

Participants are allowed to use AI tools (eg. ChatGPT, GitHub Copilot, Midjourney), including large language models (LLMs), generative AI, mathematics software, translation software, code-copilots, auto-complete technologies, and other AI-assisted technologies in their projects. AI usage will be used into consideration during judging.

All teams need to report AI usage. Although we don't require you to submit the specific prompts you've used, all teams are required to indicate the areas that I've used AI.

AI generates idea:

Yes:

No: Our idea is original

AI generates code:

Yes: The website and Claude Api integration were built using the help of ai.

No:

AI generates images:

Yes: some of the images are generated through ai but most of them are found online or made by us.

No: ^

AI generates presentation:

Yes:

No: We built it ourselves on Canva

AI polishes design:

Yes: We used ai to debug the code and get the website running.

No:
