escape and self-care.

I've had the opportunity to live in several countries. I speak fluently in 3 languages, intermediate in one and beginner in another. Languages help us bond!

If there's one thing you should know about me, it's that when I set my mind on something, I fight for it, no matter what. Part of that is because of swimming and many other experiences as well. I take risks, I push myself and I want to live an impactful life.

We've all lived full lives before coming to university. I have a lot of experiences and stories to share. I've seen my fair share of people; in fact, I've spent my entire life surrounded by people with different cultures, backgrounds and perspectives. It taught me the true value of having a simple conversation and taking the time to listen.

This is exactly the kind of community I want us to build.

Engineering is going to be hard. Long nights, unsolvable problems, accompanied by more caffeine than humanly possible, are inevitable.

But if we're ALL going through it, why do it alone?

I want us to be more than a group of people who happen to attend the same lectures. I want us to know each other, support one another, celebrate our wins and create memories. Whether that means organizing casual events, study groups or creating more opportunities to connect.

If you have a concern about a course, ideas for our class, feedback, improvements or suggestions

to share, I want you to feel comfortable coming to me. I will make sure your concerns and ideas are communicated and everyone's voice is heard and well represented. Confrontation doesn't scare me, and change and different opinions are something I welcome and value.

I've always been the friend people come to when they need advice, someone to listen or simply just someone to be there.

First-year engineering is challenging, but it's not impossible!

I genuinely believe that everything happens for a reason, we're all gathered here for a reason, and I believe that part of my purpose in this community is to help and support as much as possible.

Most importantly.

I want you to know that I'll never turn down a conversation.

Whether you want to talk about engineering, life, music, your latest academic or life crisis, or if you want to grab coffee, come find me.

If you have questions about how to build healthy habits, nutrition and balance, I can speak on those for hours.

Let's build a strong foundation for our UofT journey and make our class one that leaves an impact, not just academically, but through the community and friendships we build together.

Industrial PEY Representative

Renzo Ugarte

Voter Statement:

Hey guys! Hope you are doing well!

I've had a good time representing us, and would want to continue doing it this year! Specially during PEY, I know how much time work and life takes away from figuring out deadlines, emailing the office, and trying to understand what's expected of us throughout the year. As the PEY rep, I'll handle all that mess and communicate with you guys to see if there's anything you would want me to dig into, figure out, or talk with the office, essentially making our PEY experience as smooth and rewarding as possible.

Platform:

Hey guys! I have all been having a good time traveling, working, or preparing for the start of the fall term!

I've had a good time representing us, Indy 2T7s, for the past 2 years, and would want to continue doing it this year! Specially during PEY, I know how much time work and life takes away from figuring out deadlines, emailing the office, and trying to understand what's expected of us throughout the year. As the PEY rep, I'll handle all that mess and communicate with you guys to see if there's anything you would want me to dig into, figure out, or talk with the office, essentially making our PEY experience as smooth and rewarding as possible.

If you have any questions, feel free to lmk!

Mechanical 1st Year Representative

Enrui Zhang

Voter Statement:

Hi, I am Enrui Zhang and I am running for mechanical engineering's first year representative. I want to help create stronger communication between our class and the Engineering Society by making sure students' questions, concerns, and ideas are heard. I plan to stay approachable, actively collect feedback, and keep everyone informed about relevant opportunities, events, and decisions that affect our class. I also hope to help build a more connected class community where students feel comfortable reaching out and participating. If you have any questions or suggestions, feel free to contact me at : enruix.zhang@mail.utoronto.ca

Platform:

I'm Enrui Zhang, and I'm running for Class Representative because I want to help make sure our class has a clear and reliable voice within the Engineering Society. My main priority is communication. I want students to feel that their questions, concerns, and ideas can actually be heard and brought forward instead of getting lost or ignored.

If elected, I would make an effort to regularly gather feedback from classmates, communicate important updates clearly, and make relevant opportunities, events, and resources easier to find. I also want to be approachable, so that students feel comfortable reaching out to me when they have a concern or suggestion.

Another priority of mine is helping strengthen our class community. University can feel overwhelming, especially when everyone is adjusting to new courses, schedules, and people. I hope to help create more opportunities for students to connect with each other, participate in class activities, and feel more involved in the engineering community.

Most importantly, I want to represent the interests of the class rather than just my own opinions. I would listen first, communicate openly, and make sure the perspectives of different students are brought forward.

