About Me

I'm a multidisciplinary Software Engineer and Technical Writer with 5+ years of experience building modern web applications and crafting developer-focused content. I specialize in frontend engineering, Web3 technologies and high-clarity technical communication.

I combine deep engineering expertise with strong documentation and instructional writing skills, enabling me to build complex systems and communicate them effectively to developers, stakeholders and end users. Focused on delivering user-centric interfaces, scalable architecture and clear, accessible technical content that accelerates product adoption and drives developer engagement.

Work Experience

Senior Technical Writer | Hackmamba

February 2022 to Present

- Produce end-to-end developer tutorials, API guides and onboarding material used by internal teams and external integrators.
- Implement documentation, testing and verification routines (code samples, runnable snippets) to ensure examples remain accurate.
- Collaborated with engineers to convert RFCs and design decisions into clear, searchable docs; reduced repetitive support queries by clarifying common integration steps.
- Provide SEO structure and editorial guidance to improve the discoverability of technical content.

Senior Frontend Engineer | Rope Africa

November 2024 to Sep 2025

- Built a reusable UI component system with React, Next.js, ShadCN and TailwindCSS, reducing frontend development time by ~40%.
- Developed an AI-powered image colorization feature using OpenAI, improving engagement for design tools.
- Implemented robust data workflows for HR and financial modules, including API integrations and complex form handling.
- Improved user experience and responsiveness across dashboards using TypeScript, Redux and performance profiling tools.

Full-stack Developer | Telvida

Dec 2023 to Sep 2024

- Built and maintained full-stack applications with React, Next.js, Svelte/SvelteKit, and Node.js for healthcare and operations use cases.
- Increased organic product traffic by 25% through technical SEO improvements and Google Search Console optimization.
- Integrated REST + GraphQL APIs, reducing data fetch latency and improving UI responsiveness.
- Enhanced application performance by 10% through Redux optimizations and component refactoring.

Web3 Technical Writer | Hashnode

Nov 2022 to July 2023

- Produced in-depth Web3 tutorials covering Solidity, Ethereum, smart contracts and decentralized protocols.
- Participated in the [Hashnode Web3 Content](#), contributing research on blockchain, Solidity and Ethereum SDKs. Published:
 - [What is Web3.js - An Introduction Into the Web3.js Libraries](#) that garnered 25K+ reads.
 - [How to Create Your Own DAO with ThirdWeb](#)
 - [How to Build a CRUD App with Solidity](#)
- Partnered with blockchain startups to create developer onboarding content and product explainers.
- Wrote code-driven examples, architecture diagrams and step-by-step implementation guides.

Frontend Developer | Hunnovate

August 2023 to Dec 2023

- Developed responsive dashboards and landing pages using Vue.js, React, TypeScript and PHP.
- Refactored UI components for improved scalability and loading performance across multiple client applications.
- Created reusable modules that reduced frontend code duplication and accelerated project delivery timelines.

Technical Writer | Multiple Clients

Dec 2021 to April 2024

During this time, I worked with clients including Cloudinary, Appwrite, Hashnode, and [dev.to](#).

- Developed API documentation, SDK references and integration guides for developer platforms.
- Translated engineering requirements into clear, actionable documentation for internal and external teams.
- Built structured doc systems to improve discoverability and reduce developer friction.
- Authored blog posts, how-tos and engineering explainers for Web3 and SaaS products.

Technical Skill

Languages: Javascript, Typescript, React, Next.js, Vue, Svelte/SvelteKit, TailwindCSS, ShadCN, PHP, Node.js, Express.js, Nest.js

Web3: Solidity, Hardhat, Truffle, Web3.js, Ethers.js

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Drizzle ORM

Tools: Git, Docker, AWS, GraphQL, REST APIs, Gitbook, Postman, CI/CD, Redux, React Query, Tanstack

Writing and Documentation: Markdown, API Documentation, Mintlify, OpenAPI/Swagger, Developer Tutorials, Integration Guides, SEO

What I'm Looking For

Roles as a Frontend Engineer, Full-Stack Developer or Technical Writer (Developer Docs/Web3/SaaS) that leverage both engineering execution and technical communication expertise.
