Best Webflow **Logo Section** Cloneables

While by nature, logo sections are very simple - they can bring loads of credibility to any website. Showing who you work with and who trusts you to work together is a great way to convey loads of information with just a few simple logos.

Logo sections in Webflow are quite easy to make and there's so many different ways to get the same result. Like with everything - some ways might be better than others and it all depends on the design and solution we are seeking.

Free **Logo Section** Cloneables for Webflow

We reviewed most Webflow cloneables that have logo sections in them and selected a few that stood out. Some of these will be developed differently than others, while some just be pure showcases of uniqueness and creativity! To save time, see what you will find below and use links to learn more about each logo section:

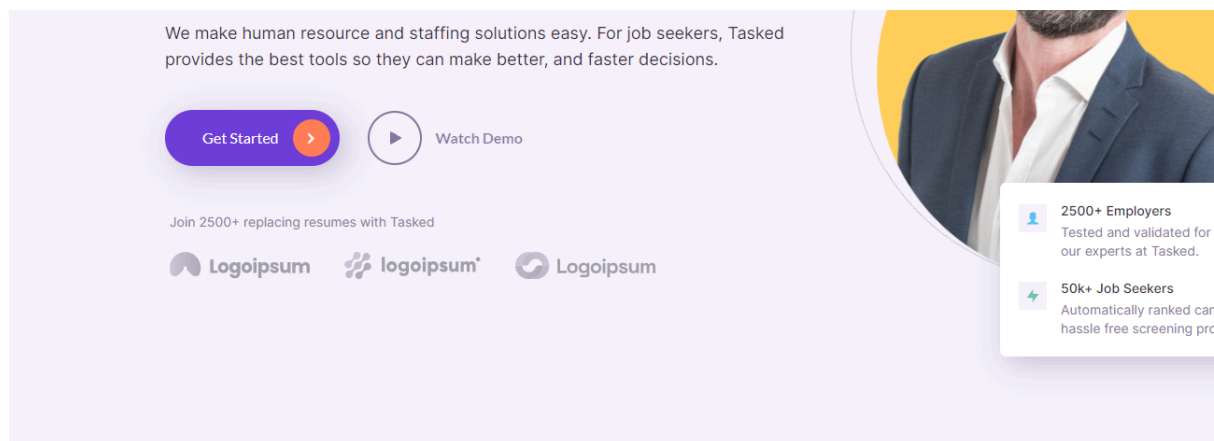

- [Standard landing page logo section used below hero section](#)
- [Logo section that utilizes fonts instead of images](#)
- [Hero section that has logo section in it \(for loads of logos\)](#)
- [Hero section that has logo section in it \(for 1-2 logos\)](#)
- [Simple logo section that is separate from hero section](#)

Job Portal Logo Section Cloneable by THS

<https://showcased.webflow.io/projects/Job-Portal-Design-2-Cloneable-Hera-Section>

This is a great cloneable example where the logo section is not a separate section, but is conveniently placed with everything else in the hero section. If you need to showcase a list of logos above the fold, this is a great example of how to do it!

It has 3 logo fields and can work for most different types of websites. It's set up with enough wrappers so adding or removing logos will be easy. This means you can adapt to any build you are working on!

What is in this **Logo Section**?

Wrapper with 3 logos that is incorporated into the hero section.

What is this **Logo Section** best for?

- ✓ Great for a quick mockup design
- ✓ Builds where you don't want a separate section showcasing logos

Logo Section Pros:

- ✓ Very neatly organised hero that can work for different types of websites
- ✓ Easy to adapt from 3x logo set to any other logo count

Logo Section Cons:

- ✗ Not done with Client-First so you might need to work on the class naming convention

Bottom line:

😎 Use this **Logo Section** if you don't want logos to be showcased in a separate section, but rather be a part of a well designed hero component.

Classic SaaS Style Logo Section Cloneable by 3SIX5

<https://showcased.webflow.io/projects/Cloneable-Hero-Section-l2udtwji>

This is another way you can add logos to the hero section instead of dedicating a separate section for that. Easy way to show credibility of the business and do all that before the fold. Design of this cloneable is quite simple, so it can be as easy as copy paste and change classes for simple website builds!

It's a perfect choice if you just need to show one or two logos. While you can add more than just 2 logos to this section, anything above 4 might break the design, so keep that in mind if you plan to pick this hero for your next build.

Make a great landing page 🥳

Welcome to the UI Kit series made for landing pages – throughout this series, we will be releasing freebies along with educating you on what makes a high-converting landing page.

Trusted by  logoipsum  logoipsum

What is in this **Logo Section**?

Trusted by the logo section inside the hero.

What is this **Logo Section** best for?