If you have any questions, concerns, or ideas, feel free to contact me at : enruix.zhang@utoronto.ca

Mechanical 2nd Year Representative

Arvyn Singh

Voter Statement:

Hey everyone! I hope all is well with you; my name is Arvyn Singh, and I am in MECH2T9+PEY. Growing up around lawyers gave me the unique opportunity to learn about advocacy and inherit an enduring sense of justice. I applied these in high school debate team,

Model UN & public speaking. Moreover, I learned to lead under pressure in Scouts. Each skill is pertinent to handling the unpredictable stream of issues which will come up during my tenure.

I am more than happy to further discuss my platform @uncle_arvyn on Instagram or arvynjsingh22@gmail.com via email.

Platform:

I first served as a Class Representative in my First Year. During my term, I noted that, even when I asked on the discord server if there were any problems, I got little to no feedback. Yet, I was not convinced that the entire cohort had sparse problems throughout the entire year. As it turns out, virtually almost all of you are on an Instagram group chat, which I am now a part of.

Effective governance is not always done overnight, nor can it be done when a problem is identified and simply complained about or regretted. We're Engineering Students: we solve them.

To make my tenure in Second Year much more effective, I have a few proposed implementations, which will facilitate accessible and pervasive communication between yourselves and me. These implementations were inspired from feedback I received on a google form I sent out on the Instagram Chat (It's still open! I still want to hear from you!).

[*] Implementation 1: Better Communication → Effective Change

The life cycle of a problem is that it arises; is raised to the Class Representative; is relayed to Faculty; Faculty and Class Representative stay in communication to work out a solution or compromise; the resolution is announced to the cohort.

To ensure successful completion of this cycle, we need convenient ways in which the student cohort can reach me.

~ My Instagram, Discord accounts and Personal, ClassRep emails are set up so that you can simply shoot me a private message. An anonymous google form will also be available.

~ Weekly "Office Hours" in which students can drop to raise issues to me. I will send a when2meet to gauge the best time for that week.

~ Weekly/bi-weekly polls to gauge how y'all are feeling about our course work (to relay to faculty in my meetings) or if there is an issue you see beginning to form; similar to APS106's check-in surveys.

~ Should any conflict arise in a group team, I am available to aid members in how they can clearly and impartially write all the facts to the teaching team, as opposed to a back-and-forth rigmarole and arguing in front of the teaching team.

[*] Implementation 2: Tight Knit Community

For persons entering Mech in Second Year, welcome! I've had friends tell me how it is hard rebuilding their network as most of their other friends are in different departments. To resolve this, I will host digital and/ or physical get-togethers in the MIE Common Room to make it easy for newcomers to integrate and allow us to have a small social break from the workload.

[*] Implementation 3: Radar on Opportunities and Policy

From feedback, many of you are eager to be in the know of Social, Networking, Research and Career Events; reminded of major deadlines and urgent information; and informed on academic policy changes. I'll be disseminating these as they come, throughout the year.

Mineral 2nd Year Representative

Jimin So

Voter Statement:

Hi! I'm Jimin, a second-year Mineral Engineering student. I want to help make sure our class has a clear voice and that students' questions, concerns, and ideas are heard. I'll focus on communication, sharing important program updates, and creating more opportunities for our program to connect with each other and with people in the mining industry. I'm happy to listen to any feedback throughout the year. If you have any questions or suggestions, feel free to reach out to me at jimin.so@mail.utoronto.ca.

Platform:

My goal would be to help strengthen communication between students, faculty, and our program while making sure our year's concerns and ideas are represented.

1. Better communication

Share important program, course, and departmental updates and make sure students know where to find academic and program resources.

2. Stronger connections

Encourage opportunities for second-year students to connect with upper-year students and organizations in the mining industry. I will support events that help us learn more about different areas of mineral engineering and potential career paths and help create a welcoming environment for students in our program.

3. Student feedback

I will try my best to be approachable and available to hear questions, concerns, gather feedback throughout the year and communicate relevant responses and updates back to the class.

4. Supporting our program community

Mineral engineering offers many different paths, from business and processing to environmental work and beyond. I would like to help create opportunities for students to learn about these possibilities and connect with people in the industry and our broader engineering community.

I will make sure to be a reliable contact for our second-year class and help make sure the class' experiences and perspectives are heard.

