

## THE CHARLIE KIRK SHOOTING?

The world went into shock September 10th. We “be-lie-ved” we had witnessed Charlie being shot. Yet a closer look showed some things seemed “off” – :

1. There was a [black spot](#) on Charlie’s t-shirt, gliding to his neck, then disappearing off his shirt.
2. The letter “E,” in “Freedom,” on Charlie’s shirt, disappeared then reappeared.
3. The [microphone](#) in Charlie’s hand did not immediately drop.
4. Red liquid flowed down, but it also flowed “up.”  
5. No red liquid absorbed into Charlie’s shirt. It “[vanished](#).” 
6. At 4:34, Charlie’s [ring](#) jumps finger to finger.

Wardrobe?!!!

Others, interviewed on *Utah’s Fox News 13*, grinned, saying he had been shot...directly into his

(1:02:00–1:09:44) “[heart](#).” 

[Good Morning America](#) showed, (6:33 in), a third of the audience leaving with an empty tent. But wait! Weren’t people in and around the tent [after the incident](#)? Yes. Could this be “rehearsal?”

Laughing men on the ground helping Charlie; strange speeches made; [yellow wax hands](#), in a coffin, [too large to be](#) Charlie’s; and too soon for a funeral!! - Then a [guy on a roof](#) jumping 12 feet down with a rifle? Was he a ninja? A stuntman? A.I.? Having been a professional actor, and in my fair share of crowd scenes, I thought this looks like a production, complete with [hand signals](#), on [when to move](#)!!!

Action!!!!!!

I conferred with the [false flags](#) master. No. Not Alex Jones - Dr. James H Fetzer, Ph.D., [Professor Emeritus of Philosophy at University of Minnesota Duluth](#). Dr. Fetzer, knowing my background, asked if I thought anything was “off,” with Erika Kirk’s speech, spoken just two days following the incident. Indeed. In my opinion, I picked up on what appeared to be acting and writing techniques as well as - [blunders](#) - deflating breaths; whispers; eye closings; and tears,

then none, plus “indicating” with all that eye dabbing? This does happen, applying “[tear solution](#).” 💧 😂 💧

Who *is* Erika?

There's:

Business Speech “[Erika?](#)”

Memorial Speech "[Erika?](#)"

Bleached Blonde Podcast “[Erika?](#)”

Or

Original [Erika?](#)

These look like four different humans, and not just her weaves.

And who is [Charlie ?](#) 😬 The man at Utah Valley or the man in [Arizona?](#) 😬

Back to my timeline -

I began reviewing online videos, providing analysis, explaining what a blood and air squib was, complete with [tube \(See under Charlie's shirt at :14\)](#), and created a [substack](#).

I shared commentary September 15th and 19th on Dr. Fetzer's, [THE RAW DEAL](#), with former law-enforcer, Danny Cirrus. We called out one anomaly after another, including the number 33, the amount of hours it took to “Enter Tyler.” 🎬 Also, 3 hats lined up by Charlie showcasing the number 47, added to [333](#) in numerology. Could it be representing the infamous 33rd-degree Freemason?

Protests abounded by those thinking Charlie had met his end. As the days wore on, though, more and more concluded something was wrong

Among important evidence that the entire event was “theatrics” is:

Then, there's the 1998 film, [SNAKE EYES](#), with a list of [similarities](#): from character Charlie Kirkland, to his September 10th ass-as-sin-ation, by a guy named “Tyler.”

And if that doesn't convince you, how about a Jimmy Kimmel producer-related [crisis](#) actor rehearsing, [grabbing his head](#).  

And the gunshot? [10 minutes in, look at the sound speakers on stage](#). It's called “pyrotechnics.” In addition, the same voice screeching (6 seconds in): “[Oh my God!!](#),” three times, was the same heard later - parking lot - different time. “Audio overlay? [Hear 1:45 here](#).”

But that's all the audio you get, because with a 3,000 witness gag order, it's QUIET ON THE SET.

So if it's all an illusion, where did Charlie go? Well. At his *Arizona State Farm Stadium* memorial, rented by *Turning Point*, [four months in advance](#), FBI Director [Kash Patel](#) said, “Charlie Kirk, rest my brother...I'll see you in Valhalla.” Hmmmm. That's a term used for witness protection, and “Tyler” [poses](#) with a “Valhalla” photo on his computer. Is this code? 

As Dr. Fetzer observes, “Don’t let yourself be played. This has to be one of the most amateurish “false flags” in history.” 🤔 SOS
