

LIGHT+VIBROTACTILE

VIBRO-PACK

Packing good vibes!

This is a Vibro-Pack. It takes sounds, music, and other auditory events, and converts them to vibrotactile sensations. It also uses integrated lighting to convey emotional cues and intensity.

Imagine a Vibro-Pack on your lap in a theatre, dance performance, orchestral

symphony, or even on your couch with a playlist of soothing meditations.

How does this make you feel? What other sensations emerge in your body?

The Vibro-Pack is still a prototype. We welcome your impressions, suggestions, and inspirations. Leave a note in the book provided, or make an ASL video message and send it to general@invisiblepractice.ca!

- 1. Pick up a Vibro-Pack. Mind the cables.**
- 2. Hold it in your hands or lap. Or flip and hold it against your chest - anywhere, anyhow!**
- 3. Enjoy the pre-programmed loops.**
- 4. With a friend? Share a pack, and see if you react differently to the same sensations!**

Vibro-Pack designed by Judah Truong.