MSE 1st Year Representative

Nathan Chen

Voter Statement:

Hi MSE! I am Nathan Chen, running to be your first-year representative. I am focused on delivering results to make your first year here as memorable and less-painful as possible! I will be representing the first-year body as your voice, making sure that your invaluable suggestions are heard. But my role is not just to represent you, but also to host community events to ensure we maintain our vibrant social scene at this university and to improve your experience here. Vote Nathan Chen for your 1st-year representative for a more interconnected department! Contact me: tongyu.chen@mail.utoronto.ca

Platform:

Hi everyone! My name is Nathan Chen, and I am running to be your MSE first-year representative. As our community continues to grow, we need a strong voice and leader to ensure our voices are heard in the engineering society, our needs are met, and our influence expands. I have represented student bodies before in high school, serving as club presidents and leading events; I recognize the needs of students and how to deliver practical results to improve your lives here at the University of Toronto. I am running for MSE first-year representative to make your first-year experience stand out and as memorable as it can be. As many of you realize, a strong department is built on strong community connections. I want to make sure that MSE is not just a place where we take classes together, but also where we can build memories together. I want to organize community events and socials often to help us unwind after stressful exam seasons. I will keep the MSE first-year body updated on changes made by the engineering society and maintain an anonymous feedback channel to ensure everyone's suggestions are heard properly. Speaking of unwinding, we all realized after the first couple of weeks that engineering is stressful, but scheduling shouldn't add more pressure on top of it. My primary academic goal is to work with course directors and the department to make sure that schedules and due dates are as flexible as they can be; this can hopefully improve everyone's chances to succeed academically. On top of this, starting university can feel overwhelming, and everyone's perspective and input matter; it is my job to ensure that your opinions as first-years are not unheard. As first-year representative, it is my wish and responsibility that everyone has the best possible experience here, so I will bring everyone's suggestions to the engineering society, and changes can be made accordingly. I am committed to being a driven and responsive representative for every student in their first year in

MSE. Together, we can build a more supportive academic environment and a close-knit community. I would be honored to have your vote in this upcoming election. And if you have any questions, concerns, or suggestions, please feel free to reach out anytime, any day from now on at my email: tongyu.chen@mail.utoronto.ca

MSE 2nd Year Representative

Tiago Loureiro

Voter Statement:

Hi everyone, I'm Tiago, a 2nd-year MSE student running for our Class Representative. MSE is a small, tight-knit discipline, but I think we can do more to bring our year together! Whether that's through study sessions, social events, or just better communication about what's happening in the department. My goal is to build a more connected, unified MSE community where everyone feels like they have a voice and a place to turn to. I'd love your vote to help make that happen. Questions or ideas? Reach me on Instagram @sporting_tl7. Can't wait to get to know you!

Platform:

Hi Everyone, I'm Tiago and I'm running to be your second year MSE Rep! My focus is bringing our year together. I want to see more casual hangouts, study sessions, socials, and low-key events where people actually get to know each other. I also want to improve communication, so everyone hears about important deadlines, events, and opportunities like research positions, and internships. I want to be someone you can actually talk to if you have a concern about a course, professor, or department decision, and who will follow up and advocate for you. And no matter what path you're on within MSE, research, industry, business, or anything else, I want us to still feel like one united class.

I've seen how much of a difference a strong community makes, through my own coursework, work experience, and personal projects. Our program is demanding, and it's a lot easier to get through it with people who have your back. I want that for everyone in our year!

I'm just trying to be a consistent person who works to keep our year connected and make sure nobody feels left out.

Reach out anytime on Instagram @sporting_tl7 or in class, I'd love to hear your ideas.

TrackOne 1st Year Representative

Ria Tayade

Voter Statement:

Hi TrackOne!! My name is Ria, and I could not be more excited to run for your first-year class representative! Throughout high school, I really loved to get involved in my school community. As valedictorian and chair of student council, I gained several experiences in organizing events

and bringing student ideas to life. As your representative, my goal is to make sure everyone feels supported and comfortable voicing their ideas and concerns, while keeping you informed throughout the year! It would be an honour to represent you all, and feel free to contact me @ria.tayade or ria.tayade@mail.utoronto.ca!

Platform:

Starting university is a huge transition for us, and my goal is to make sure that first year feels like much more than adjusting to hard courses and finding your way around a huge campus. I'm running for TrackOne class representative because I want to help create a community where we can all feel connected and supported throughout. One of my biggest priorities is that students will be able to voice their academic concerns. Coming with different high schools, curriculums, and backgrounds in learning, it can be difficult to get familiar with the new system. We will all have those courses where the teaching style, organization, or communication may not work well with us. And although we can definitely work through these for certain situations, students should always still feel comfortable expressing their experience, especially if it's making it harder for them to learn. As TrackOne students, we all are starting with a common foundation before moving into our disciplines. This makes our academic experience even more important; it builds the foundation for everything that comes after and can play a part in making or breaking our decision. All of us should feel like we are getting the skills, support, and resources that we need to reach success in our first year. My goal is to make sure that any of these concerns and ideas are communicated properly through the right channels. Not only this, but I would also like to help students understand the different feedback systems, extra help, and academic solutions that are available to them. And if just getting up for a 9 a.m. course isn't enough, university does have a countless stream of events and opportunities, which often have deadlines that may be hard to find. I want to help make this communication clearer for everyone by sharing all relevant updates that are of interest, and making sure students know where to go when they need help. Academics are most definitely important, but university is about the community around you as well. I want to make sure every student feels like they can connect with others outside of the classroom through various group events, study sessions, and opportunities. I'd like to promote this collaboration among us, and foster a culture where we can help, learn, and support one another. While beginning university can be intimidating, my goal is to help create this strong community to make the transition easier. As a chair of student council in high school, I know and have learned that representation doesn't mean making decisions and speaking for people without asking and knowing what they truly care about. It's about listening, identifying these concerns among all of us, and making sure that they reach the individuals that can help us. I'm running because I'm willing to listen, communicate, and advocate for you. My goal is to make sure TrackOne is more connected, informed, and responsive, and I want you to know that your voice has somewhere to go.

