EXPERIENCE

Junior Software Developer (*Freelance & Open Source Collaboration*)

 2023 – Present

- Collaborated with peers to develop and enhance software applications.
- Contributed to **open-source projects**, learning from and working with developers worldwide.
- Developed a **simple shell clone**, gaining hands-on experience in system programming and command-line tools.
- Built an **Airbnb clone**, focusing on backend logic, database management, and authentication.
- Worked in **Agile development** environments, adapting to fast-changing project requirements.

Student Software Developer – ALX SE Program

 2022 – 2023

- Studied software engineering fundamentals and worked on team-based coding challenges.
- Strengthened programming logic, debugging, and problem-solving skills through real-world projects.
- Gained experience using **Git, Bash scripting, and version control workflows** in team collaborations.

SOFT SKILLS

- Collaboration & Teamwork
- Problem-Solving & Debugging
- Strong Communication
- Adaptability & Willingness to Learn

CERTIFICATIONS & TRAINING

- **Software Engineering** – ALX SE Program
- **Web Development** – Self-Taught
- **APIs & Web Services** – Independent Learning

LANGUAGES

English, French (Still building fluency)

EDUCATION

University Of Nigeria, Nsukka— *Bsc. Computer Science*

 2022 - Till Date

PROJECTS

Simple Shell Clone

- Implemented core **Unix shell** functionalities using **C programming**.
- Developed **command execution, piping, and process management** features.

Airbnb Clone

- Built a **full-stack application** with **backend logic and database integration**.
- Worked on user authentication, property listings, and a reservation system.

Portfolio Website

Developing a personal blog and portfolio to showcase projects and technical articles.

Integrating a **rich text editor** for writing and publishing directly on the website.