- ✓ Simple Webflow sites or quick mockups
- ✓ Website that need trusted by logo section but have only one or two partners to showcase

Logo Section Pros:

- ✓ Very simple design so can work for many different website styles and industries
- ✓ Looks as a separate small section on mobile view

Logo Section Cons:

- ✗ More than few logos can break this design

Bottom line:

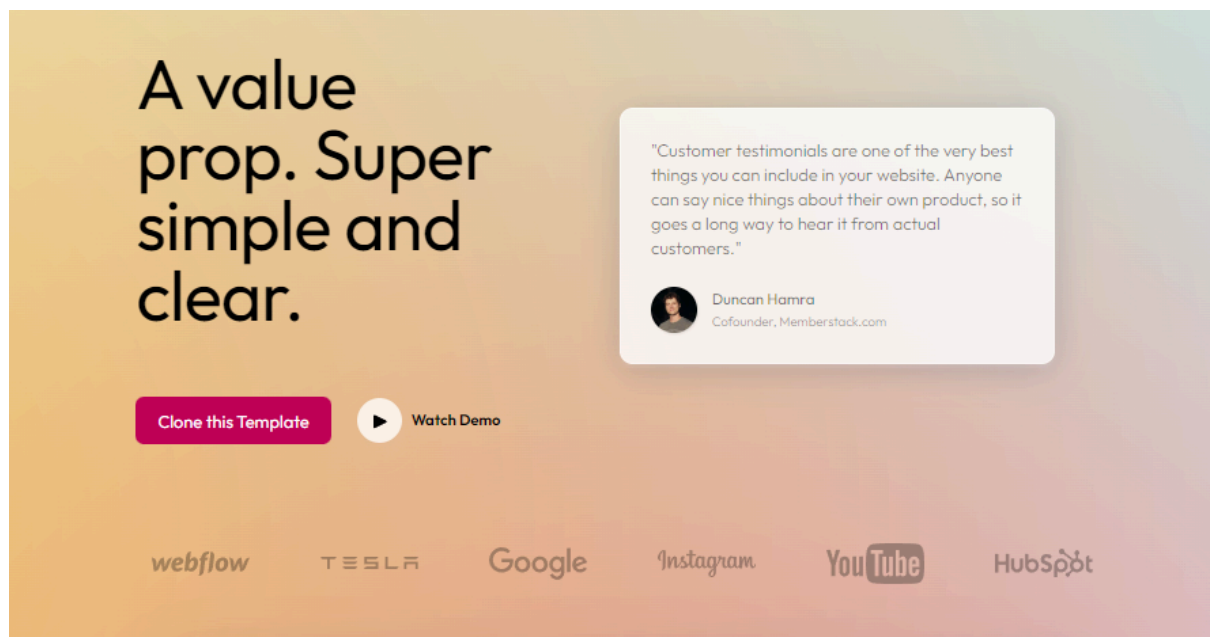

🕶 Use this Logo Section if you are working on a quick or simple website build and could use this hero as a starting point.

Landing Page Logo Section Cloneable by Duncan Hamra

<https://showcased.webflow.io/projects/Beautiful-Template>

This is your classic logo section design that we are all used to seeing. It utilizes flex to set layout that will work for up to 6-7 logos. Best part with this setup is that even if you need just 2-4 logos in your section, it will still look amazing on all devices.

Because of the simple and very functional setup, it's easy to reuse this hero and delete everything to just keep the logo section. So don't be scared even if you are a complete Webflow beginner - clone this template and reuse it however you like!

What is in this **Logo Section**?

Responsive logo section that can fit 2-7 logos.

What is this **Logo Section** best for?

- ✓ Classic logo section designs
- ✓ Layouts that need flexibility (different amounts of logos)

Logo Section Pros:

- ✓ Can fit almost any type of Webflow website
- ✓ Can work as hero design or standalone logo section

Logo Section Cons:

- ✗ Doesn't use Client-First but it's developed properly so it will be easy to adapt to it

Bottom line:

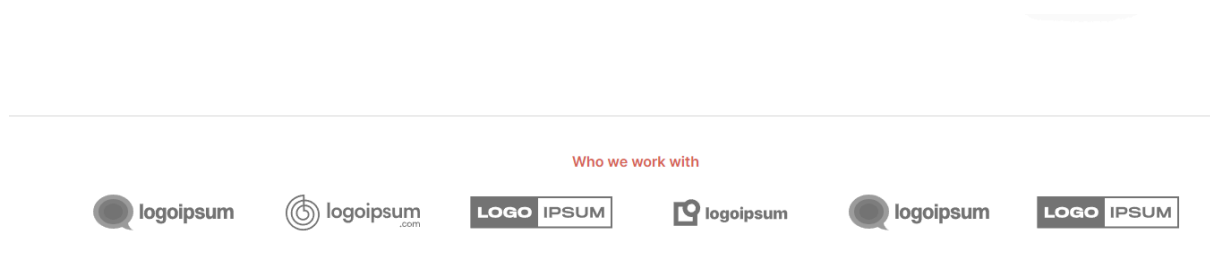

🧐 Use this **Logo Section** if you are looking for that very classic logo section approach and need flexibility when it comes to logo count.