Mashrur Mahtab

Voter Statement:

Hellooo everyone, I'm Mashrur, and I'm running to be your TrackOne Rep.

More so than a candidate, I hope to be a friend you can comfortably reach out to and crash out

over APS110 with. Someone who will genuinely address the issues you face in class. Whether it's an idea or a course concern, I promise to make sure your words are heard. Since we're the last TrackOne batch, I hope to make this year truly memorable for all of us in TrackOne.

So yeah, even if we're the LastOne, let's all make this TrackOne the absolute BestOne.

Insta: mashrur_mahtabs

Platform:

Hellooo everyone, I'm Mashrur, and I'm running to be your TrackOne Rep.

More than just another candidate, I hope to be a friend you can comfortably reach out to and crash out over APS110 with. Whether it's a course concern or an idea to make TrackOne better, I promise to make sure your voice is heard. My goals as Rep will centre on 3 things: Academic Advocacy (AA), Consistent Communication (CC) and Ensuring Everyone Enjoys (EEE)!

Starting with AA, I plan to take the responsibilities seriously. I'll raise any academic issues our class faces and make sure they reach the people who can address them. I'll try to spot potential issues early and act before they affect everyone. I will attend all the Class Rep meetings and plan to opt into the faculty council because I want to make a real impact and ensure everyone's voices are heard and represented.

Coming to CC, since we already have an Instagram GC, I'll share important announcements and updates there regularly. Since some people don't use Instagram, I'd also discuss creating a WhatsApp group for the same updates. The beauty of TrackOne is that we are a relatively small discipline, which makes it genuinely possible to hear everyone out and ensure that each person feels included.

Lastly, EEE! I hope to work closely with EngSoc and the TrackOne Club to help organise existing socials, such as the TrackOne Dinner. If approvals allow, I would also love to arrange socials and study events of our own (with pizza hopefully). TrackOne is already a close community, and I want to help make it even more tightly knit while ensuring everyone feels welcome and enjoys themselves.

I've already started taking initiative to improve our academic experience. Recently, I gathered feedback from classmates and contacted our first-year advisor and Linear Algebra professor to request moving our Thursday MAT188 lecture from SU120. Because of the room's layout, students at the back struggled to see and hear the professor. A few students couldn't find seats, and the tables/chairs were uneven. I felt that this issue needed to be addressed before our next lecture, as it directly affected everyone's ability to learn.

In high school, I served as president of multiple clubs and member of my school's student council. So I know how to navigate student leadership. I've also seen what happens when student leaders

become distant, and I know how frustrating it feels to have your concerns dismissed. Because of this, I know the mistakes I want to avoid. I hope not just to be a class representative, but a friend first who genuinely listens and follows through.

Since we're the last TrackOne batch, my main goal is to make this year truly memorable for all of us. Even as we enter different disciplines next year, I hope the memories we make will stay with us.

So yeah, even if we're the LastOne, let's all work together to make this TrackOne the absolute BestOne.

Civil Club Vice Chair

Victoria Ferreira

Voter Statement:

Hi! I'm Victoria and I am running for Civil Engineering Club Vice-Chair for the 2T6-2T7 Skule year! I am currently the 3rd Year Class Representative and CivClub Social Director, gaining experience communicating student concerns, organizing events, and working with our faculty. As Vice-Chair I will ensure we have an enjoyable year alongside our demanding workload. Holding these roles together would ensure a more direct line of communication between students, CivClub and Faculty. I am excited to bring in new ideas, listen to your feedback and concerns to ensure our voices are heard! Email me anytime, v.ferreira@mail.utoronto.ca!

