

Math 6 Unit 6
Expressions and Equations
Extra Practice Problems

<p>1. Draw a tape diagram or hanger for these two number sentences and explain the difference between the equations: $x + 2 = 8$ and $2x = 8$</p>	<p>2. The rectangle has a length 3 times the width. What is the perimeter ? Draw a picture.</p>
<p>3. Lin can complete 30 math problems in 2 hours. Write an expression for h hours.</p>	<p>4. Mitchell earns \$40 for mowing the lawn. He spends \$5 on ice cream and \$15 on a book. Write an equation for how much money Mitchell has left.</p>
<p>5. Diego has 200 students in his grade which is 2 times as many as Lin. Lin's grade has x students. Write this equation.</p>	<p>6. Solve the equation: $\frac{2}{5}x = 3\frac{1}{5}$</p>

Math 6 Unit 6

Expressions and Equations

Extra Practice Problems

7. Use the distributive property to write an equivalent expression for: $42 - 14x$

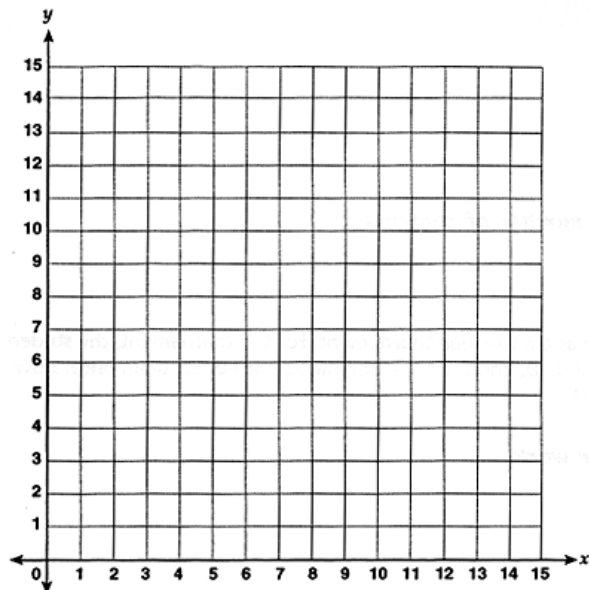

8. Solve. $4(3x - 2) + 2^3 = 6$

9. Combine the like terms:
 $3x + 10 + 12x - 7$

10. Mrs. Canny wants to sell granola bars in her store singularly however they are purchased by her in boxes of 8. She wants to sell each bar for \$0.50.

- write an equation
- Complete the table
- graph to show the money collected by the store.

use the graph below for #10

equation: _____

Number of BOXES	Money collected
0	
1	4
2	
3
