

It has been a challenging few academic school years due to COVID-19. It seems fitting to send a message of thanks to all CSD school nurses, but it is one nurse I would like to extend extra gratitude, admiration, and appreciation to. I would like to recognize Nurse Moore for helping to make the community I live in better.

As a student, I have been able to see the impact Nurse Moore has made on student lives, health, and education. While I can only imagine school nursing is always challenging, considering the nurses had to expand their roles and responsibilities during a surging pandemic. Through all this Nurse Moore problem-solved situations where there were no definitive answers all while servicing the schools and community.

Nurse Moore's efforts included many COVID testing drives, this helped my community tremendously due to the lack of transportation to get to some COVID-Sites.

Nurse Moore also coordinated a back-to-school drive with some great community partners to ensure the families in my community did not have to worry about haircuts, sports physicals, school supplies, and other back-to-school essentials.

(We even had an opportunity to get whatever we wanted for the food truck that day!) and this was all done during the height of the pandemic.

Nurse Moore also provided an opportunity for us to see the Universal Soul Circus. It was great seeing individuals that looked like me putting a smile on many kids' faces during such an uncertain time and ...

Just last week Ms. Moore coordinated a COVID drive that gave city residents an opportunity to get \$100 when they went to get their COVID- Shot.

This helped a lot of families out. (I do not know anyone who could not benefit from an extra \$100 dollars) I look forward to seeing what Nurse Moore Has up her sleeve for next school year! Thank you, Nurse Moore, for your deliberate contribution to making the residents of my community feel we matter.

Thank you!
Justin Patton