Platform:

Hey fellow Civs! You may already know me, as I am currently the 3rd Year Class Representative, CivClub Social Director and one of the Concrete Directors on the Concrete Canoe Design Team. In addition, you may have also seen me during our course introduction sections helping you prepare for 1st or 2nd year and I am also behind some of the posts you see on our instagram! If not, HI, my name is Victoria and I am running for the Civil Engineering Club Vice-Chair position for the 2T6-2T7 Skule year! Through these roles and responsibilities I have been able to work closely with other Civil Engineering students, the Faculty and CivClub, all while organizing the CivClub events throughout the year, communicating student concerns and bringing my fun ideas to life! From my roles I have gained skills in communication, leadership and problem solving which I hope to bring into the CivClub Vice-Chair position.

I am running for Vice-Chair as I want to continue to make an impact and ensure our voices are heard within the faculty. By being 3rd Class Representative and CivClub Vice-Chair, this would allow for a direct line of communication with yourselves and the Faculty, ensuring concerns, ideas and feedback are recognized promptly.

In addition, I want to ensure that this year is as enjoyable as possible no matter where you are at in your degree, while considering our demanding workload. With my role as social director, I have been planning the CivClub events such as the annual (and best) Dinner Dance! I want to

continue creating more ways for the Civil Engineering body to meet and connect in a fun and inclusive environment.

I am eager to bring my energy, experience and fun ideas as Vice-Chair. BUT, most importantly, I want to deliver what you need and want from CivClub to improve YOUR experience. Whether it is a new event, any academic concerns or an idea you think we should incorporate, I would love to hear it and help make it happen!

ECE Club Finance officer

Parth Bhambi

Voter Statement:

My name is Parth Bhambi, and I'm a third-year Computer Engineering student running for Finance Officer. I want to help manage the club's finances responsibly and make sure our funding goes toward useful events and opportunities for ECE students. I'm willing to put in the work to support the club and its members. I'd really appreciate your vote!

Contact: parth.bhambi@mail.utoronto.ca

Platform:

If elected Finance Officer, I want to make sure the club's money is managed responsibly and goes toward events and opportunities that actually benefit ECE students.

I would focus on:

- Keeping financial records organized and up to date.
- Creating clear budgets for events, workshops, competitions, and other activities.
- Making sure funding is used fairly and responsibly.
- Looking for sponsorships, grants, and other ways to bring in more funding.
- Supporting affordable or free events so more students can participate.

As a third-year Computer Engineering student, I really understand how valuable technical events, networking opportunities, and hands-on experiences can be. I really want to help the club organize more of these opportunities while making sure we use our budget carefully.

EngSci Academic Officer

Nicholas Ali

Voter Statement:

Hey EngSci!

EngSci has a lot going on academically, from new developments like the Transportation Major to

ongoing ones...upper years you know what I'm referring to.

As someone who was is on both Academic Advocacy committees, the Undergraduate Assessments Committee, and the Club Affiliation Committee this year (and last year, though I was on the Appeals Board (AAB) instead of the Assessments Committee (UAC)) I have extensive experience in this department. If you've met me, you know my leadership skills are more than up to the task *cough cough Skule Patrol Co-Director*

I hope my involvement in the Skule community at large gives you a sense of how I would act in this critical role, and I hope I've convinced you to vote for me! You can reach me via email at nich.ali@mail.utoronto.ca or via instagram at @d4rkst4r999. See you at the polls!

Mech Club Chair

Akshat Gandhi

Voter Statement:

Hello, I'm Akshat! I've been involved with Mech Club for a few years now, and I'm using that experience to run for Mech Club Chair! On the top of my list of priorities are FINALLY fixing the pool table at the common room, bringing together a really nice research panel this year, and updating the website with more resources (especially for 4th years). If you want to contact me, email me at ak.gandhi@mail.utoronto.ca or send me a DM on Discord @maplespace_ :)

Platform:

Hello, I'm Akshat! I've been involved with Mech Club for a few years now, and I'm using that experience to run for Mech Club Chair!

Here is my platform:

- Fix the pool table at the common room
- Bring together a really nice research panel this year
- Update the website with more resources (especially for 4th years) and better utility for Mech Club (hopefully making it a one stop shop for most things you would need)
- Gather feedback on the new mech curriculum changes to see what issues may be arising
- Create a greater connection between students and faculty
- Add a better transition for upper years (mainly through the website)

If you're interested in the above, please vote for me :)

Mineral Club Vice President Academic

Frank Shu

Voter Statement:

Hi, I'm Frank Shu, a fourth-year Mineral Engineering student. If there's a confusing course requirement, deadline, or academic question, I'm probably already asking about it too.

After a year on PEY and returning for final year, I've seen both the academic and industry sides of mining. As VP Academic, I want to help make student feedback heard, academic information easier to navigate, and opportunities in research, courses, and careers more accessible.

