Abstract

Purpose of the study: In simple words, tell readers about the aim of this study. No discussion, no story, only the aim of this study [30-50 words]

Methodology: Give the name, brand, type of tools, methods, software, review, and survey that have been used to do this study. No discussion or explanation. [50-60 words]

Main Findings: Write only the main results in a few words. No discussion or explanation. [50-80 words]

Novelty/Originality of this study: What is new in this study that may benefit readers, and how is it advancing the existing knowledge or creating new knowledge in this subject? [50-60 words]

INTRODUCTION

Background of the study:
Literature review:
Gap analysis:
Rationale of the study:
Purpose or Hypotheses of the study:

METHOD

Research Design :
Participant :
Population and the methods of sampling, Instrumentation (sample of questions, scoring method, and psychometric properties (validity and reliability)) :
Instrument :
Procedures and if relevant, the time frame :
Analysis plan (describe statistical tests and the comparisons made; ordinary statistical methods should be used without comment; advanced or unusual methods may require a literature citation):
Scope and/or limitations of the methodology you used :

Manuscript can use the STROBE method for observational studies, SRQR for qualitative studies, PRISMA for reviews, CARE for case reports, and CONSORT for clinical trials (Recommendations)

RESULTS AND DISCUSSION

Results :
Discussion :
Implications :
Research contribution :
Limitations :
Suggestions :

CONCLUSION

Provide a statement of what is expected, as stated in the "Introduction" chapter can ultimately result in the "Results and Discussion" chapter, so there is compatibility. Moreover, it can also be added to the prospect of the development of research results and application prospects of further studies into the next step (based on results and discussion).

ACKNOWLEDGMENT

The acknowledgement is a form of appreciation for the contribution of an institution or an individual who is not considered the writer, for example, an institution or an individual who provides the research funding (**funding support**) for this publication.

AUTHOR CONTRIBUTION STATEMENT

The Author Contributions Statement can be up to several sentences long and should briefly describe the tasks of individual authors. Please list only 2 initials for each author, without full stops, but separated by commas (e.g., JC, JS). In the case of two authors with the same initials, please use their middle initial to differentiate between them (e.g., REW, RSW). The Author Contributions Statement should be included at the end of the manuscript before the References.

CONFLICTS OF INTEREST

Authors must identify and declare any personal circumstances or interests that may be perceived as influencing the representation or interpretation of reported research results. If there is no conflict of interest, please state “The authors declare no conflict of interest.” Any role of the funding sponsors in the choice of research project; design of the study; collection, analyses, or interpretation of data; in the writing of the manuscript; or in the decision to publish the results must be declared in this section …

INFORMED CONSENT STATEMENT

If your research uses humans or animals, please include an informed consent statement in your writing. For example, informed consent was obtained from all subjects involved in the study. Prior to participation, each subject was provided with a detailed explanation of the study’s objectives, procedures, potential risks, and benefits. All participants voluntarily agreed to participate and signed a written informed consent form.

USE OF ARTIFICIAL INTELLIGENCE (AI)-ASSISTED TECHNOLOGY

Authors must clearly declare the use of generative AI and AI-assisted technologies in the writing process by adding a statement in a new section titled ‘use of artificial intelligence (AI)-assisted technology.' “During the preparation of this work, the author(s) used [NAME TOOL/SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and took full responsibility for the content of the publication.” This

declaration does not apply to the use of basic tools for checking grammar, spelling, references, etc. If there is nothing to disclose, the authors shall write “Not applicable."

REFERENCES

The following are the reference writing guidelines of Online Learning in Educational Research. The references should be written to justify alignment and alphabetically. We suggest you use Mendeley's management reference with **APA style** for your references. The guideline, for example below:

Table 1. The sample of table format (Center, Cambria, 11)

No	Description	Explanation
1	Description 1	Explanation
2	Description 2	Explanation
3	Description 3	Explanation
4	Description 4	Explanation
5	Description 5	Explanation