Clients Logo Section Cloneable by Veza Digital

<https://showcased.webflow.io/projects/3d-theme-hero-cloneable>

This is another great cloneable especially if you just need a cloneable logo section base and planning to add loads of personal touch to it. This logo section actually comes as a separate section that is not connected to hero and can be easily reused on different types of Webflow websites.

The section is very thin, so will not disrupt most website designs and should be incorporated into your next build easily. It utilizes a grid to showcase a set of logos, so this cloneable is as simple as it gets. Especially great cloneable for complete Webflow beginners!

What is in this **Logo Section**?

Grid logo section that showcases 6 partner logos.

What is this **Logo Section** best for?

- ✓ Webflow beginners still learning basics of Webflow website design
- ✓ Quick mockup websites

Logo Section Pros:

- ✓ Very simple design that will work on any build
- ✓ Can be a quick copy paste section to try when testing out different layouts for the same site

Logo Section Cons:

- ✗ Might need tweaking if you don't have even number of logos (especially for mobile)

Bottom line:

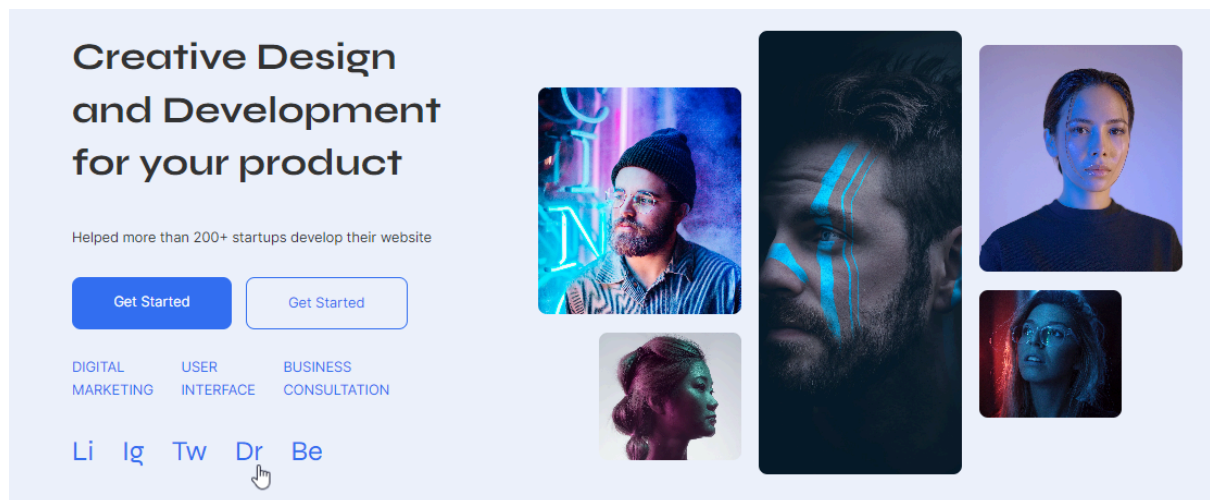

😎 Use this **Logo Section** if you want a slim and easy to reuse logo section for your next Webflow build.

Designer Tools Logo Section Cloneable by WebDev for You

<https://showcased.webflow.io/projects/webdev-for-you-live-stream-9302021>

While at a first glance this looks like a logo section that showcases designer tools... There's a twist! It's actually a creative solution that just showcases links. Yes, there are no images involved in this set up, just clever use of font and link components.

It's a simple block element wrapper with a few links inside. Where it amazes us with build simplicity, this cloneable wins big for creativity. Be sure to check it out if you have a logo section that can be done by just loading a few fonts into it. Showcasing skills with different tools from Adobe package comes to mind!

What is in this **Logo Section**?

A block element with a few links that look like logos when actually are just text.

What is this **Logo Section** best for?

✓ Good for finding inspiration for certain types of builds

Logo Section Pros:

- ✓ Are actually links
- ✓ Can work wonders for very specific web design scenarios

Logo Section Cons:

✗ Are not actually logos, just look like them so won't fit some scenarios

Bottom line:

👁️ Use this **Logo Section** if you need logos to have links, but especially give this logo section a try if you have a project that can utilize fonts instead of logos.

Have a **Logo Section** cloneable that could be showcased on this list?