Questions, ideas, complaints, or just want to chat? Reach me at: jingwei.shu@mail.utoronto.ca/js36940(INS)

Platform:

As Vice President Academic, I want to make the academic side of Mineral Engineering easier to navigate and more connected to research and industry.

My priorities are:

Better academic communication — Help make course requirements, thesis information, deadlines, electives, and other academic resources easier to find, while bringing recurring student concerns to the department.

Better use of academic spaces — Advocate for fair and practical access to spaces in the Mining Building, especially the fourth floor, while helping address overcrowding and maintaining a productive environment for students using the space for coursework and research.

More research and lab opportunities — Improve awareness of undergraduate research, lab, thesis, and volunteer opportunities, and help students better understand how to get involved.

More industry exposure — Support technical talks, company and mine visits, alumni connections, software workshops, and other industry-related activities that help connect classroom learning

with real mining work.

After completing a mining engineering PEY and returning for my final year, I hope to help make our program more connected, practical, and easier for students to navigate.

Lucy Paventi

Voter Statement:

Hi! My name is Lucy, and I am a third-year Mineral Engineering student! I want to ensure every student feels heard and supported throughout the academic year. As your representative, I will actively monitor course progress, gather feedback, and raise concerns with instructors and department leadership. I will work to identify scheduling conflicts, unclear expectations, and recurring course issues early, while advocating for fair and practical solutions. I also plan to communicate updates clearly, escalate unresolved concerns when necessary, and document outcomes for future class representatives. My goal is to build a more responsive, transparent, and supportive academic experience for our entire class and wider community.

First Year Chair

Jay

Voter Statement:

Hey, I'm Jay! My first few weeks at UofT already beat four years at Waterloo... turns out, you CAN have great career prospects without sacrificing your hair and personality. I'm running for First-Year Chair to keep UofT on top. As your rep, not only will I foster engaging events, but also create a community for everyone to feel safe, comfortable, and create long lasting memories. So, what are you waiting for? Vote Jay Li for First-Year Chair! Got questions or ideas? Slide into my DM's on Instagram [@jia_xin.512](https://www.instagram.com/jia_xin.512) or Discord [@_6._.9_](https://discord.com/users/619999999)

Mashrur Mahtab

Voter Statement:

Hellooo everyone, I'm Mashrur, and I'm running for First Year Chair!

First year should be more than lectures and crashing out over exams. I want to organise fun events where people from every discipline can meet. Everything from food events to First Year Prank! More than just another candidate, I want to be your friend. I want to ensure that our first year together is truly memorable. Having led clubs and organised large events before, I know how to turn fun ideas into even more enjoyable events.

So yeah, let's make our Year One the most Enjoyable One!!

Insta: @mashrur_mahtabs

Platform:

Hellooo everyone, I'm Mashrur, and I'm running to be your First Year Chair in EngSoc!

First year should be more than lectures and crashing out over exams. I want to organise fun events where everyone from every discipline can meet and gather. Everything from food events to the First Year Prank and Godiva Week Chariot Race! More than just another candidate, I want to be your friend and ensure that our first year is truly memorable.

I don't just want to organise events. I want to do them right. I'll ask first years what they actually want. I'll use social media polls and forms. I'll also plan everything early and promote it clearly. I'll think about the timing, cost, safety, and accessibility of every event. For bigger traditions, I'll work closely with EngSoc. I'll also build a reliable team to help. Events should be fun, organised, and welcoming to everyone.

I know what goes on behind the scenes of an event. Through student government and my clubs, I helped organise theatre shows for over 500 people. I also helped with MUN conferences and sports events. I've managed budgets, food, hospitality, and logistics. I've also dealt with the random problems that always appear at the last minute. A fun idea is only the beginning. Good events also need, teamwork, and someone willing to stay on top of everything

First year will probably be stressful enough, so I want to make sure that when we look back, we remember more than just the rough bits. Whether it's through food or fun, my goal is simple.

Create moments that bring us closer together. I'm not looking to reinvent the wheel, but I plan to make sure it keeps moving better than ever. If elected, I'll put in the work behind the scenes to make those moments happen and ensure everyone feels welcome and enjoys themselves

So yeah, let's make our Year One the most Enjoyable One!!

Rodrigo Godoy Fonseca

Voter Statement:

Hey Skule! I'm Rodrigo, an international student from Brazil, running to be your First Year Chair.

My duty is bridging Frosh needs with EngSoc resources to improve student life and arranging events to connect. Moving to a new country and starting U of T Engineering showed me transitions are tough, but great people make it conquerable. My goal is ensuring every first-year

feels heard, supported, and connected. I'll advocate for better academic resources, fun events, and transparent communication. I look forward to hearing your views and improving the First Year experience! Reach me through instagram: rogo_fonseca

Platform:

Hey Skule!

