Please, if you want to ask for a commission, make sure you read my t.o.s carefully, when you accept the commission, it is understood that the terms of service have been seen and accepted.

- The stickers are intended for personal use, the base price is for personal use only.
- If you are looking to commission stickers for commercial use please let me know so I can give you a correct quote with the prices indicated.
(A commercial use can be to sell physical stickers, t-shirts that are not for personal use only or for sale, streams, etc.).
- The size of the stickers is 512 x 512 PX, since they are directed towards the standard measure of telegram.
- If you are looking to obtain a larger canvas size, communicate it before requesting a quote, the increase in resolution/size will cause the price to change, since it could be considered a common commission in some cases due to the size.
- The price indicated in the price table is a **base price** which means that the price could go up depending on the complexity of the character or characters or the complexity of the sticker.
- It should also consider that the base price is for a single character per sticker, if you want to add more than two characters or objects not considered or called "extras" the price will also rise.
