

## Directions:

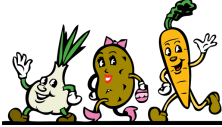

1. Beginning with #1, discuss your picture with your partner in order to decide whether your picture is the same (pareil) or different (différent). Note: Your "different" pictures will be quite similar, so you will have to ask each other lots of questions to figure out whether your pictures are actually the same.
2. If you decide your pictures are the same, write "P" (*Pareil*) next to the number. If you think they are different (*Différent*), write a D.
3. Continue until you have discussed all of the pictures.