My name is Rodrigo, and I am determined to improve student life quality as a First Year Chair. Not long ago, I packed up my life in Brazil and moved to Toronto to join U of T Engineering. Like many of you, I realized that the transition to university comes with many challenges. Changing course loads from high school, making entirely new friends or reconnecting with old acquaintances and managing deadlines, it's easy to feel overwhelmed. As a first year, I understand our struggles, and I am certain nobody should have to navigate first year alone. That is part of the responsibility of the First Year Chair.

I am running for this role because I want to be a strong advocate for our class and make sure engineers aren't all going to end up bald and beardy by the last year. I want to push for real improvements to our daily lives as students by connecting students with the resources available by the community made for us. If elected, my platform focuses on three main pillars:

1. Strong Academic & Mental Health Support: First year is rigorous, but it shouldn't break us. Making sure students have a clear understanding of their workloads, mental health resources and ways to make real change for the faculty will be central with my responsibilities.
2. Building a Connected, Inclusive Community As an international student, I know the feeling of coming to a new country ready to start a completely new social life. Part of my duty will be organizing first-year events for everyone who wants to enjoy their first year, whether you commute two hours from the GTA, live in residence, or have flown across the world to be here. From classic Skule traditions to parties, I want to create opportunities to make first year enjoyable.
3. Transparent & Approachable Leadership: We all deserve to know what EngSoc is doing for you. As your Chair, I will make sure all voices, be them complaints or innovative ideas, are taken directly to the decision-makers. I will provide regular, jargon-free updates on what the Board is working on so you are never left in the dark.

The first year sets the tone for our entire degree. I want to make it a year where we don't just survive the engineering grind, but have fun while doing so.

I make a statement to always be open to hearing from you. If you have any questions, ideas, or just want to chat about ranking food trucks, please reach out!

Marium Ahmed

Voter Statement:

Hi! I'm Marium, a Computer Engineering student running to be your ECE First-Year Representative! I believe in putting the student body's rights first, and making sure your concerns are heard by EngSoc.

Before UofT, I served as Head Student Senator, representing 3,000+ students at the board level. I spearheaded a policy change that allowed all students to vote for their Student Trustee.

I hope to bring this experience to ECE-3T0 and be someone you can trust with concerns, questions or help finding resources.

Reach me on Instagram @_mari._26 or at mariumah.ahmed@mail.utoronto.ca

Platform:

Hi! I'm Marium, a Computer Engineering student running to be your First-Year Chair! I believe in putting the student body's rights first, and making sure your concerns are heard by EngSoc.

As one of your Chairs, I'm dedicated to ensuring that Engineering students are informed and that our opinions are heard on matters that affect us. Whether that means continuing discussions for better access to OSAP grants and financial resources, supporting student groups and opportunities, or defending students' right to protest, I want to ensure that our voices are represented where decisions are made.

I recognize that first-year Engineering can be difficult. However, you shouldn't have to navigate it on your own. By making sure first-year students are prioritized when it comes to academic, identity, mental health, disability, and extracurricular resources, I hope to help create an environment where every student has the support and information they need to succeed, no matter their situation. Through my platform, I hope to connect first-year students with resources made specifically for them, such as workshops, additional review sessions, and opportunities to meet TAs and upper years. Each of these can help build a stronger community and combat imposter syndrome among first years.

Finally, I hope to bring more AI accountability to the faculty. As AI becomes increasingly present in education and Engineering, we deserve clear information about how it is being used and how it affects our learning – aside from that one lecture in APS100. I hope to connect students with resources and discussions that help us understand AI's role in our education, future careers, and the world. This includes fully understanding the AI resources that come with our student IDs, holding professors and TAs accountable for their use of AI, and promoting its fair and informed use across campus.

I bring several years of experience in student leadership, advocacy, and fighting for change to this role. Before UofT, I served as Head Student Senator of my school board, representing over 3,000 students. As Head Senator, I spearheaded a policy change that gave all students the right to vote for their Student Trustee and autonomy over their education.

This experience taught me the importance of listening to students equally, bringing their concerns to decision-makers, and putting student experience first rather than the interests of decision-makers.

I have also held leadership positions in robotics, mentoring, press, and youth organizations, where I developed skills in teamwork, outreach, mentorship, and community-building.

I hope to bring these skills to ECE-3T0 and be a representative who is approachable, communicative, and genuinely responsive to the students I represent.

If elected, I want to make sure you know where to find support, know that your concerns are being heard, and know that you have a meaningful voice within the Engineering community.

You already have a voice. I want to make sure it's heard.

You can reach me on Instagram at @_mari._26 or by email at mariamah.ahmed@mail.utoronto.ca for more information.

