

Stanley Middle School CA Healthy Kids Survey

CALIFORNIA HEALTHY KIDS SURVEY (CHKS)

Stanley Middle administers the CHKS to 6th, 7th, and 8th graders each spring. The CHKS gathers information from students about resiliency, protective factors, risk behaviors, and school climate, and this information is reported to the school community and public. To see exactly what survey questions will be asked of students, please visit the links below.

Student participation for 6th grade students requires active parent consent; however, only passive parent consent is required for 7th and 8th graders. Student participation is anonymous, confidential and voluntary. For more information, visit: <http://chks.wested.org/>

Parent Consent

6th Grade: No child can be surveyed until a parent/guardian has provided written permission. If a permission form is not returned, it must be assumed that parental/guardian permission has not been granted.

7th and 8th Grades: Written information about the survey is sent to parents/guardians, who in turn have to notify the school ONLY if they do not want their child to participate in the survey.

CHKS Modules

Stanley Middle School will be administering the following CHKS Modules. Please click on the hyperlinks if you wish to see samples of the actual survey modules that will be given:

- [Middle School Core Survey](#)
- [Middle/High School Climate Module](#)
- [Middle/High School Social Emotional Health Module](#)
