The Google Password Manager: A User's Guide

Google Password Manager helps you securely store, automatically fill, and manage your passwords across devices when you are signed in with your Google Account.

---

1. Accessing Google Password Manager:

There are three main ways to open it:

- **On the Web (any device):**
  1. Go to passwords.google.com.
  2. Sign in with your Google Account if prompted.
- **On Chrome (desktop):**
  1. Open Chrome.
  2. Click the **three dots (⋮)** in the top-right corner.
  3. Go to **Settings** > **Autofill** > **Password Manager**.
- **On Mobile (Android/iOS with Chrome or Google app):**
  1. **Android:** Settings > Google > Manage your Google Account > Security > Password Manager.
  2. **iPhone/iPad:** Use the **Google app** > Tap your profile > Settings > Password Manager.

---

2. Saving Passwords:

1. When you log in to a website or app, Google will prompt: **"Save Password?"**
2. Click **Save** to store it securely.
3. Your credentials will synchronize across devices where you are signed into your Google Account.

---

3. Auto-Filling Passwords:

- **On Chrome or Android apps:**
  When you revisit a site or app, your saved username and password will appear automatically. Select your account and Google fills it in.
- **On iPhone/iPad:**
  Enable **Google Password Manager as Autofill provider** under iOS Settings > Passwords > Autofill Passwords.

---

4. Managing Saved Passwords:

- Go to passwords.google.com or open **Password Manager** in Chrome/Google app.
- From here you can:
  - **Search** for a saved login.
  - **View passwords** (requires Google sign-in & device authentication).
  - **Edit or delete** stored passwords.
  - **Export passwords** (for backup or migration; use caution).

---

5. Checking Password Security:

Google Password Manager includes a **Password Checkup** tool:

1. Open Password Manager.
2. Select **Check passwords**.
3. Google will scan for:
   - Weak passwords.
   - Reused passwords.
   - Compromised passwords (found in known data breaches).
4. Follow the recommendations to update accounts.

---

6. Extra Security Tips:

- Enable and enroll in **2-Step Verification (2FA)** on your Google Account for extra protection.
- Keep your browser and apps up to date.
- Regularly review and clean up old or unused saved passwords.

✅ **Summary:**
Google Password Manager securely stores your passwords, auto fills them across devices, and helps you stay protected with password checkups. Access to your Google Account is all that is needed to utilize this service.