Fourth Year Chair

Grace Huang

Voter Statement:

Fourth year is our chance to celebrate everything we've accomplished together! As a Spirit Head, I've loved being part of the traditions that make Engineering so special, and I want to bring that same energy to our graduating class. I'll work to make our Iron Ring, graduation events, and traditions as fun, memorable, and inclusive as possible.

Let's finally get that damn IRON RING and have some freaking FUN!
Questions? Email me at gracexyd.huang@mail.utoronto.ca

Platform:

In second year, I started a little tradition in INDY. Before every exam, when everyone was sitting in the exam centre with their nerves at their highest, I would stand up and say, "Good luck, class!"

It was a small thing, but I loved seeing how something so simple could bring everyone together for a moment before we all went through the same stressful experience.

Since then, I've come to really appreciate the traditions and little moments that make Engineering feel like more than just a degree. As a Spirit Head, I've had the chance to be part of many of those traditions, and I want to bring that same spirit to our final year.

As Fourth Year Chair, I want to make sure we have an amazing time celebrating everything we've accomplished together. From Iron Ring and graduation traditions to the little moments throughout the year, I want to help create experiences that are fun and memorable for everyone.

Let's finally get that damn IRON RING and have some freaking FUN!
Questions? Contact me at gracexyd.huang@mail.utoronto.ca or @gracehuang158 on Instagram

Naz Saral

Voter Statement:

Hi! I'm Naz, a fourth-year Industrial Engineering student running for Fourth Year Chair! Over the past three years, I've been involved in the engineering community through IndyClub, design teams, and the MIE Staff-Student Council. As Communications Director and Social Director for IndyClub, I've worked to create opportunities for students to connect, build community outside the classroom. I've also represented student perspectives in conversations with faculty and department leadership. As Fourth Year Chair, I'll bring that experience to EngSoc, advocate for our graduating class, and help make our final year together as wonderful as possible :) Feel free to connect with me on insta @naz.saral_

Platform:

Hi! My name is Naz, and I am a fourth-year Industrial Engineering student. I am excited to be running for Fourth Year Chair and for the opportunity to represent graduating engineering students during our final year at U of T.

Over the past three years, I have made it a priority to be involved in the engineering community through student clubs, design teams, and leadership positions. Most notably, I have been heavily involved with IndyClub, our discipline club, where I have served as both Communications Director and Social Director. Through these roles, I gained experience creating opportunities for students to socialize, network, and connect with one another beyond the classroom. I have seen firsthand how important a strong sense of community is, especially within engineering program.

My involvement with IndyClub also gave me the opportunity to serve on the MIE Staff-Student Council. In this role, I participated in broader conversations within the department, connected with professors and department leadership, and helped communicate the concerns and perspectives of students. This experience taught me how to listen to my peers, bring their feedback forward, and work with faculty to ensure student voices are represented.

As Fourth Year Chair, I want to bring these experiences to the broader engineering community. Our final year is incredibly unique: we are balancing capstone projects, demanding courses, job searches, graduate school applications, and major decisions about what comes next. At the same time, it is our last opportunity to enjoy the traditions, friendships, and community that have shaped our undergraduate experience.

I want to make sure fourth-year students feel heard, represented, and connected throughout that transition. I would advocate for the concerns of graduating students within EngSoc while also helping create meaningful graduation-related events, traditions, and opportunities for us to come together as a class.

After three years at U of T Engineering, I want to make the most of my final year by giving back to the community I have been a part of and helping make our graduating year one that we can look back on. I would be incredibly excited to represent you as Fourth Year Chair!

Keira Foti

Voter Statement:

We are almost done! But... there is still a lot to look forward to in our last year at Skule! As fourth year chair, I would represent our class in fourth year specific academic matters, clearly communicate any important deadlines, plan our iron ring ceremony, and (most importantly) plan an awesome party for us all to celebrate our achievements. Please feel free to reach out to me on instagram @keira.foti with any questions or concerns, and enjoy your last year!

Platform:

As fourth year chair, my responsibility is to be your voice! I will be your advocate for any concerns, academic or otherwise. You can reach me through social media or email, and I will do my best to bring any concerns to the faculty as soon as possible and work with them on a solution. I have previously sat on the MIE student-staff council and am familiar with the process of bringing up any concerns.

I am also in charge of organizing our iron ring ceremony. I will ensure that all dates and deadlines are clearly communicated, and that there are plenty of ring sizings beforehand!

My main goal for this year is to keep you all informed on everything that is going on, and make this year run as smoothly as possible. I know we are all busy, so I will try to make things as easy as possible through working with the faculty, your class reps, and any of you that have feedback or suggestions!

Please consider voting for me as your fourth year chair!
